(57) **CLAIM**

The ornamental design for a display screen with graphical user interface window, as shown and described.

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen, or portion thereof, with graphical user interface window in accordance with an embodiment of the new design.

FIG. 2 is a front view of a second embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

FIG. 3 is a front view of a third embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

FIG. 4 is a front view of a fourth embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

FIG. 5 is a front view of a fifth embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

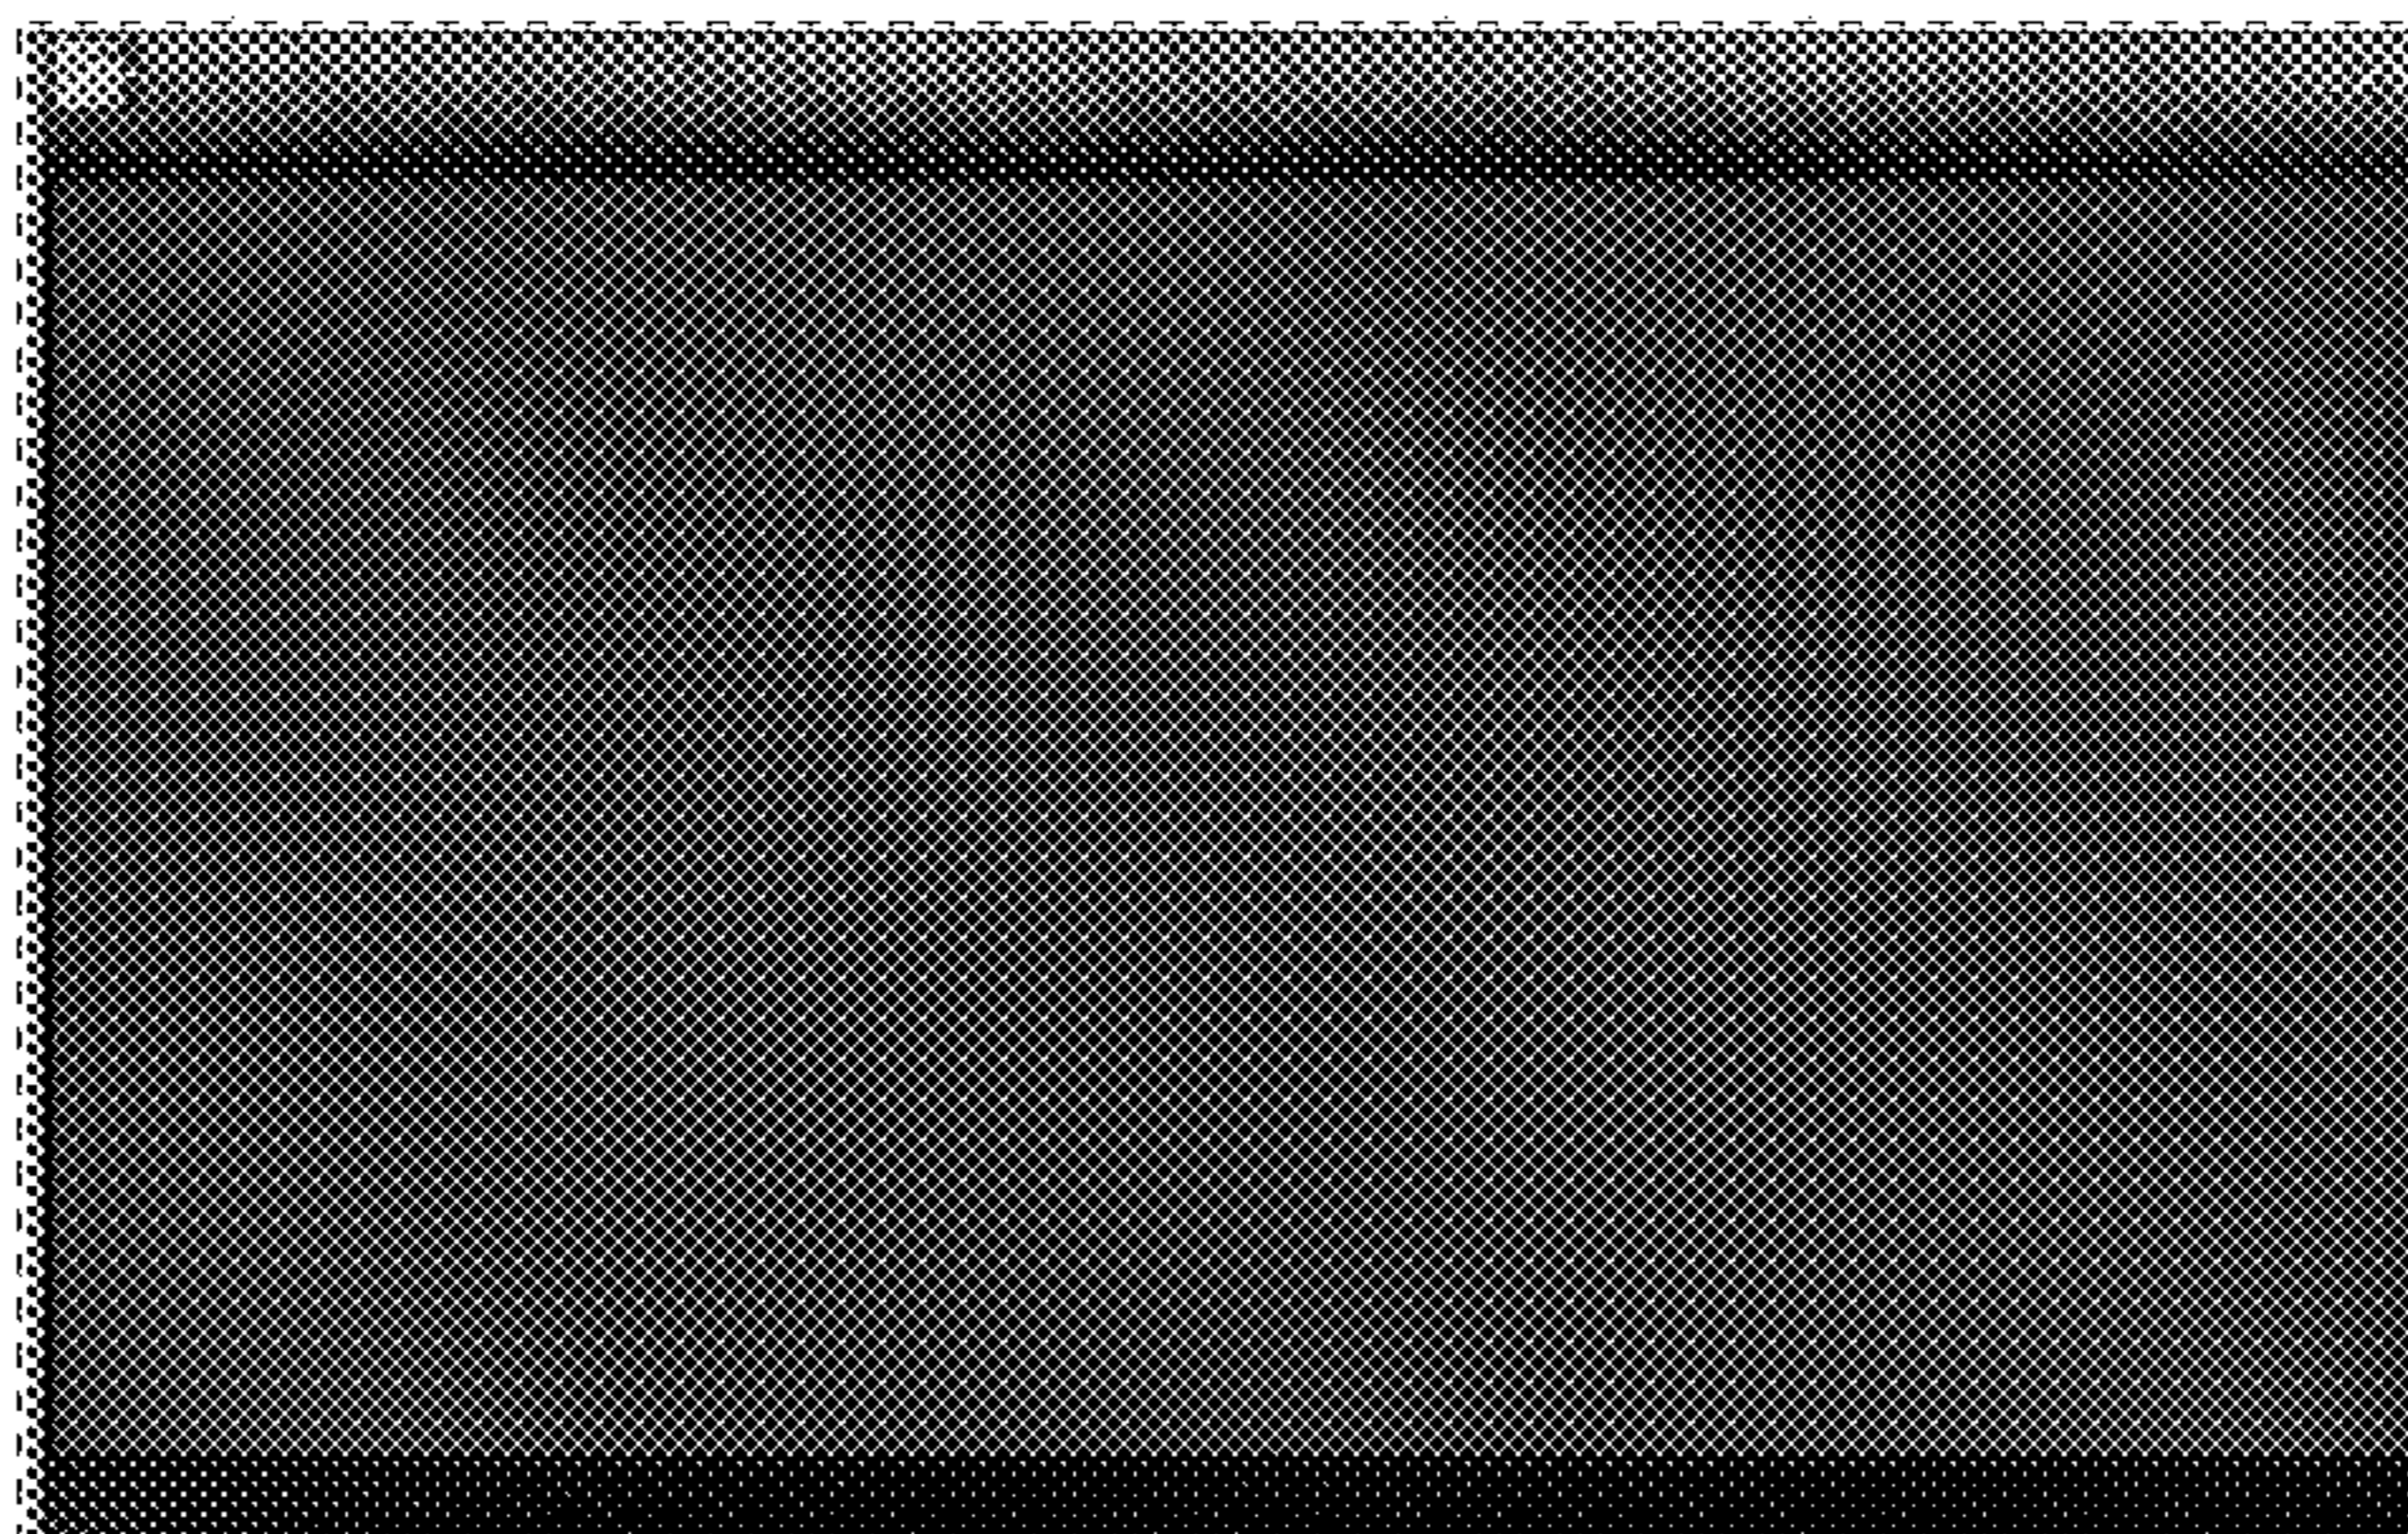

FIG. 6 is a front view of a sixth embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

FIG. 7 is a front view of a seventh embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color; and,

FIG. 8 is a front view of an eighth embodiment thereof, wherein both the ornamental side-bar at the left side of the window and the graphical icon on the upper-left corner of the window are the same color.

The broken lines in all views represent the boundary lines of the claimed design within a computer display screen. The portion of a computer display screen outside the broken lines forms no part of the claimed design.
