(57) **CLAIM**

I claim the ornamental design for a pair of bib shorts with cross-over support straps, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a pair of bib shorts with cross-over support straps, showing our new design and according to the present invention;

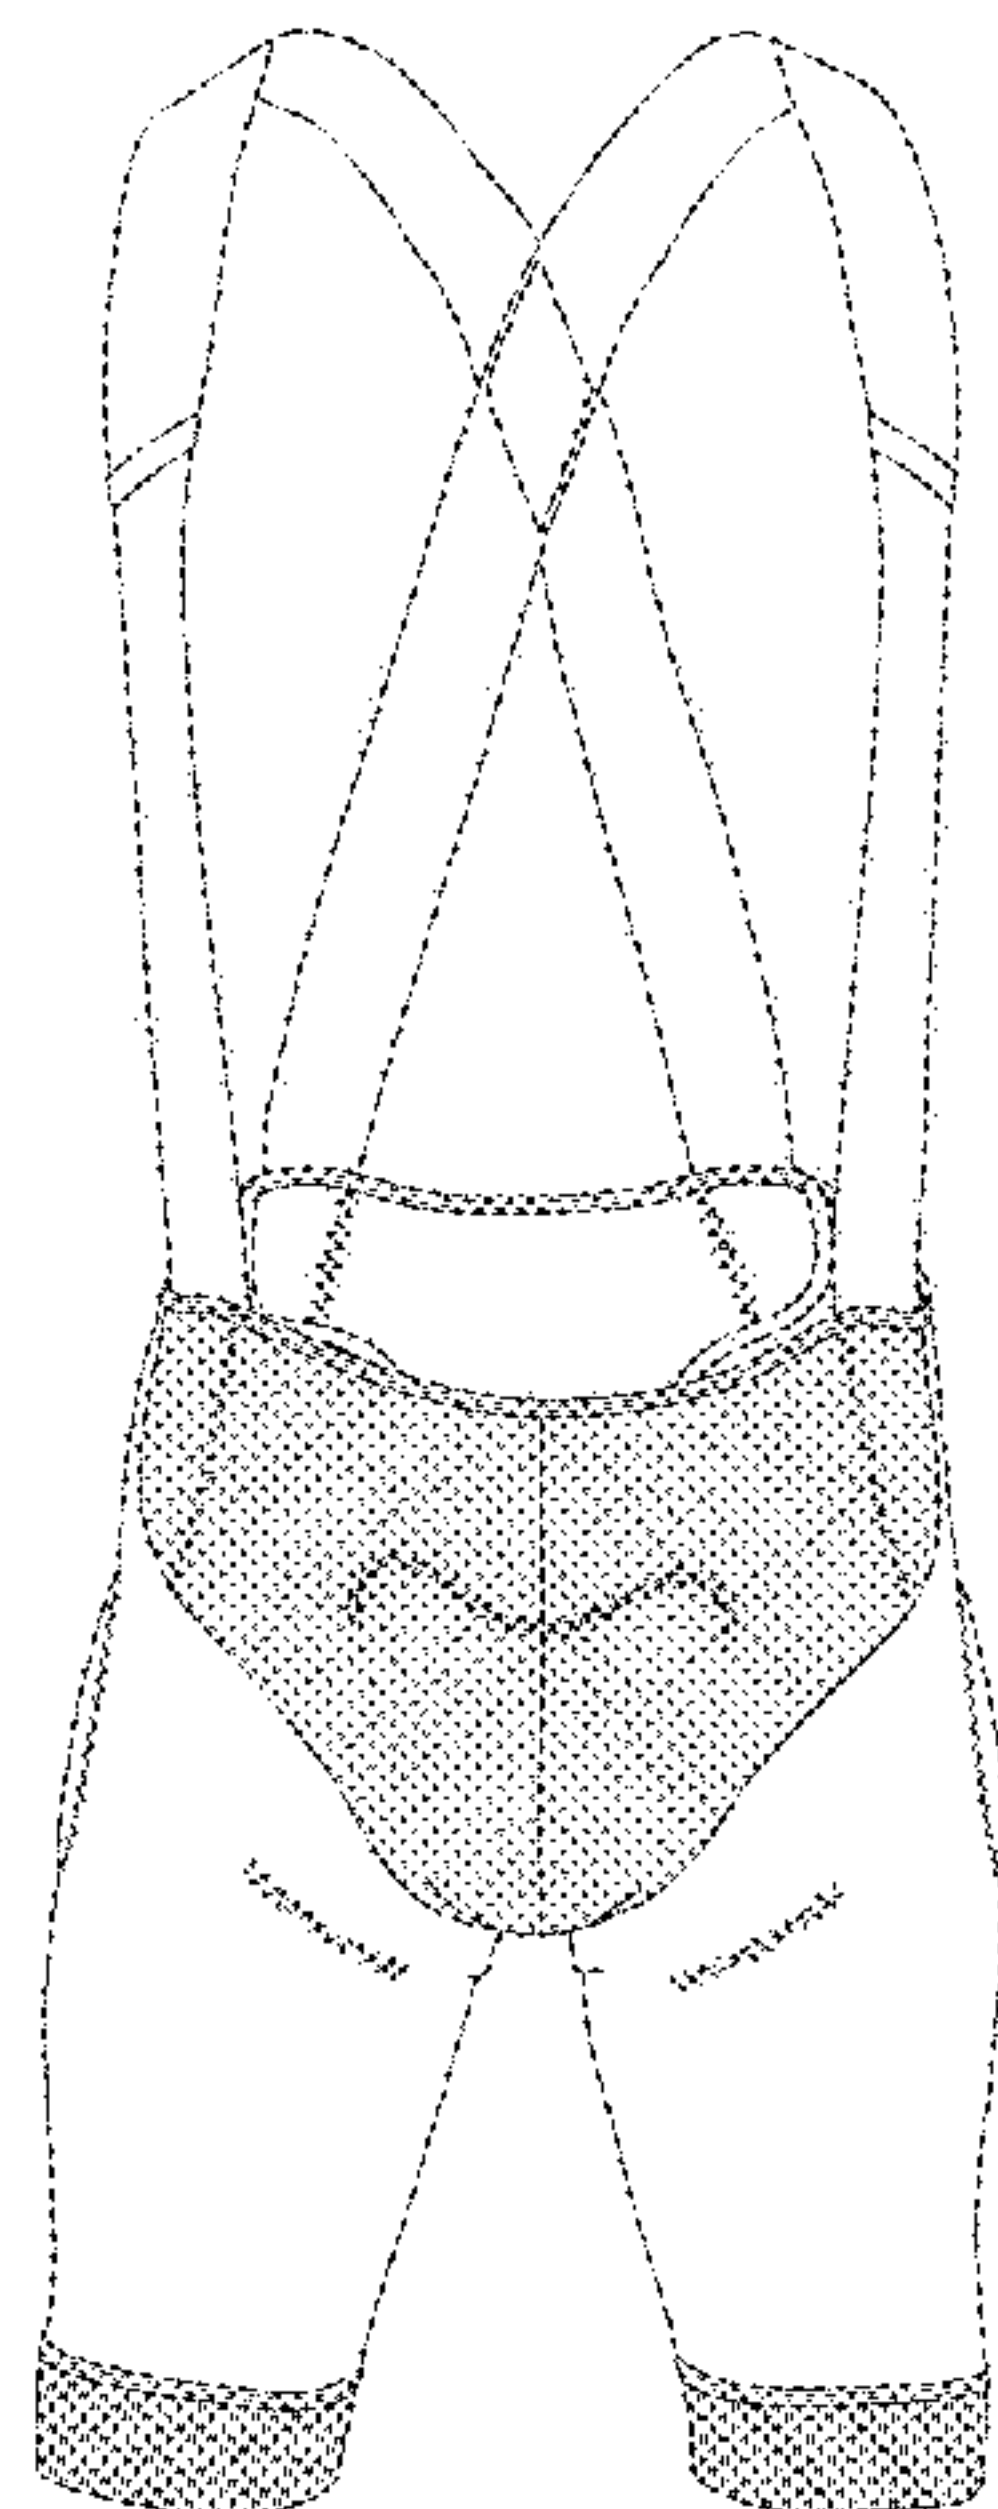

FIG. 2 is a rear view of a pair of bib shorts with cross-over support straps, showing our new design and according to the present invention;

FIG. 3 is a left side view of a pair of bib shorts with cross-over support straps, showing our new design and according to the present invention; and,

FIG. 4 is a right side view of a pair of bib shorts with cross-over support straps, showing our new design and according to the present invention.

