(57) **CLAIM**

The ornamental design for a controller for smart furniture (UF), as shown and described.

DESCRIPTION

FIG. 1 is a front view of an embodiment of a controller for smart furniture (UF) showing my new design with a raised button portion;

FIG. 2 is a top plan view of the controller for smart furniture (UF) with a raised button portion;

FIG. 3 is a bottom plan view of the controller for smart furniture (UF) with a raised button portion;

FIG. 4 is a rear view of the controller for smart furniture (UF) with a raised button portion;

FIG. 5 is a right side view of the controller for smart furniture (UF) with a raised button portion;

FIG. 6 is a left side view of the controller for smart furniture (UF) with a raised button portion;

FIG. 7 is a side elevational view of the controller for smart furniture (UF) with a raised button portion;

FIG. 8 is a bottom perspective view of the controller for smart furniture (UF) with a raised button portion;

FIG. 9 is a side elevational view of the controller for smart furniture (UF) with button portion retracted;

FIG. 10 is a top plan view of the controller for smart furniture (UF) with button portion retracted;

FIG. 11 is a front view of the controller for smart furniture (UF) with button portion retracted;

FIG. 12 is a side view of the controller for smart furniture (UF) with button portion retracted;

FIG. 13 is a side elevational view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 14 is a top plan view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 15 is a bottom plan view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 16 is a rear view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 17 is a right side view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 18 is a left side view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 19 is a bottom perspective view of the controller for smart furniture (UF) with a raised button portion and indicators;

FIG. 20 is a side elevational view of the controller for smart furniture (UF) with button portion retracted and indicators;

FIG. 21 is a top plan view of the controller for smart furniture (UF) with button portion retracted and indicators;

FIG. 22 is a bottom plan view of the controller for smart furniture (UF) with button portion retracted and indicators; and,

FIG. 23 is a rear view of the controller for smart furniture (UF) with button portion retracted and indicators.

The broken lines represent potential apertures in the surfaces depicted and do not form part of the claimed design.
