(57) **CLAIM**

The ornamental design for an adjustable, multi-position support device for electronic devices and handheld devices, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an adjustable, multi-position support device for electronic devices and handheld devices showing a new design, the rear view being a mirror image thereof; FIG. 2 is a right side view of the adjustable, multi-position support device of FIG. 1, the left side view being a mirror image thereof; FIG. 3 is a top view of the adjustable, multi-position support device of FIG. 1, the bottom view being a mirror image thereof; FIG. 4 is a perspective, front and right side view thereof, wherein the support device is in a relaxed position; FIG. 5 is an environmental, perspective, left side view thereof, wherein the support device is in a first use position; FIG. 6 is an environmental, perspective, right side view thereof, wherein the support device is in the first use position; FIG. 7 is an environmental, perspective, front view thereof, wherein the support device is in a second use position; and, FIG. 8 is an environmental, perspective, rear view thereof, wherein the support device is in the second use position. The broken lines shown in the drawing views are included for illustrative purposes only, and form no part of the claimed design.
