(57) **CLAIM**

The ornamental design for lighting on an aircraft flight deck, as shown and described.

DESCRIPTION

FIG. 1 is a downward, rear, right side perspective view from further rearward on the flight deck of flat, unadorned strip lighting on an aircraft flight deck in accordance with the claimed design;

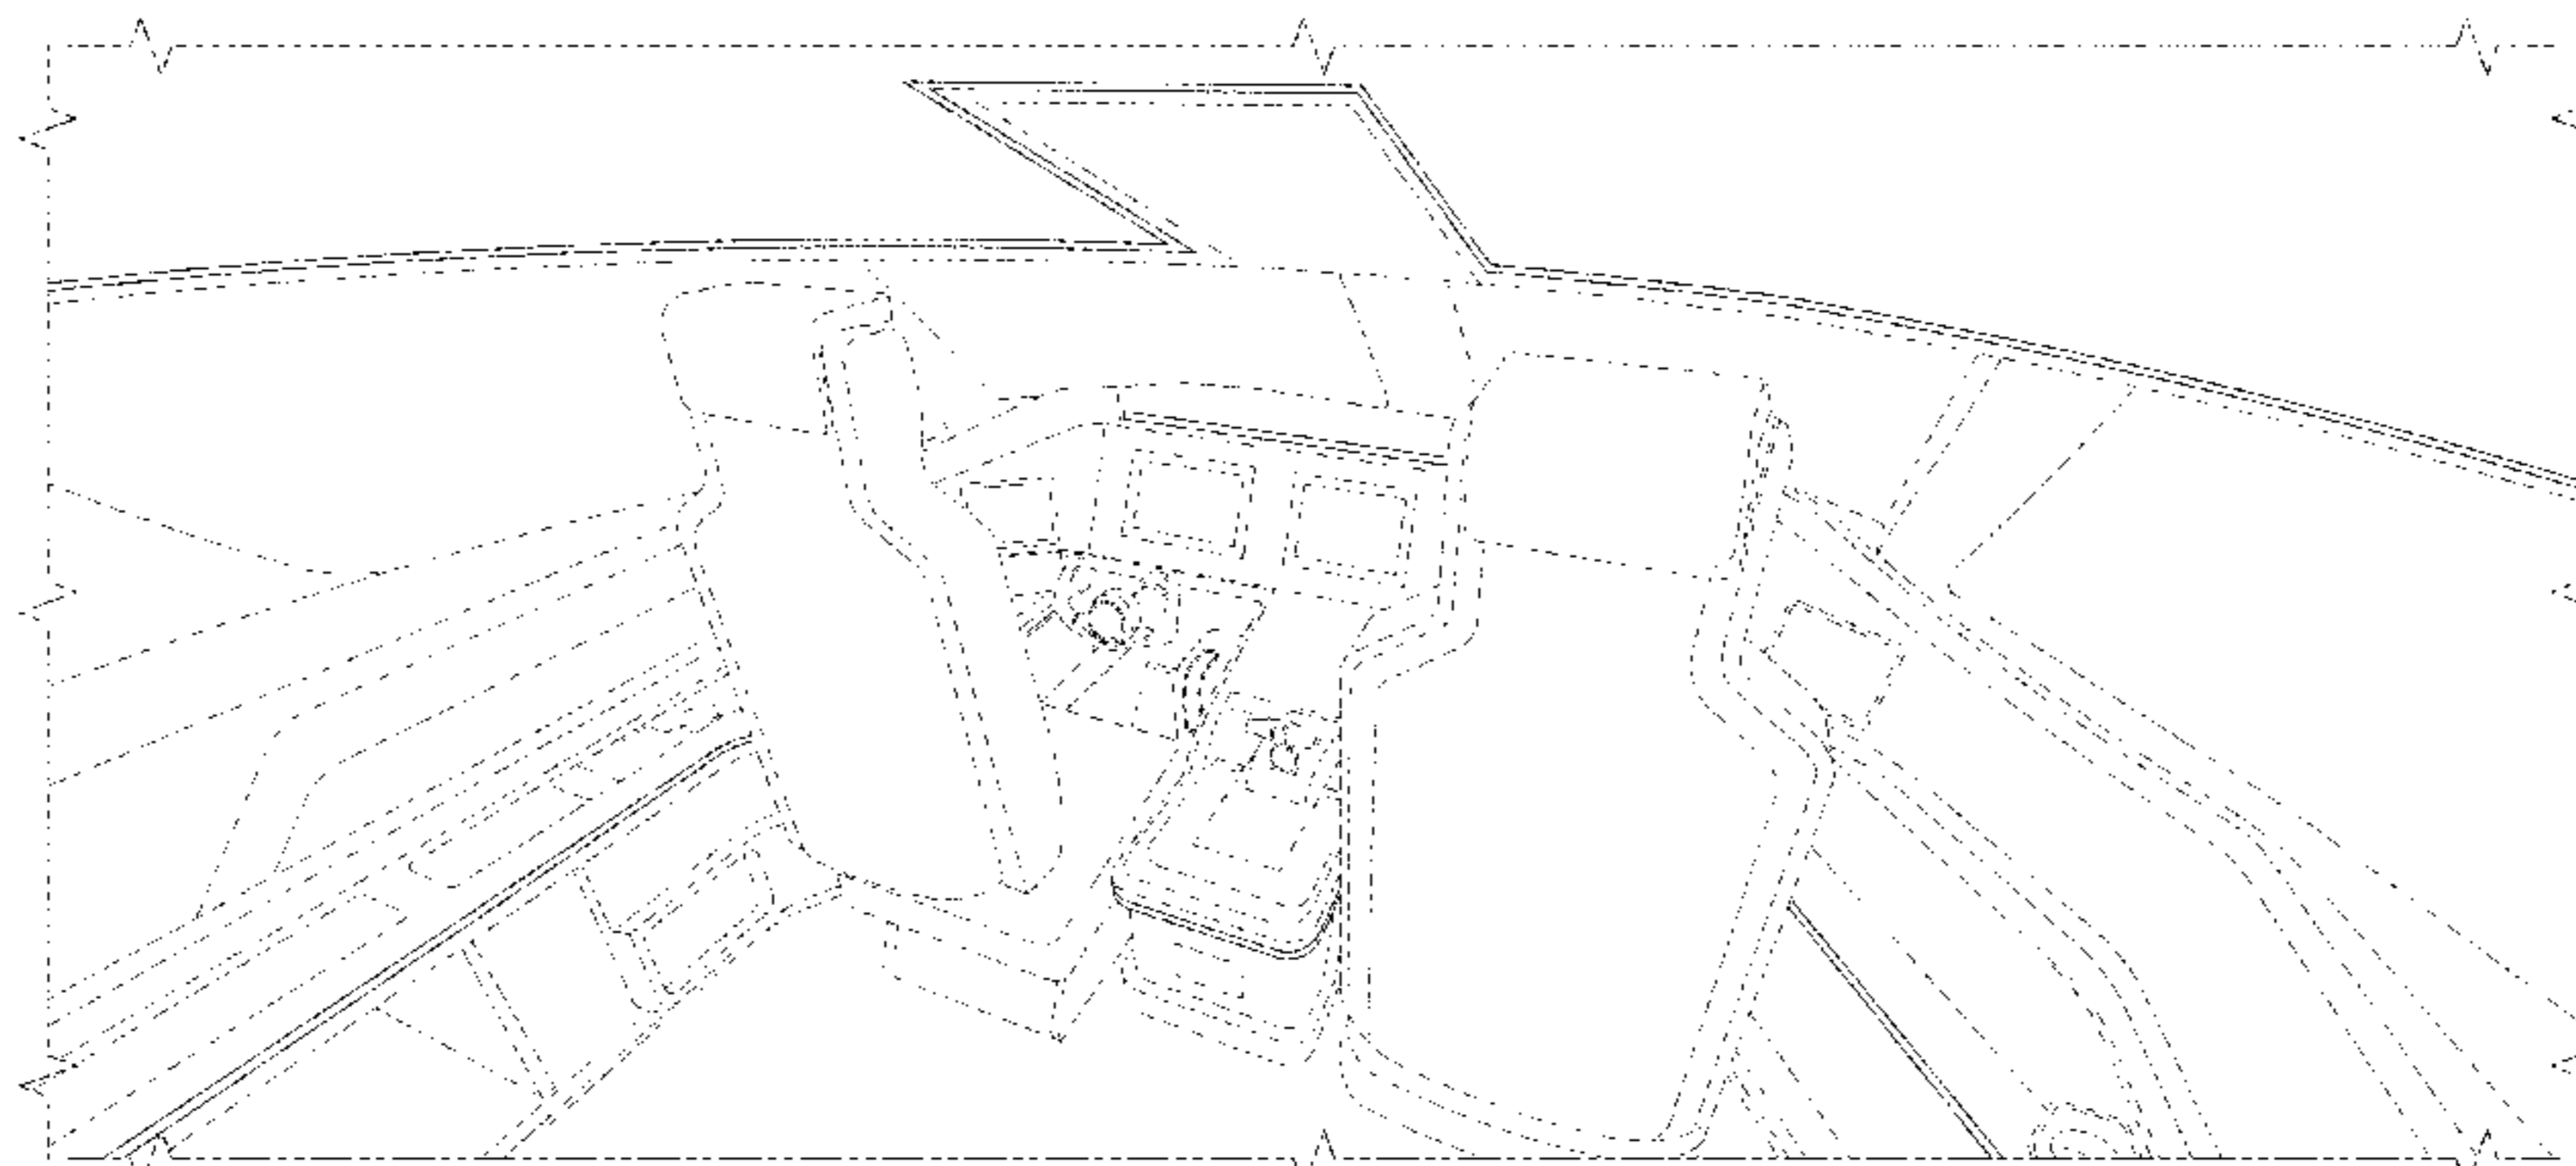

FIG. 2 is a center, rear perspective view from further forward on the flight deck of flat, unadorned strip lighting on an aircraft flight deck with seats removed in accordance the claimed design; and

FIG. 3 is a downward, rear, right side perspective view from still further forward and more to the right on the flight deck of flat, unadorned strip lighting on an aircraft flight deck with seats removed in accordance with the claimed design; and,

FIG. 4 is a downward, rear, right side perspective view on the flight deck with seats removed, zoomed in a portion of FIG. 3 that shows the flat, unadorned strip lighting on a right side yoke, and a right side of the center pedestal of an aircraft flight deck, which is representative of the features of the strip lighting shown in FIGS. 1-3 above in accordance with the claimed design.

The broken line showing of the elements and portions of an aircraft flight deck is included for the purpose of illustrating portions of the “article” and forms no part of the claimed design. The dash-dot-dot-dash pattern of lines represents the boundary of the claimed.
