(57) **CLAIM**

The ornamental design for a dispensing container assembly for viscous compositions, as shown and described.

DESCRIPTION

FIG. 1 is an exploded perspective view of an upper left side of a dispensing container assembly for viscous compositions, thereby showing a small diameter cap portion, a dispensing nozzle collar portion, a pair of large diameter cap portions, a funnel portion, a container portion, a plunger portion and a removable flange portion showing my new design.

FIG. 2 is a front view of the small diameter cap portion, the left side, right side and rear view being identical.

FIG. 3 is a top plan view of FIG. 2.

FIG. 4 is a bottom plan view of FIG. 2.

FIG. 5 is a front view of the dispensing nozzle collar portion, the left side, right side and rear view being identical.

FIG. 6 is a top plan view of FIG. 5.

FIG. 7 is a bottom plan view of FIG. 5.

FIG. 8 is a front view of the funnel portion, the left side, right side and rear view being identical.

FIG. 9 is a top plan view of FIG. 8.

FIG. 10 is a bottom plan view of FIG. 8.

FIG. 11 is a front view of an individual large diameter cap portion, the left side, right side and rear view being identical.

FIG. 12 is a top plan view of FIG. 11.

FIG. 13 is a bottom plan view of FIG. 11.

FIG. 14 is a front view of the container portion.

FIG. 15 is a rear view of FIG. 14.

FIG. 16 is a left side view of FIG. 14.

FIG. 17 is a right side view of FIG. 14.

FIG. 18 is a top plan view of FIG. 14.

FIG. 19 is a bottom plan view of FIG. 14.

FIG. 20 is a front view of the plunger portion, the left side, right side and rear views being identical, wherein the cross-hatching covering the upper portion thereof denotes a frictional material.

FIG. 21 is a top plan view of FIG. 20.

FIG. 22 is a bottom plan view of FIG. 20.

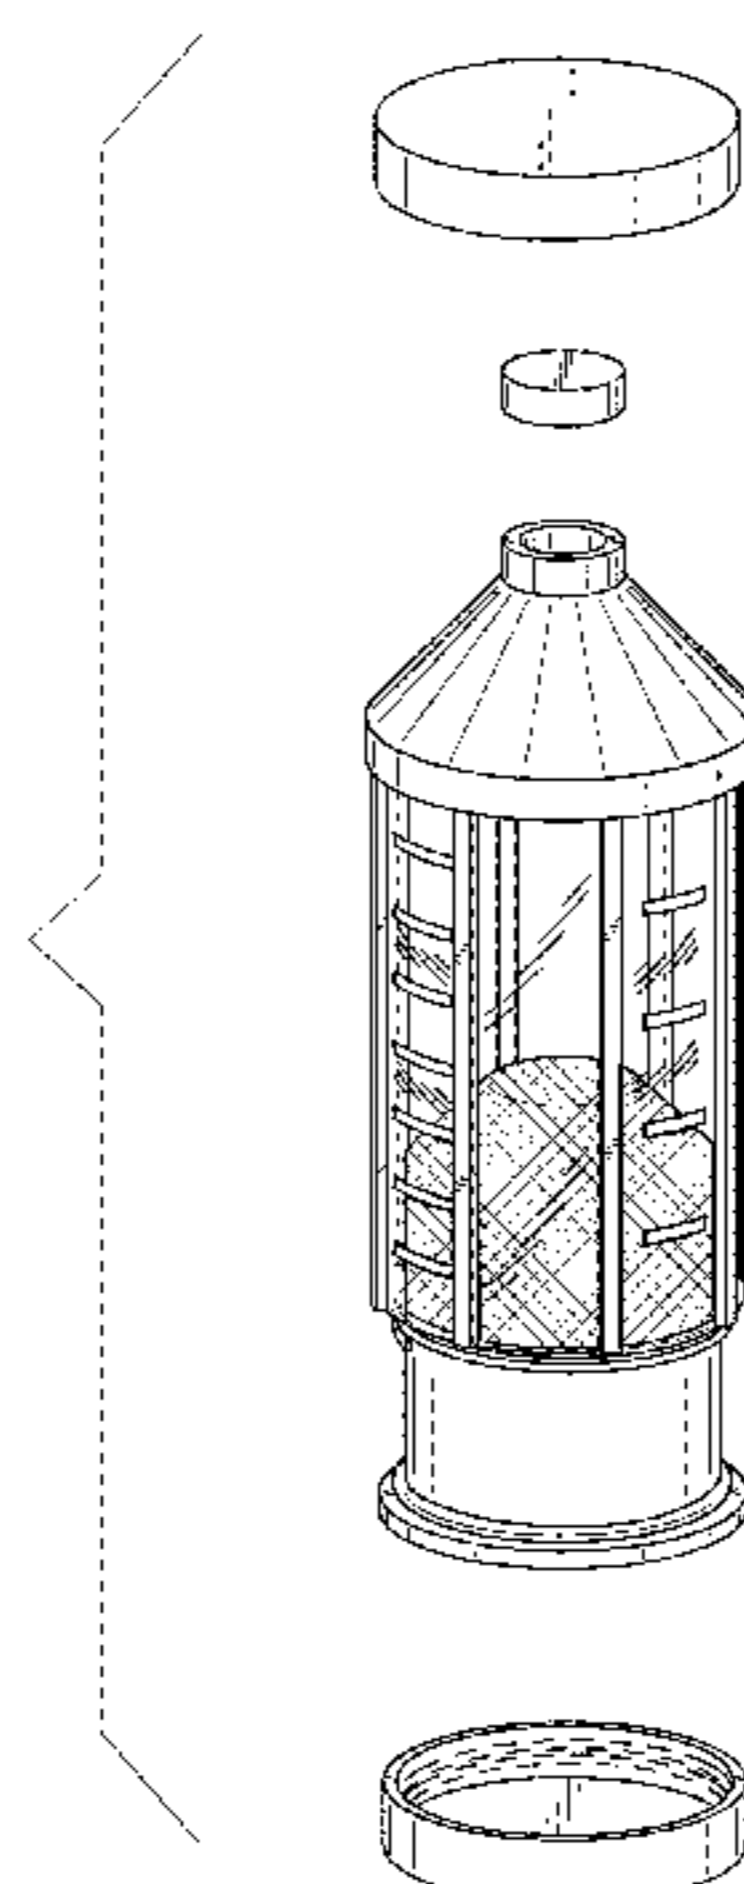

FIG. 23 is a front view of the removable flange portion, the left side, right side and rear views being identical.

FIG. 24 is a top plan view of FIG. 23; and,

FIG. 25 is a bottom plan view of FIG. 24.

The broken line depictions illustrate fastening means of the connecting portions of the assembly and form no part of the claimed design. The various portions, shown in FIGS. 5-25, are shown separately for clarity of illustration.