The cross-hatching for the front of the brief portion is meant to show the same as a woven mesh, and is not indicative of color. The cross hatching at the bottom edge of the legs of the bib shorts with cross-over support straps is meant to illustrate that those portions are a contrasting fabric to the rest of the article. The stitching on the front, rear and sides are also part of the claimed invention.

1 Claim, 4 Drawing Sheets

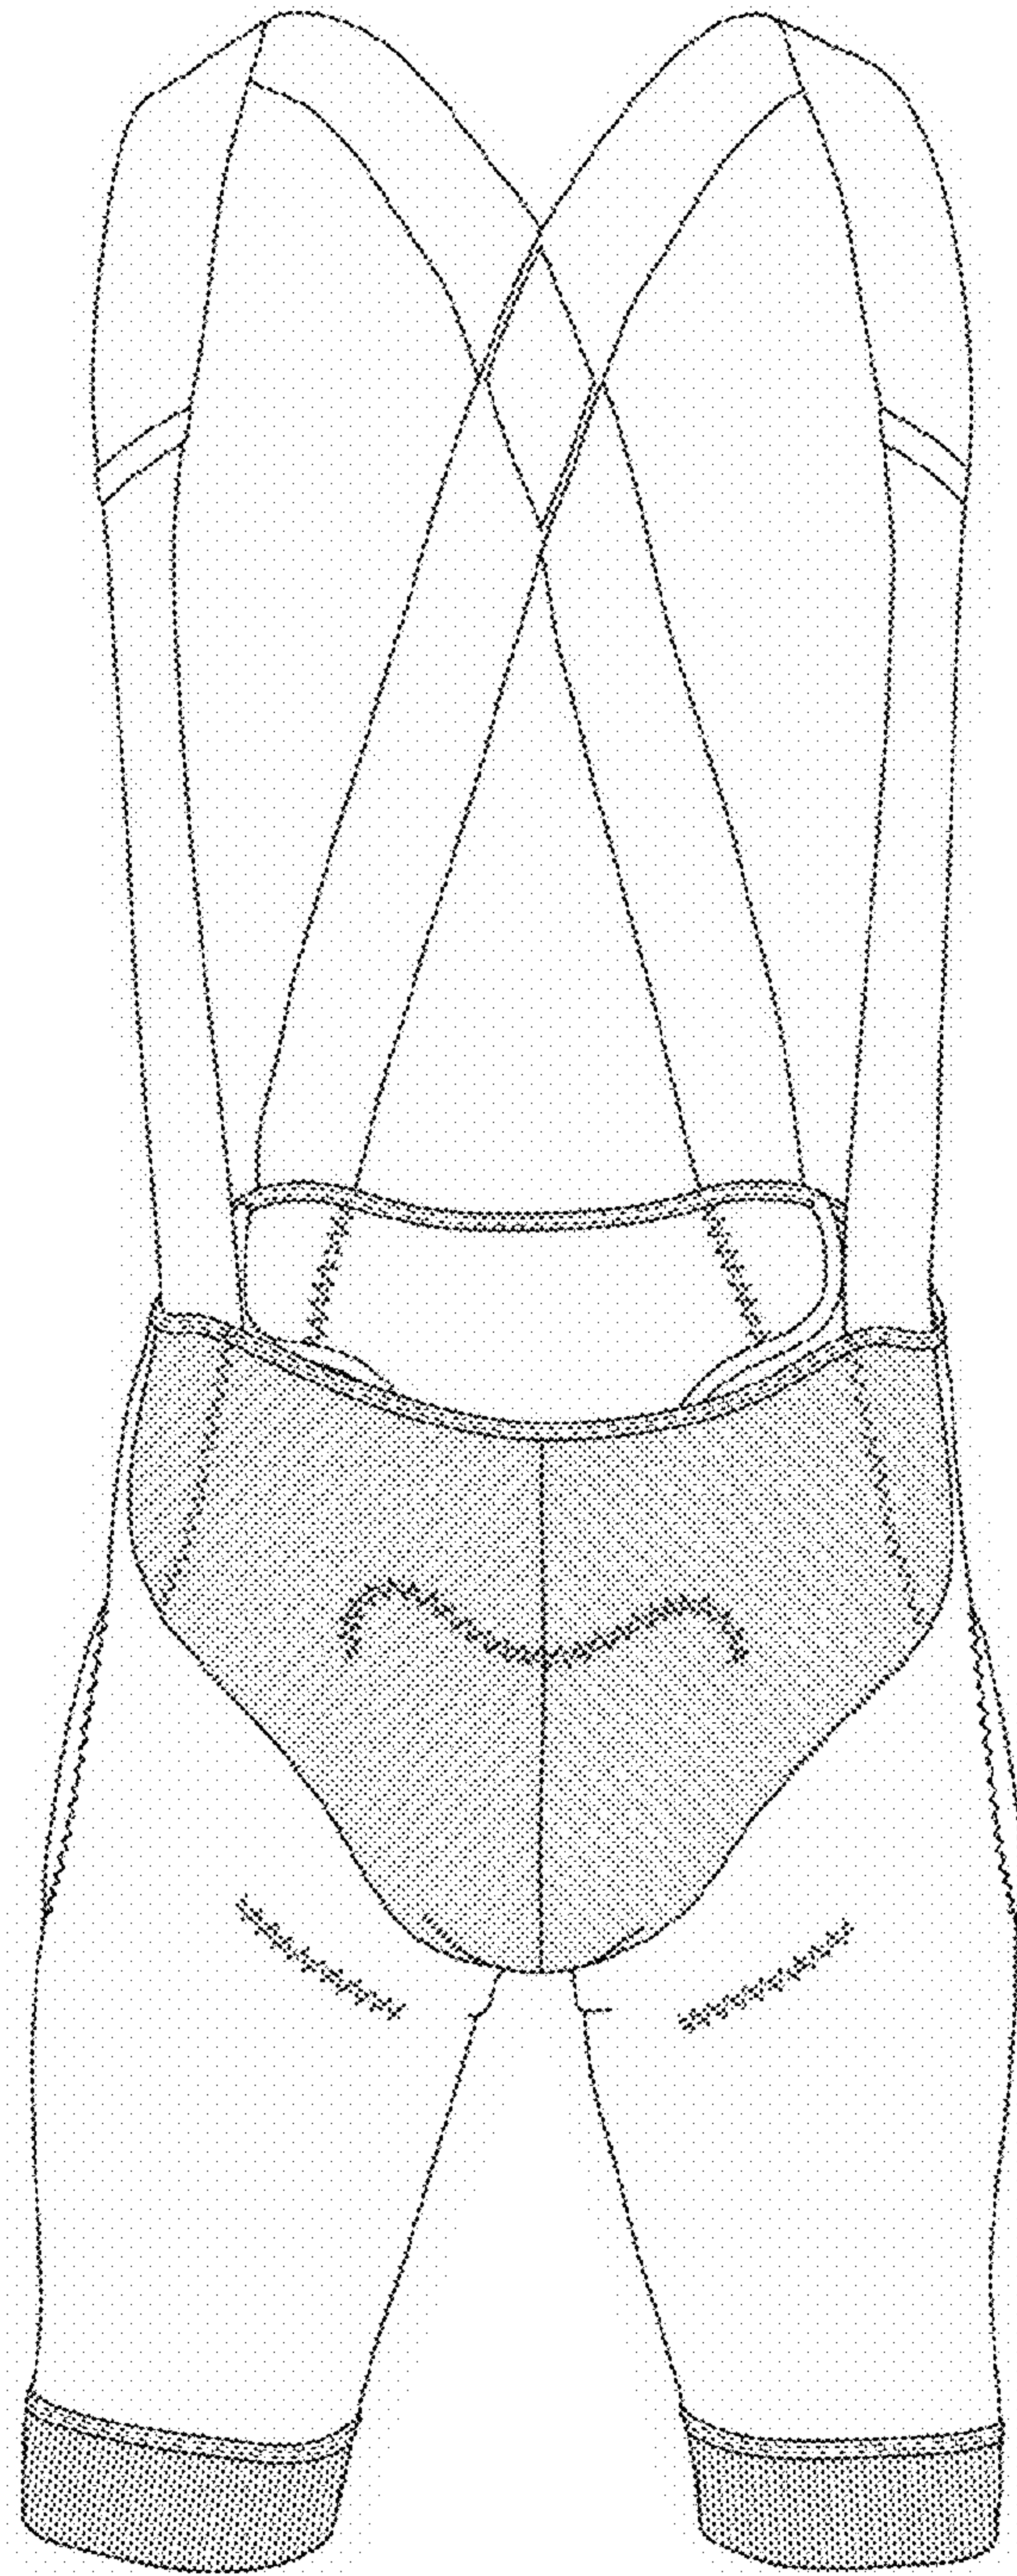

FIG. 1

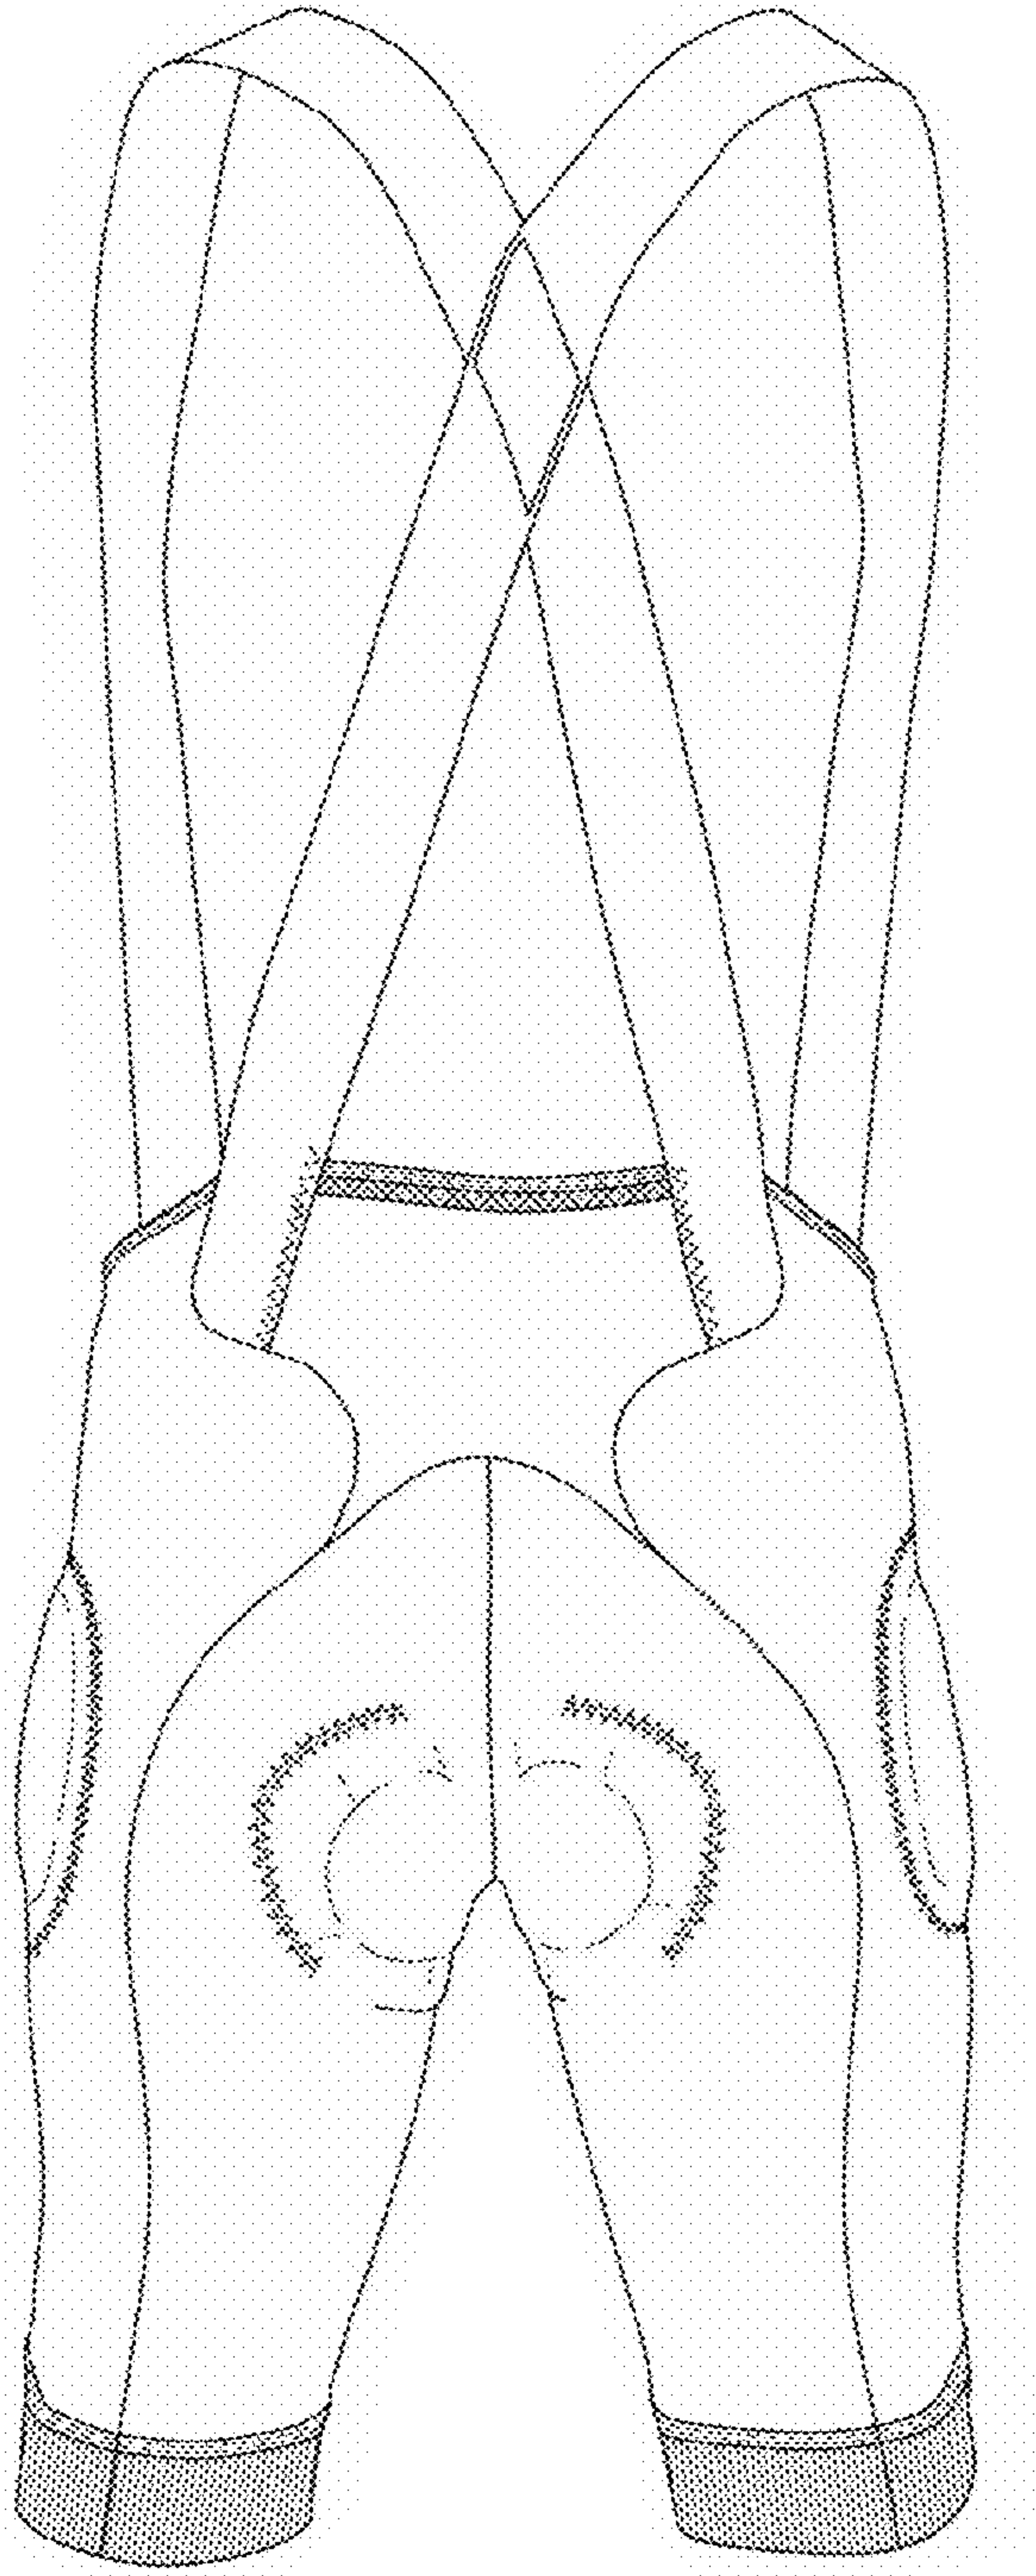

FIG. 2
