(57) **CLAIM**

The design of a spherical stylus, as illustrated and described.

DESCRIPTION

FIG. 1 is a front view of a spherical stylus showing the design; and,
FIG. 2 is a reference view showing an environment in which the spherical stylus can be used.
Back, right, left, top and bottom views are omitted as they are identical to the front view.
The broken lines in the drawings are intended to show use of the spherical stylus and form no part of the claimed design.
The design of a spherical stylus for touch-operation on touch panels.
The main body of the sphere is provided with a plurality of protruding portions. The touch-operation is performed with these protruding portions. As shown in FIG. 2, it is possible to touch a display continuously by rolling over the spherical stylus on touch panels with a palm pressed thereon.

1 Claim, 2 Drawing Sheets

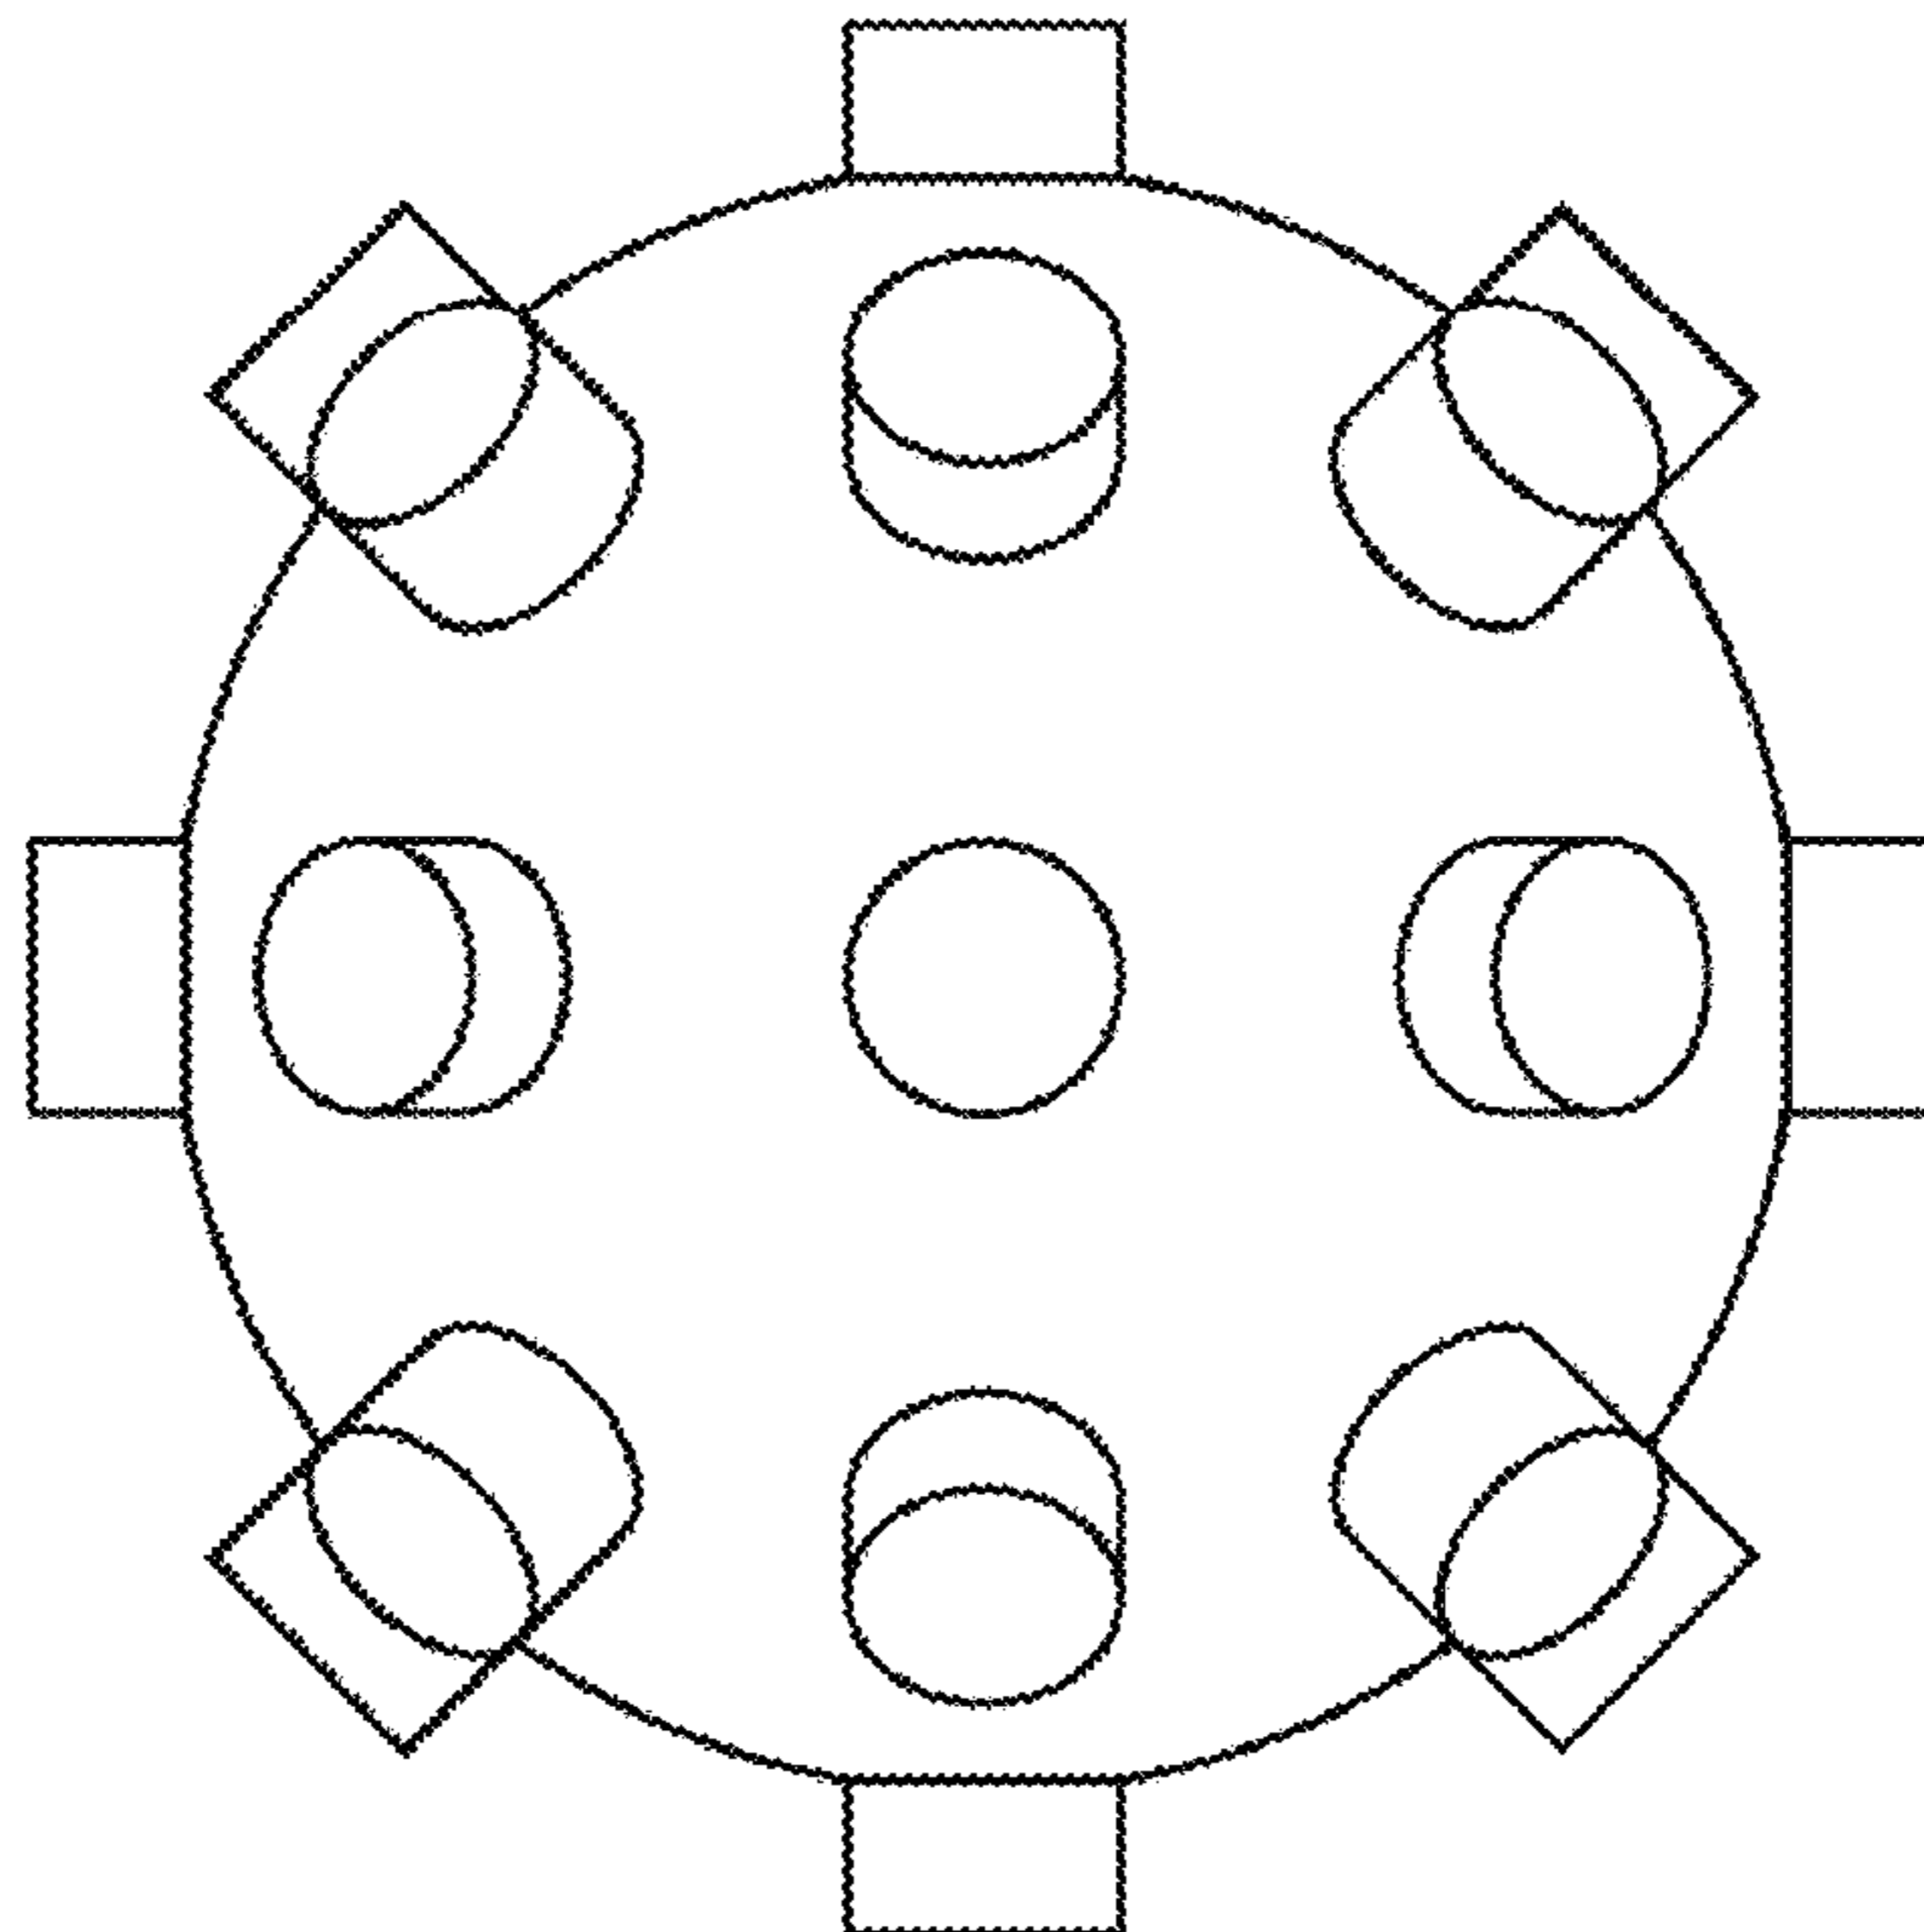

FIG. 1

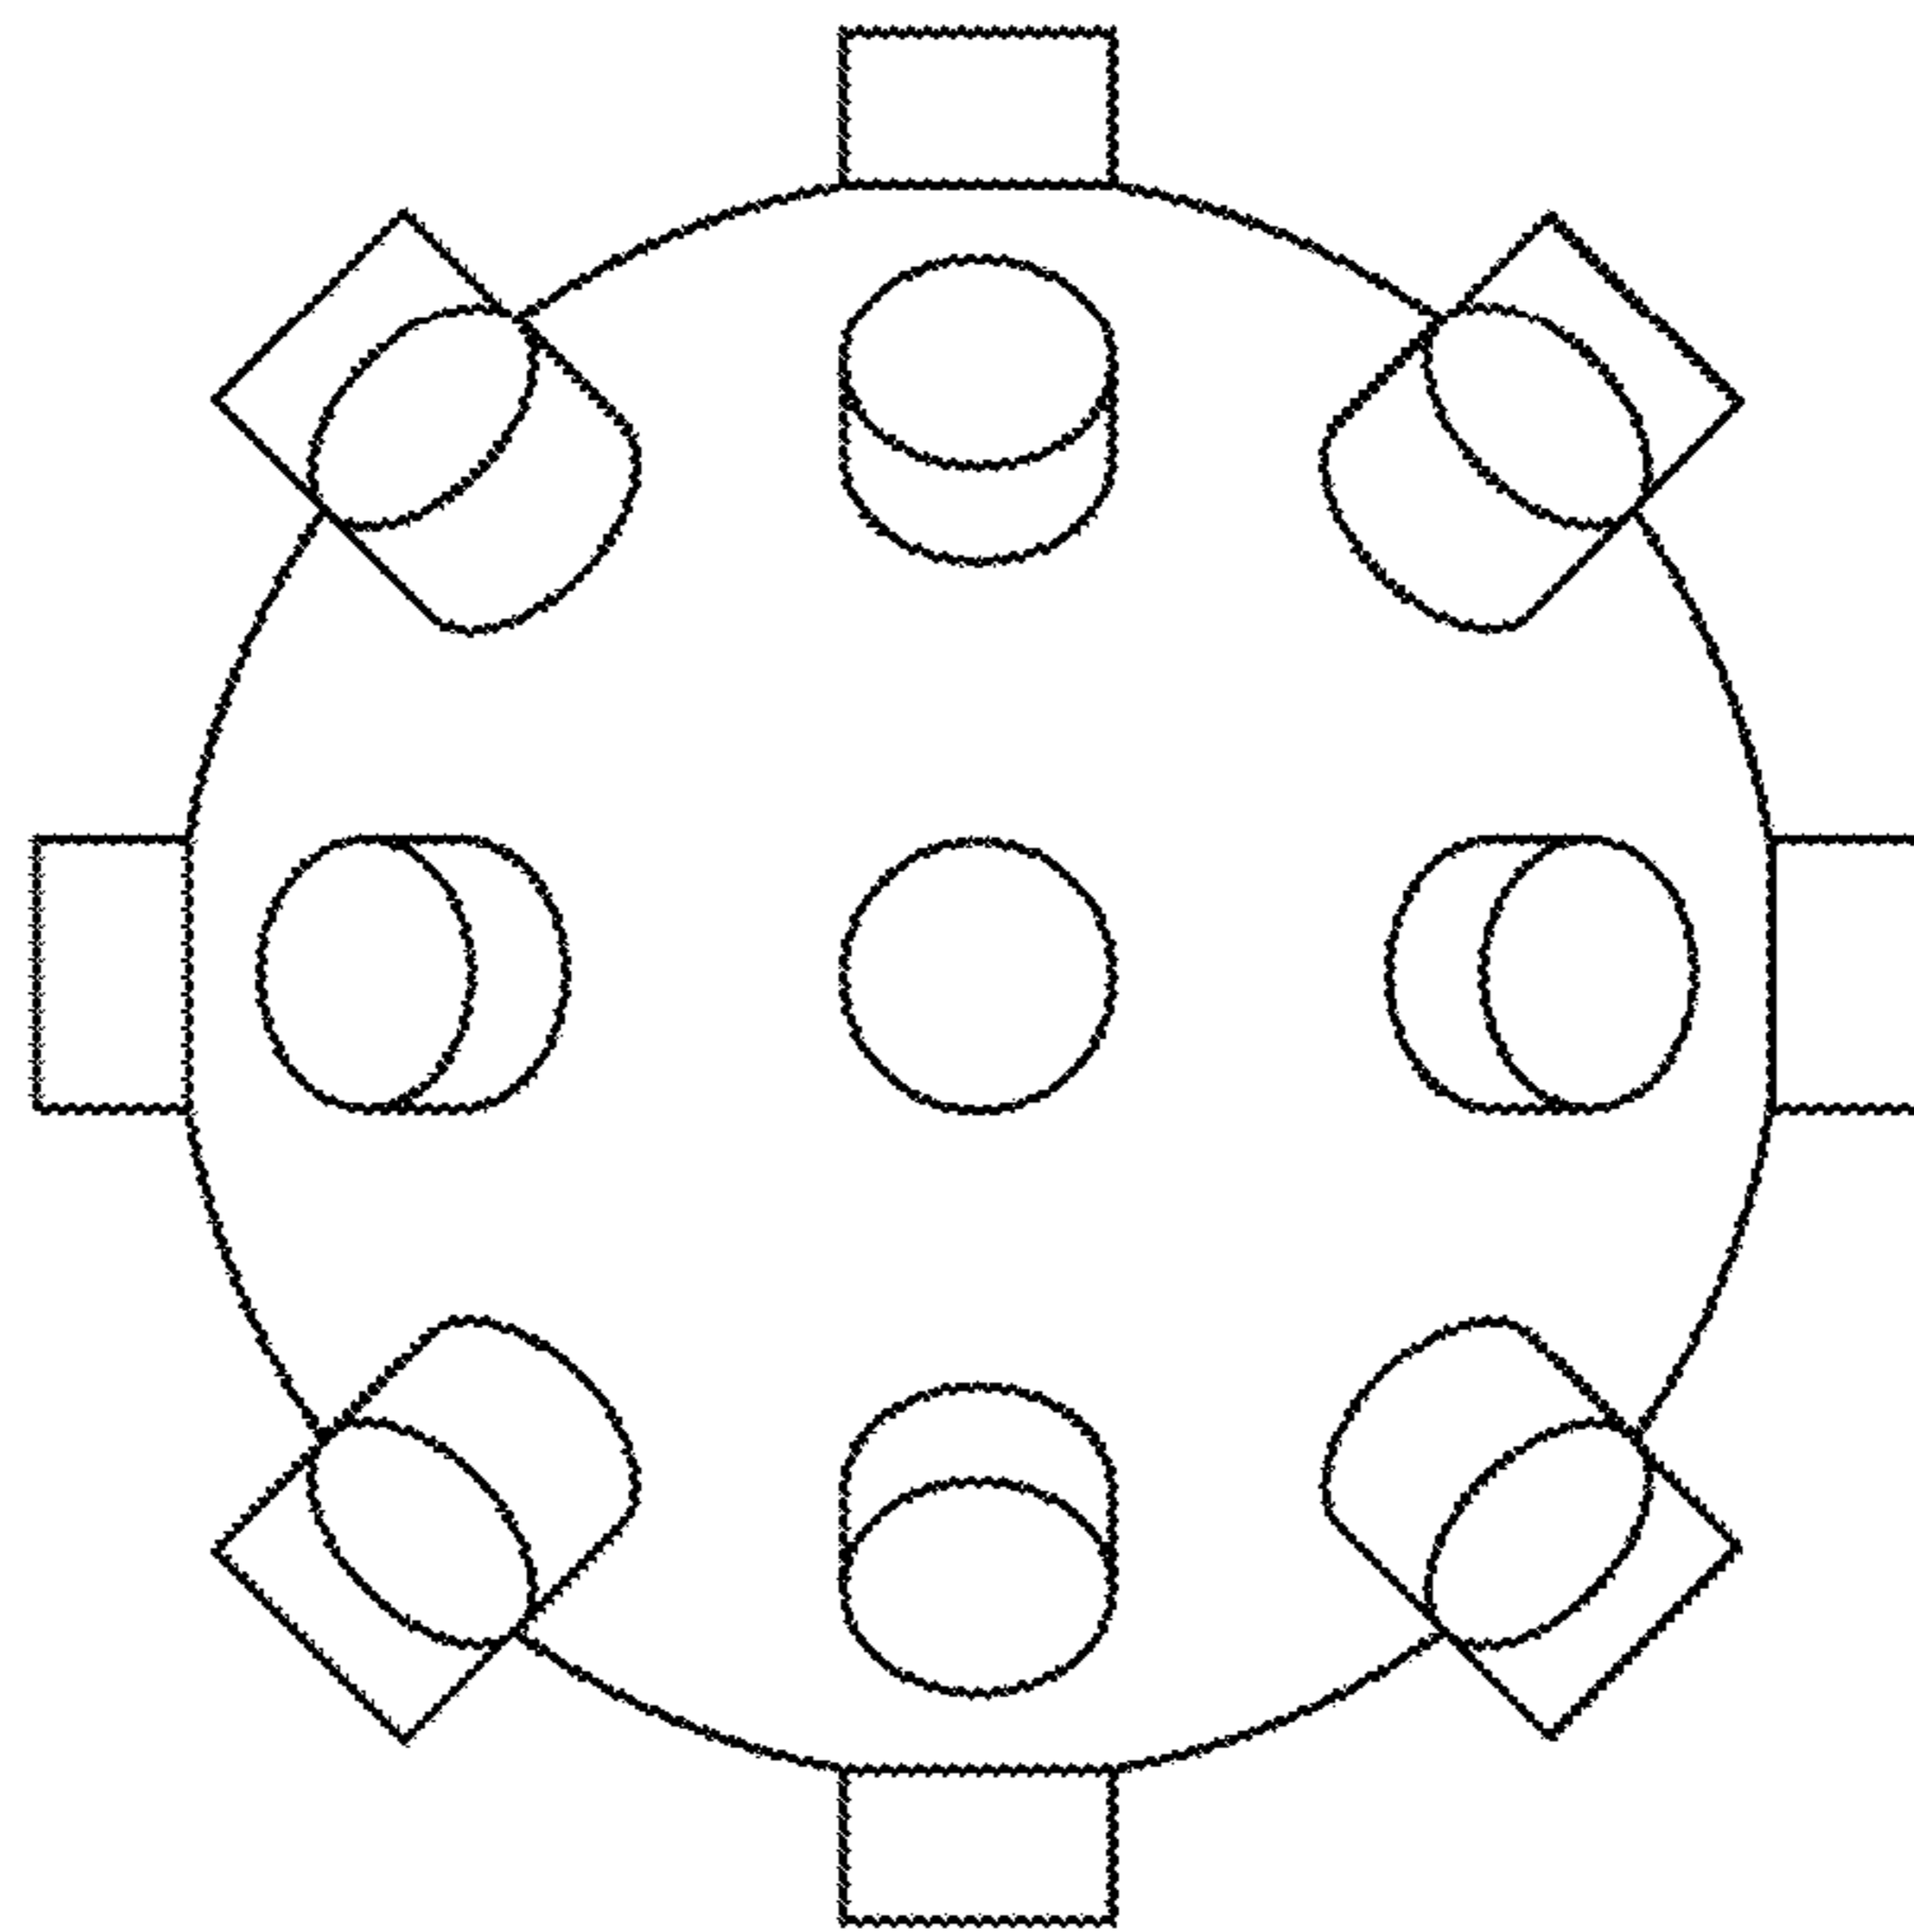

FIG. 2
