(57) **CLAIM**

I claim the ornamental design for a railing support insert, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view showing front, top and right side features of a first embodiment of my design that has an elongate, upwardly-opening cross-member from which centrally depends a tubular stem that is of indefinite length;
FIG. 2 is a front elevation view thereof;
FIG. 3 is a top plan view thereof;
FIG. 4 is a bottom plan view thereof;
FIG. 5 is a right side view thereof, it being understood that a left side view is identical hereto;
FIG. 6 is a front elevation view of a second embodiment of my design that differs from the embodiment shown in FIGS. 1-5 only in that the depending tubular stem is of fixed length, as shown; and,
FIG. 7 is a right side elevation view thereof, it being understood that a left side elevation view is identical hereto.
Top and bottom views of the second embodiment are omitted inasmuch as they are identical to FIGS. 3 and 4, respectively. The broken lines depict holes in the article and form no part of the claimed design.
The broken away symbols in the drawing indicate that the appearance of any portion of the article between the break lines forms no part of the claimed design.

1 Claim, 4 Drawing Sheets
