(57) **CLAIM**

We claim the ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material that is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the United States Patent and Trademark Office patent files or records, but otherwise reserves all copyright rights whatsoever.

FIG. 1 is a first view of a display screen with graphical user interface;

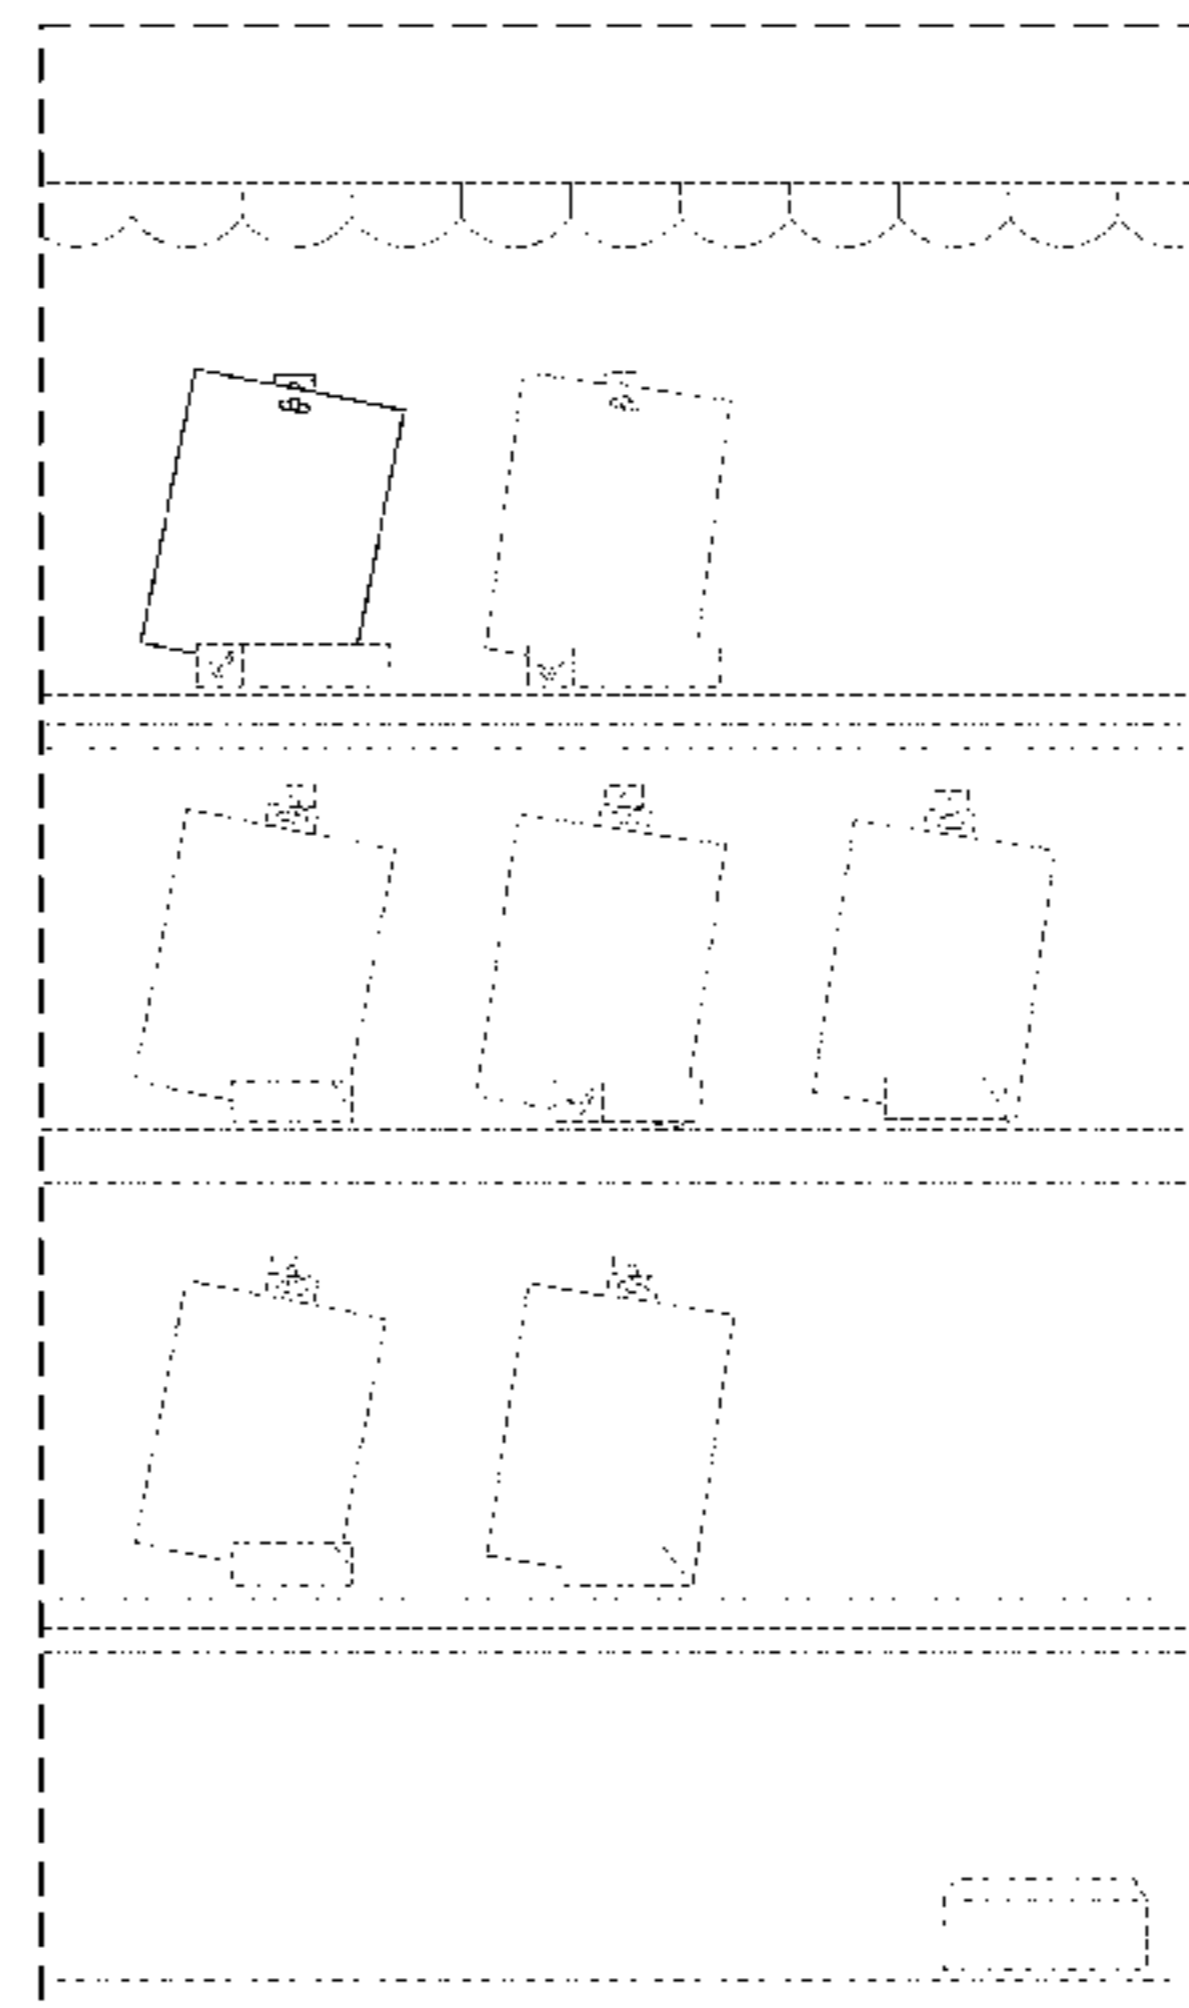

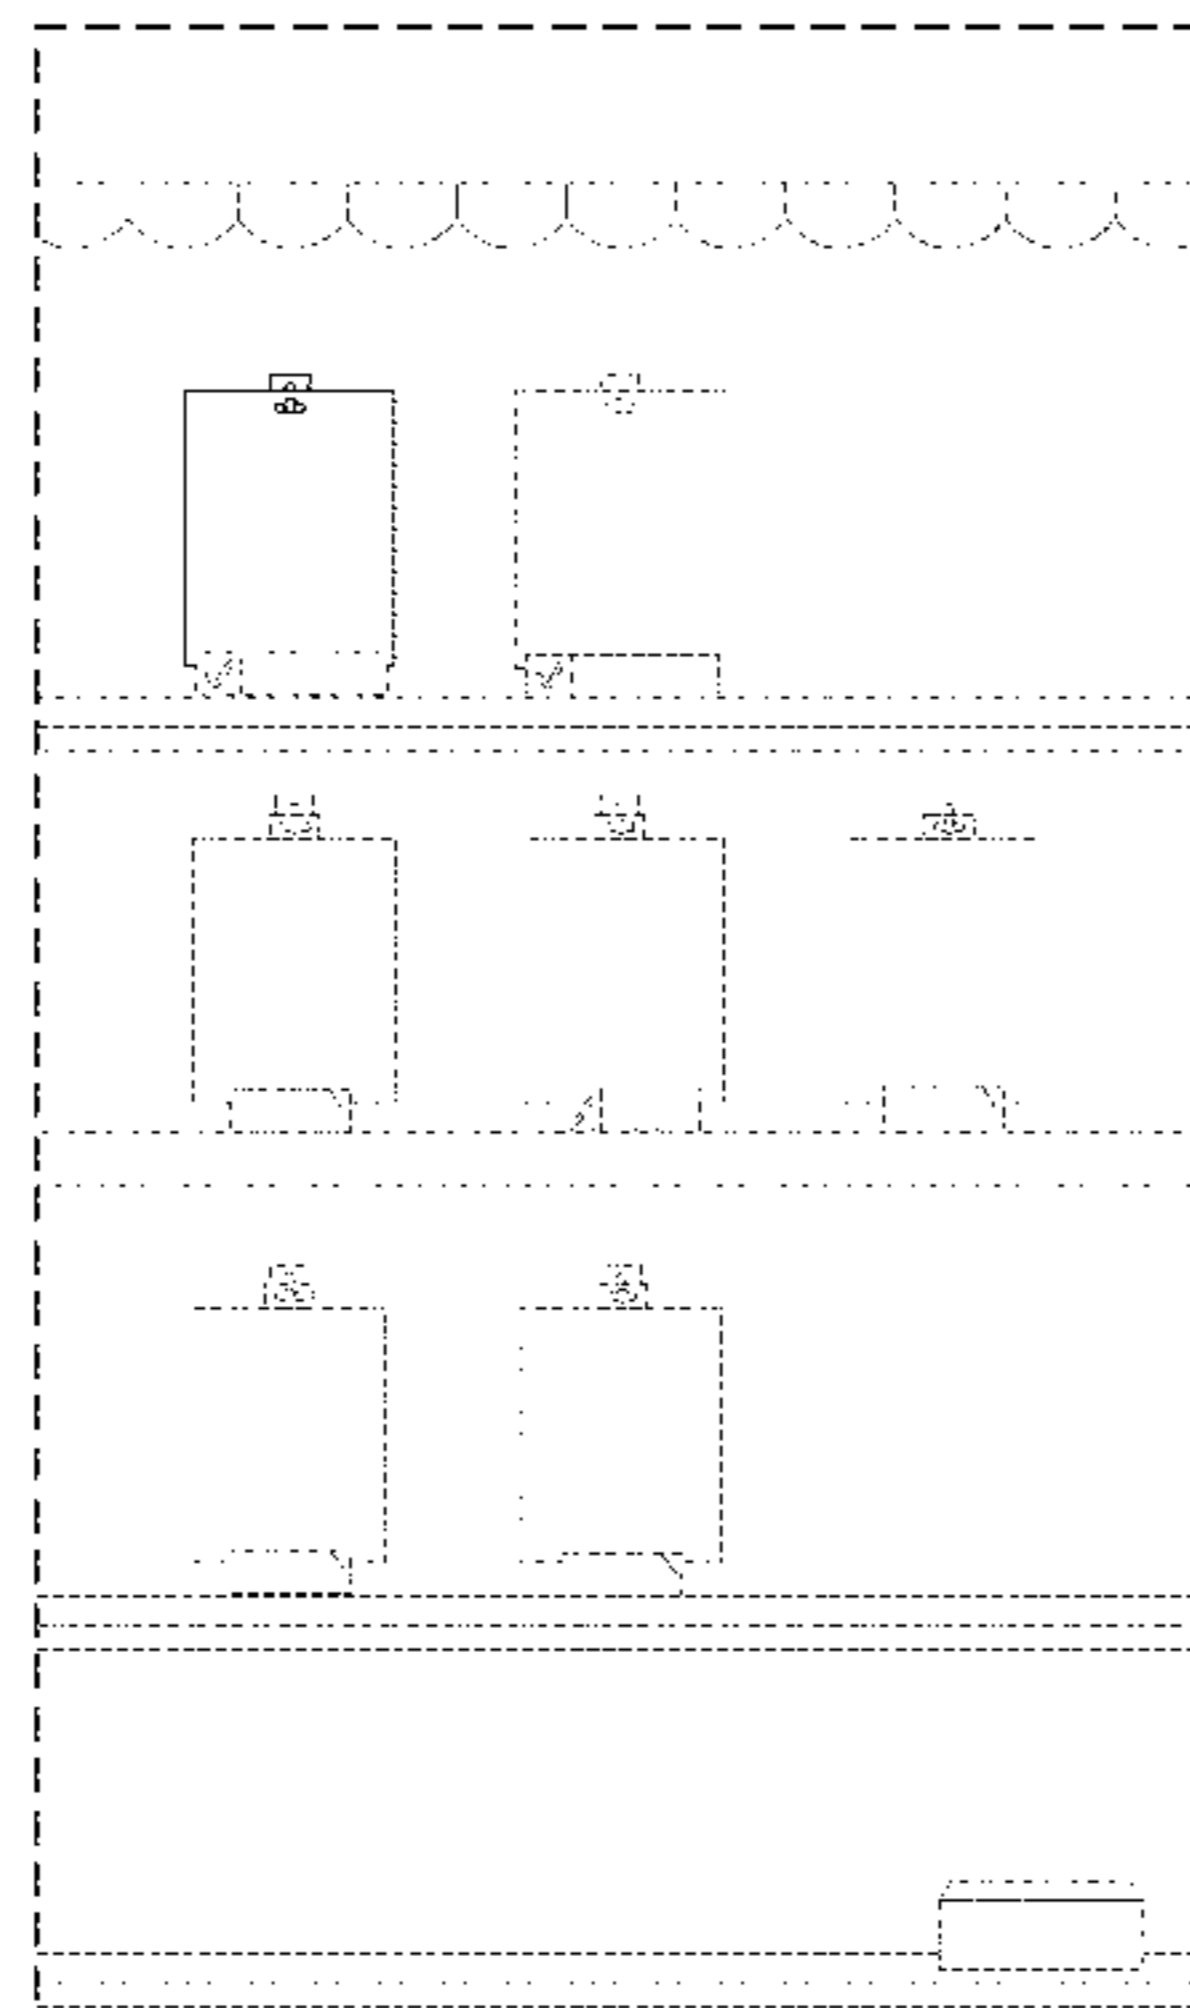

FIG. 2 is a second view thereof; and,

FIG. 3 is a third view thereof.

The appearance of the graphical user interface sequentially transitions between the separate views shown in FIGS. 1-3. In an alternate example, the appearance of the graphical user interface sequentially transitions in reverse order between the separate views shown in FIGS. 1-3. The process or period in which a view transitions to another view forms no part of the claimed design.

The broken lines showing in a portion of a display screen, text and other elements in the Figures are for illustrative purposes only and form no part of the claimed design.
