Primary Examiner — Michael A Pratt

(57) **CLAIM**

The ornamental design for an automotive and truck differential cover, as shown and described.

DESCRIPTION

FIG. 1 is a rear view of my new automotive differential leakage capture, containment and recovery receptacle as it would appear when installed upon an automobiles differential.

FIG. 2 is a right side view of automotive differential leakage capture, containment and recovery receptacle as it would appear when installed upon an automobiles differential.

FIG. 3 is a front view thereof;

FIG. 4 is a bottom view thereof;

FIG. 5 is a rear view thereof;

FIG. 6 is a right-side view thereof; Left-side view not shown would be a mirror image of the right-side; and,

FIG. 7 is a perspective view from the bottom right side thereof.

The primary object of this invention is to provide motorists with an automotive differential cover that is non-obtrusive and pleasant in its appearance as installed upon an automobile or trucks differential. This is accomplished due to and thru it's smooth and unique eye-pleasing ornamental shape.
