(57) **CLAIM**

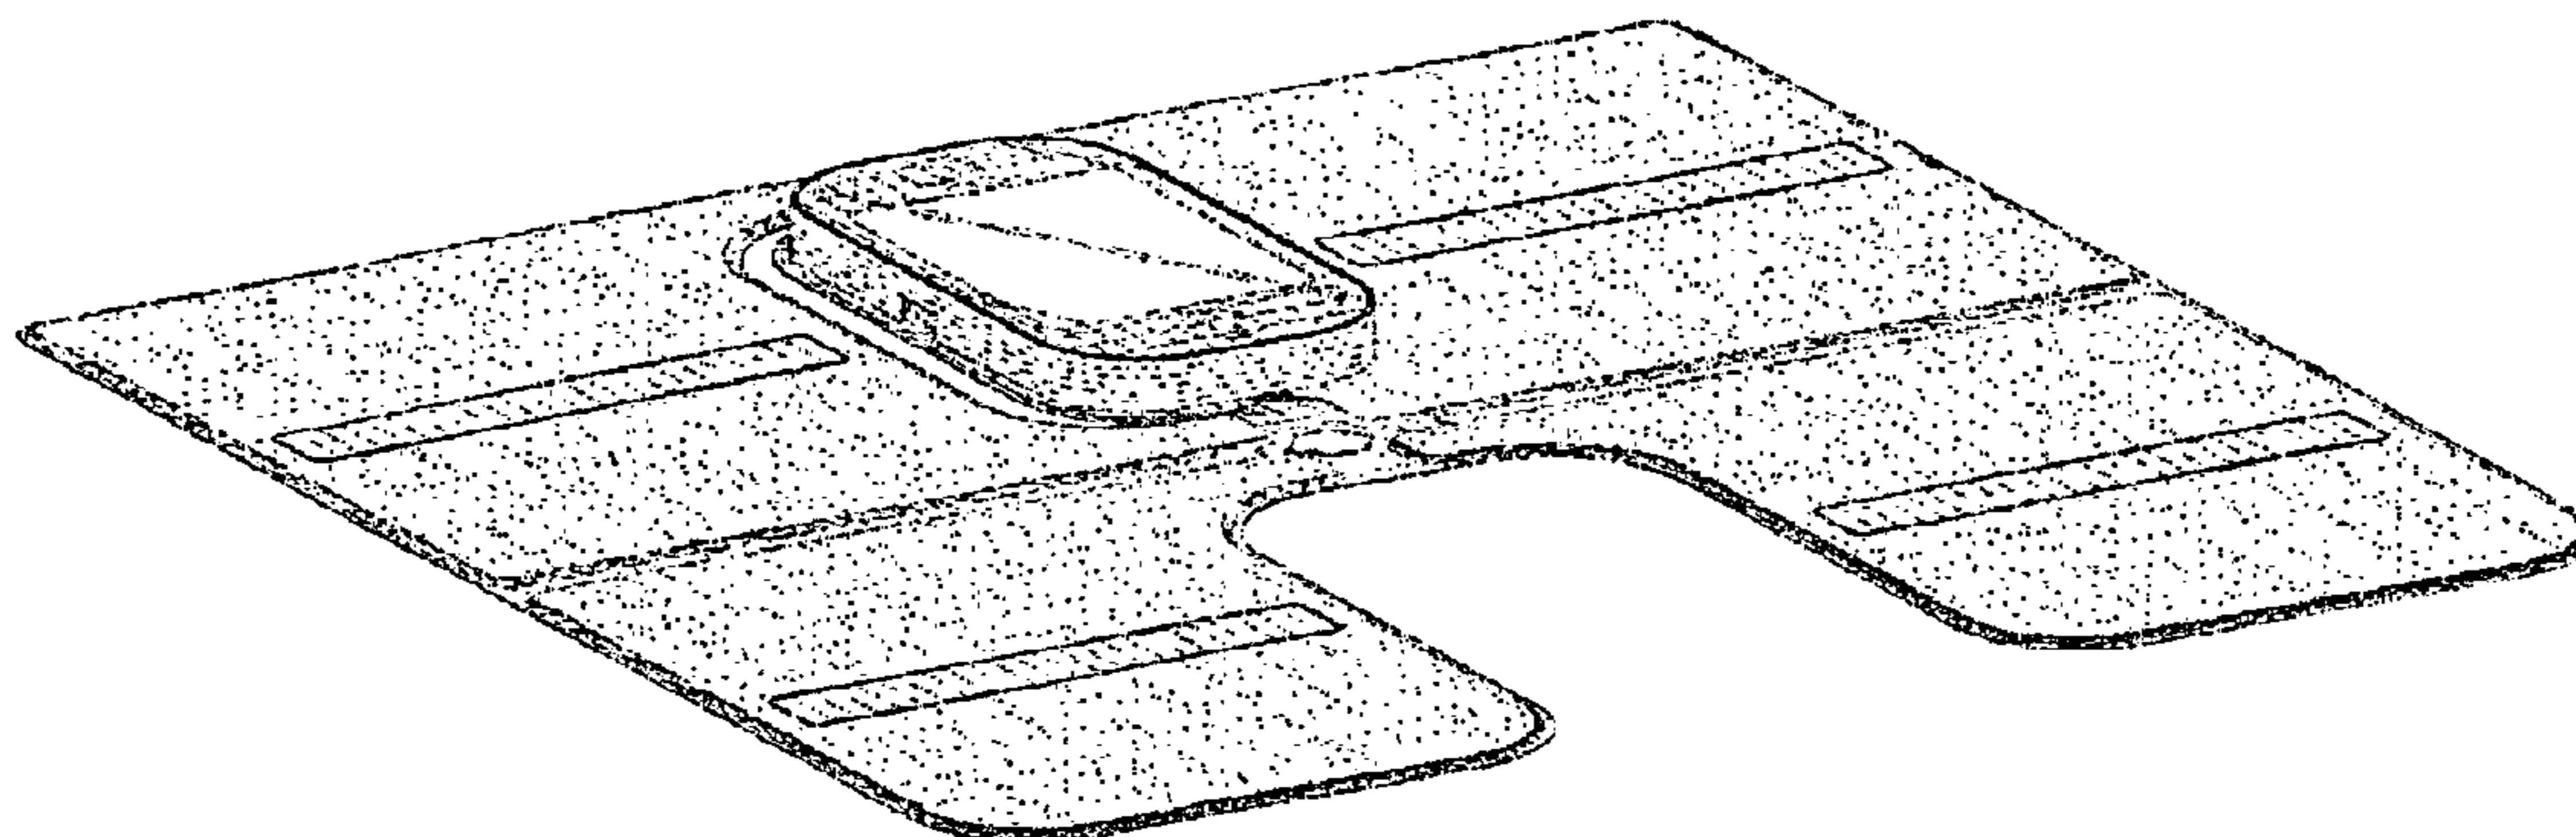

The ornamental design and configuration for an electronic device, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of an electronic device
FIG. 2 is a plan view of an electronic device; and,
FIG. 3 is an inverted view of an electronic device.

The invention pertains to a new ornamental design and configuration of an article of manufacture of which the primary purpose is to obtain biometric data from an individual. In one embodiment, as indicated in the drawings, the article of manufacture is an electronic device. Examples of an electronic device are a computer, a portable or moveable electronic platform on which a person can stand to interact with the device, a handheld or wearable electronic device, media player, media storage device, a personal digital assistant, a communication device, and the like. In another embodiment the article of manufacture is a novelty item or toy.
