(57) **CLAIM**

The ornamental design for a vehicle steering wheel display  
screen with an animated graphical user interface, as shown  
and described.

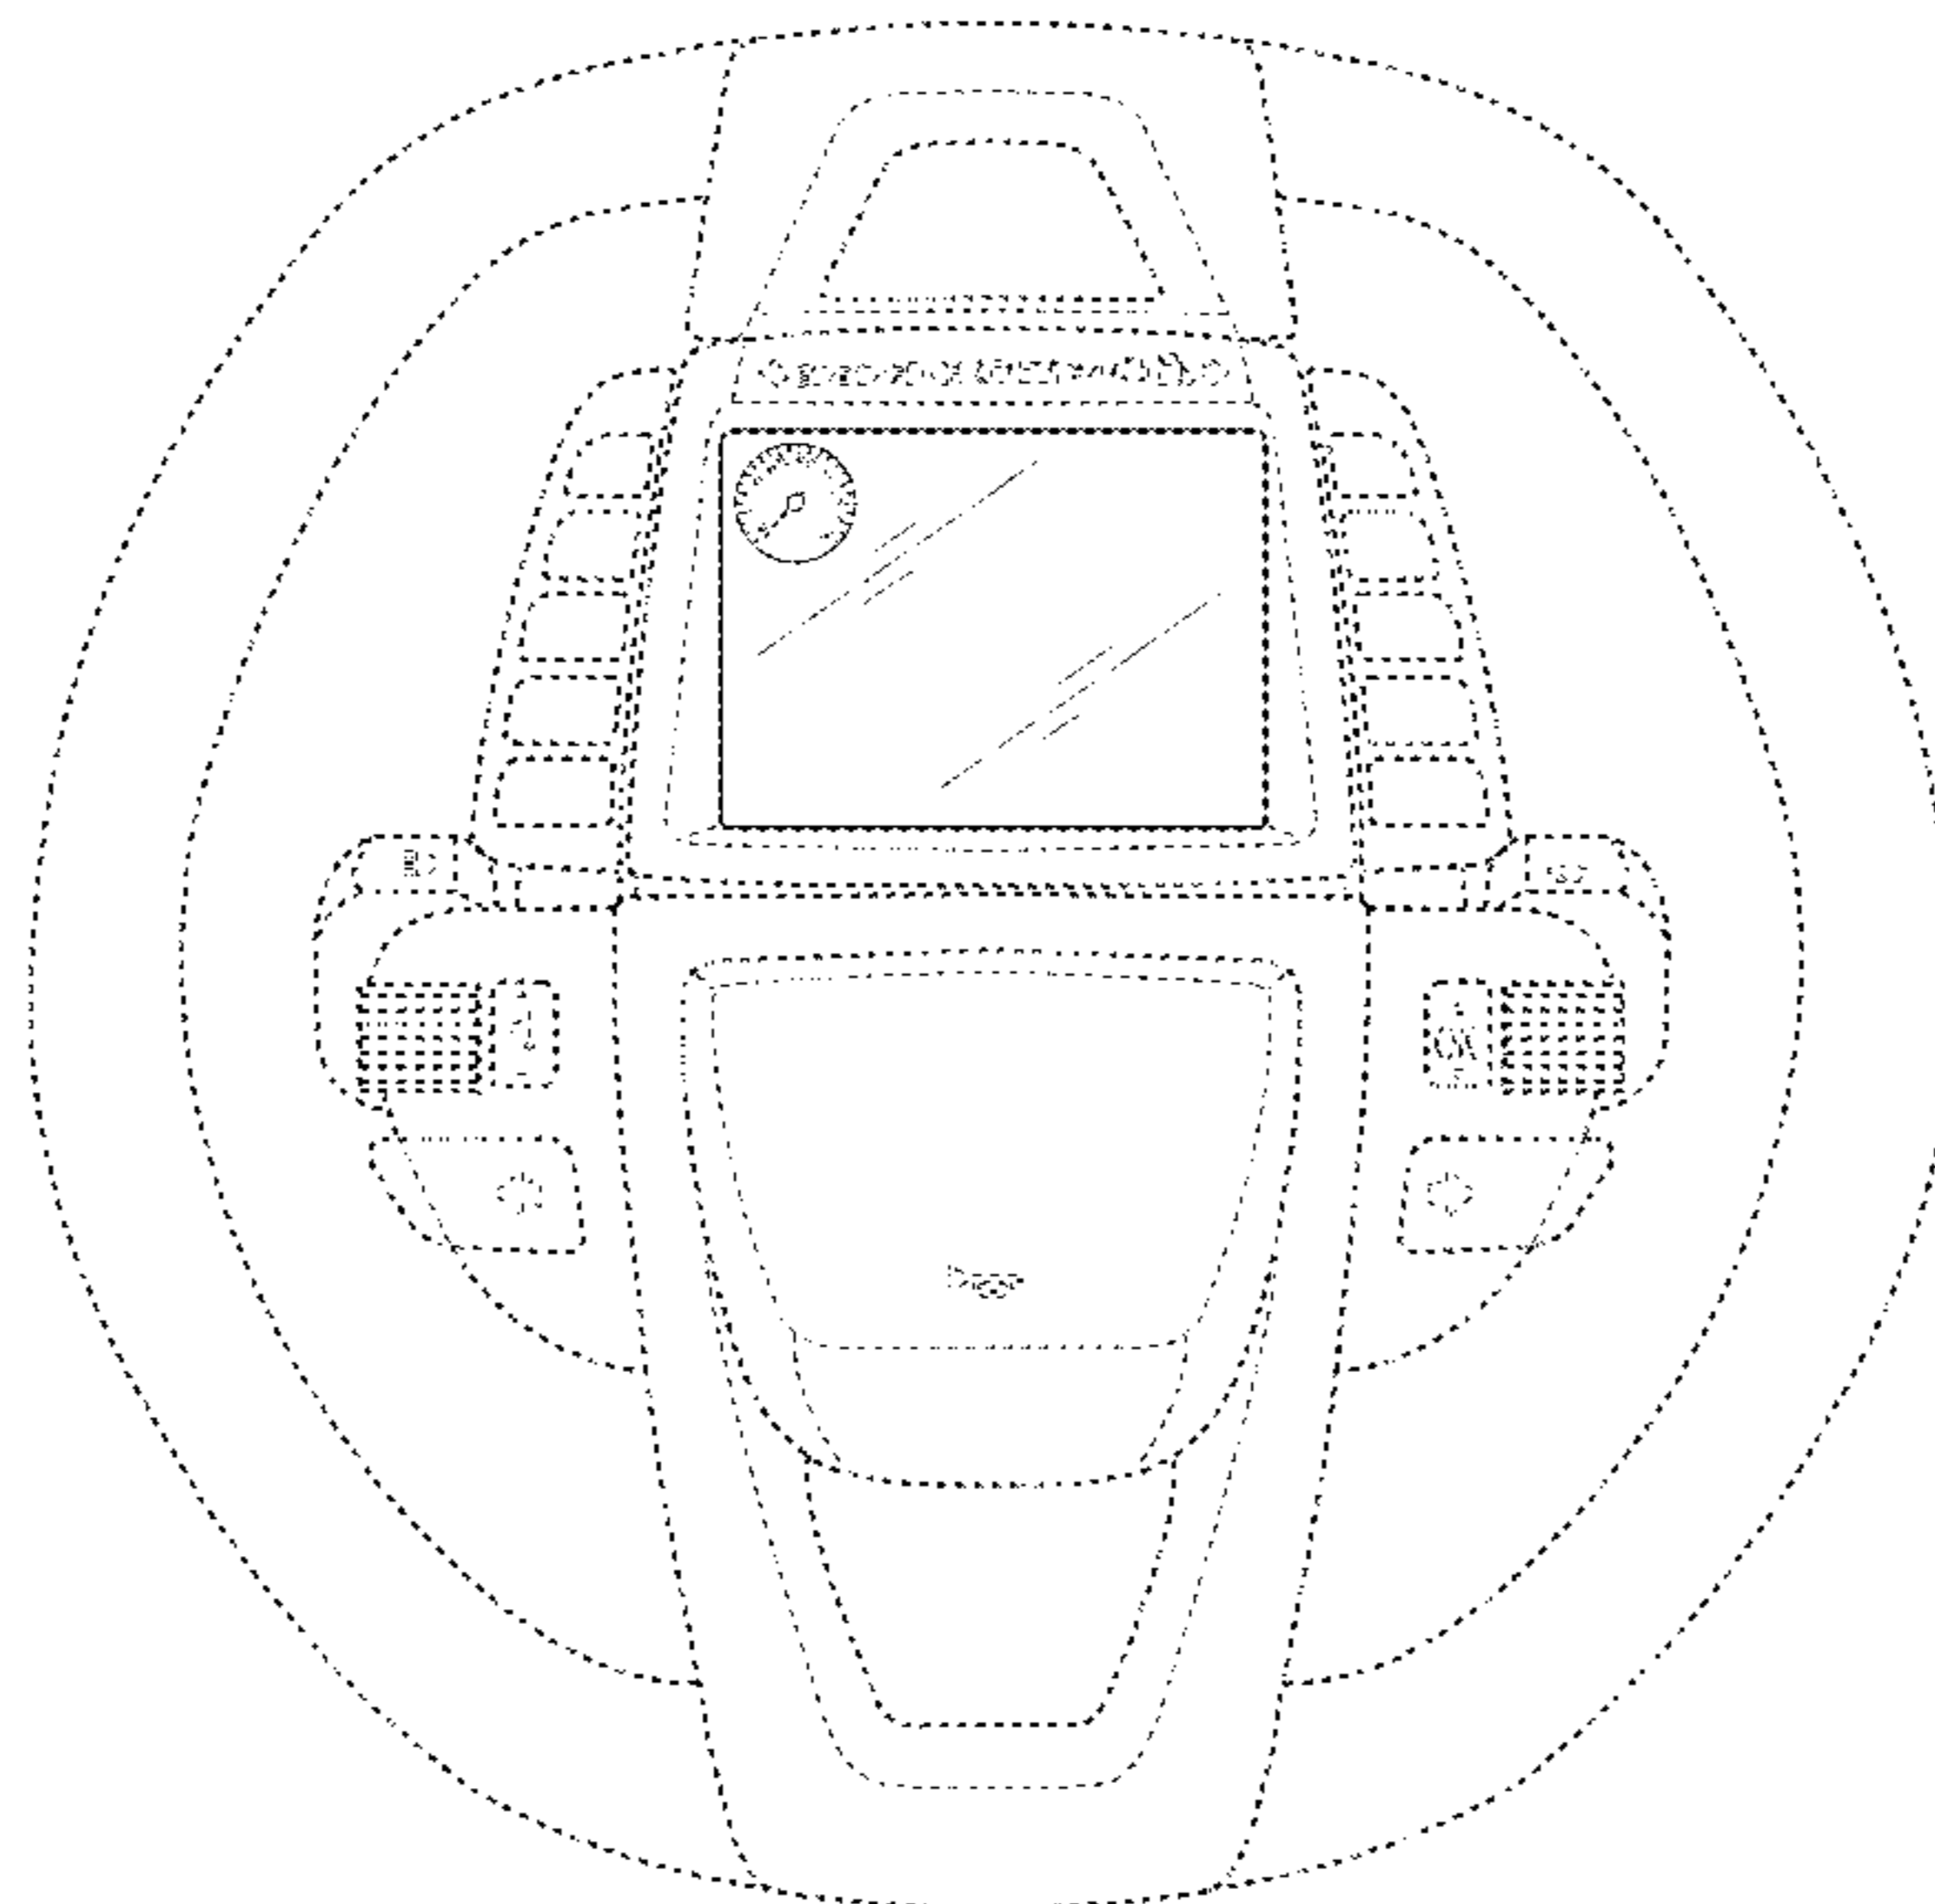

**DESCRIPTION**

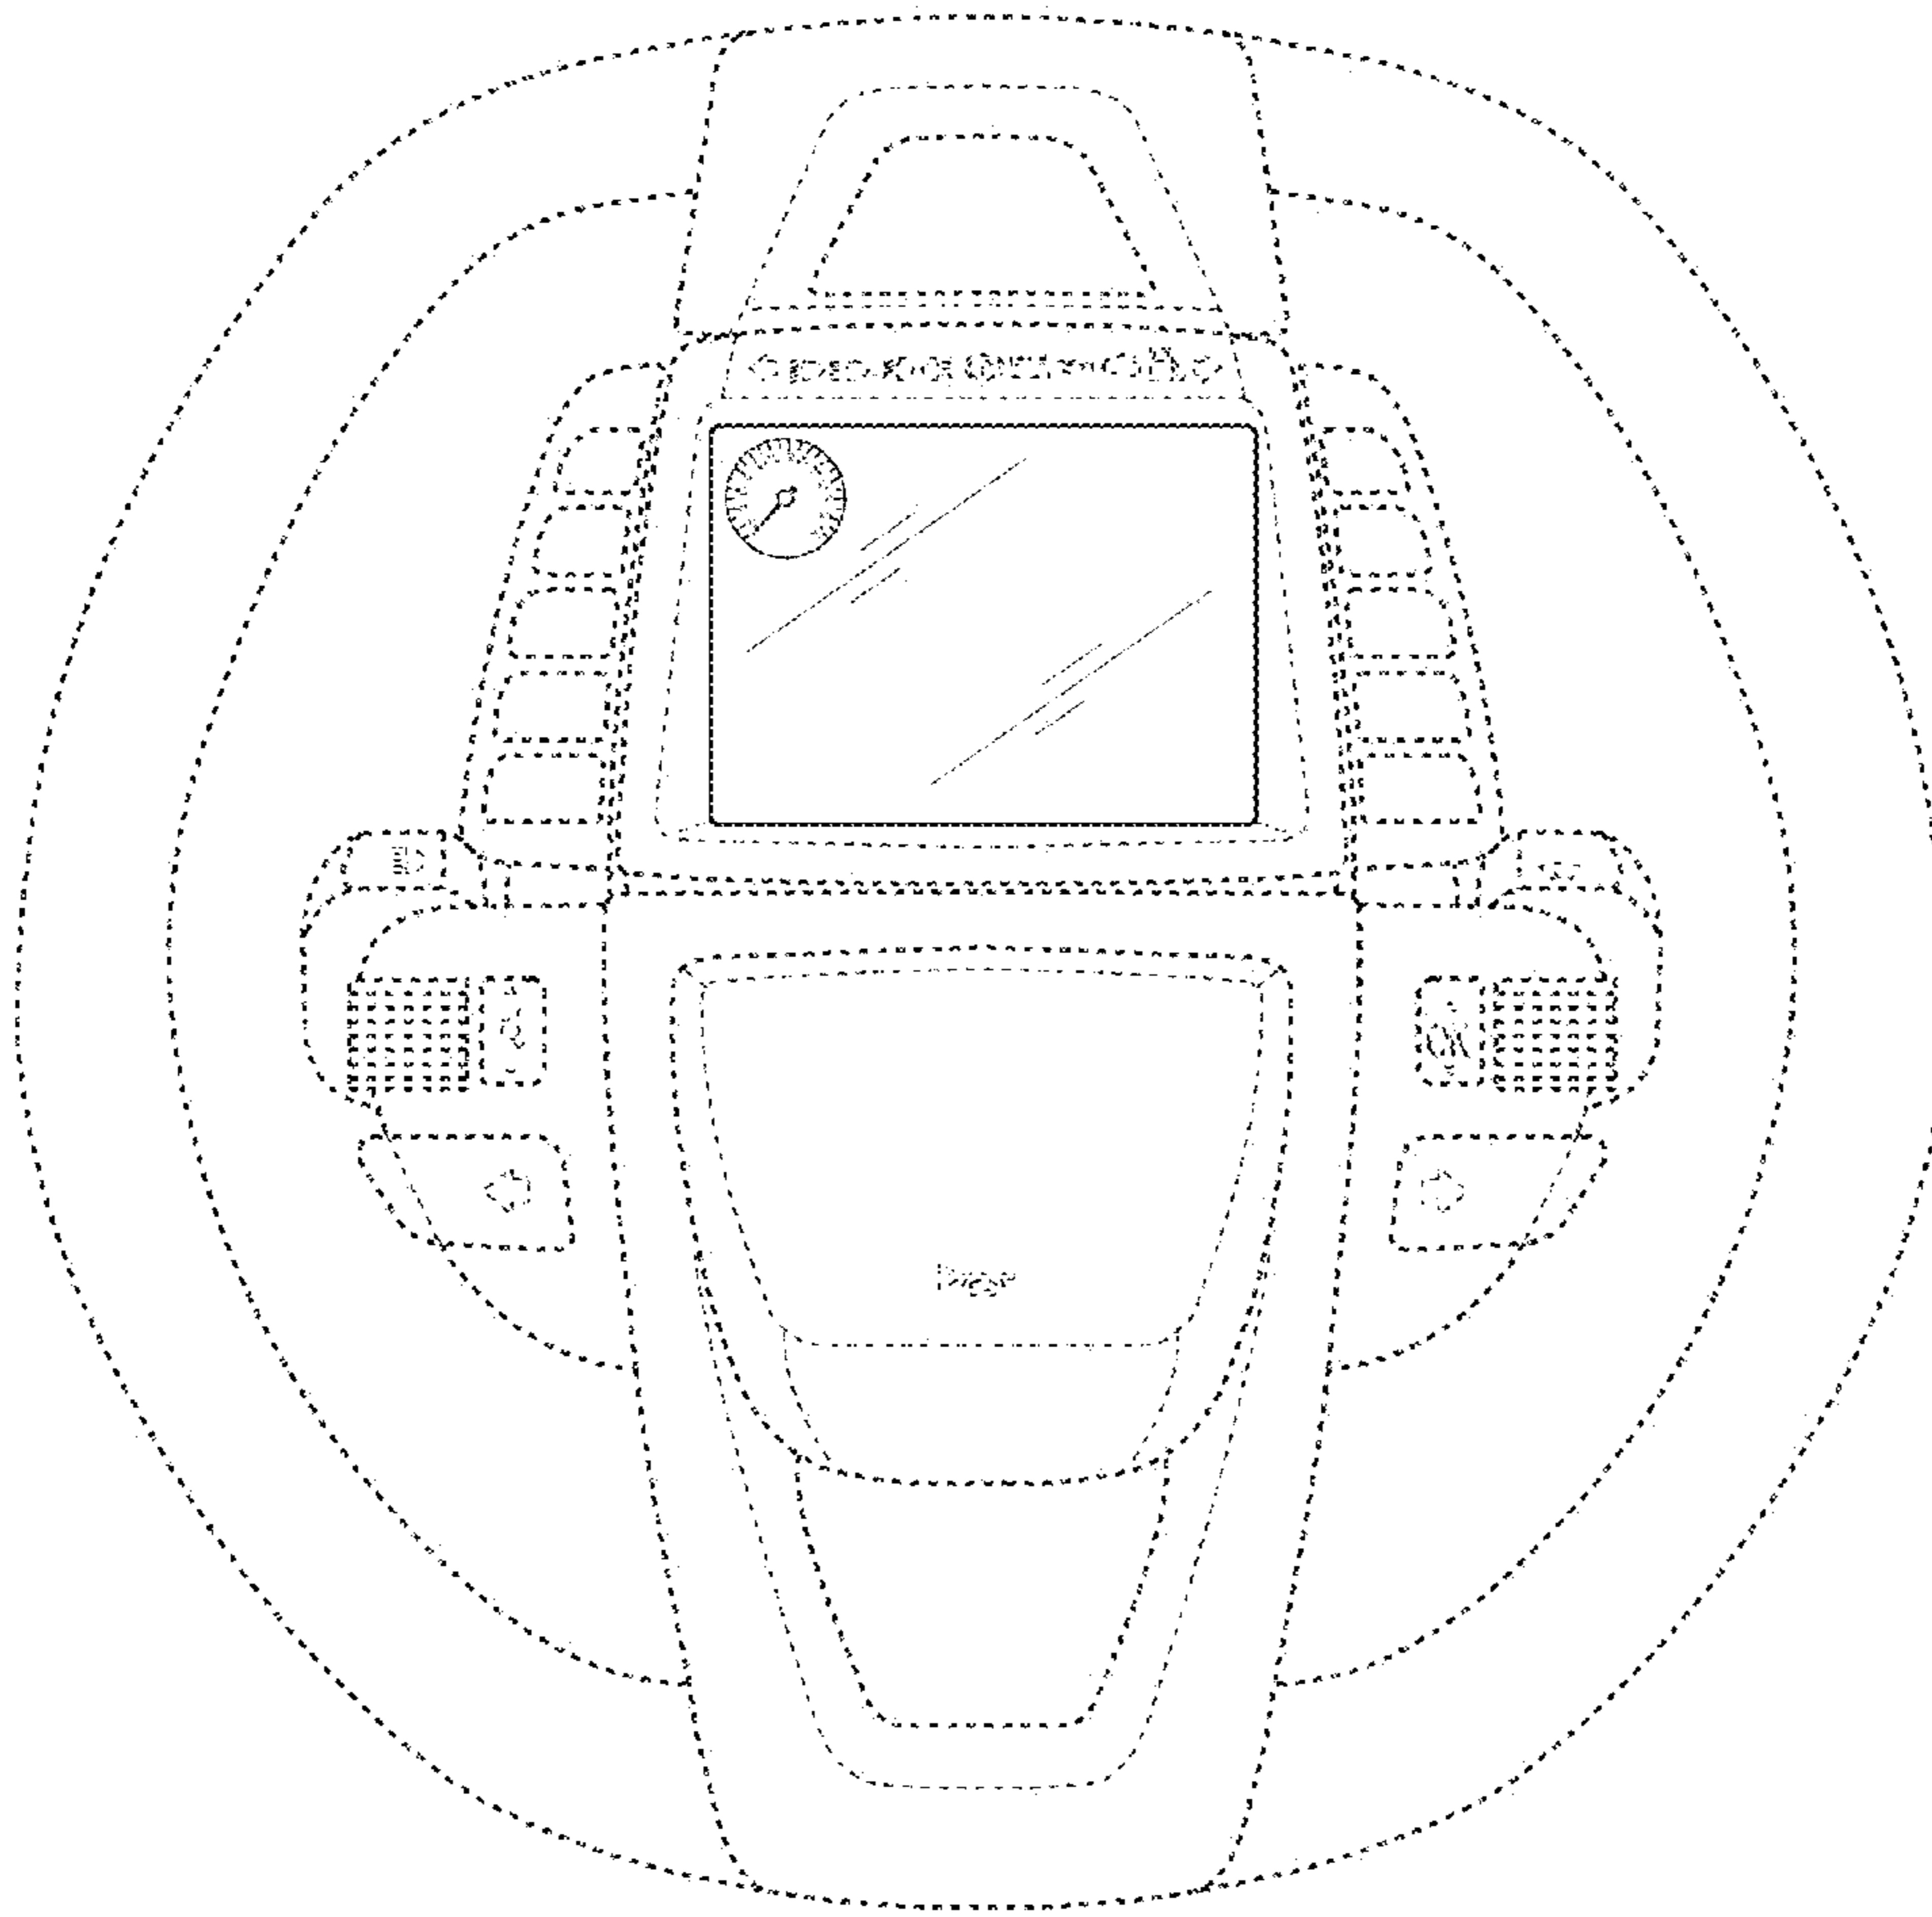

FIG. 1 is a front view of a vehicle steering wheel with a  
display screen with an animated graphical user interface  
showing a first image in the sequence showing our new  
design; and,

FIG. 2 is a second image thereof.

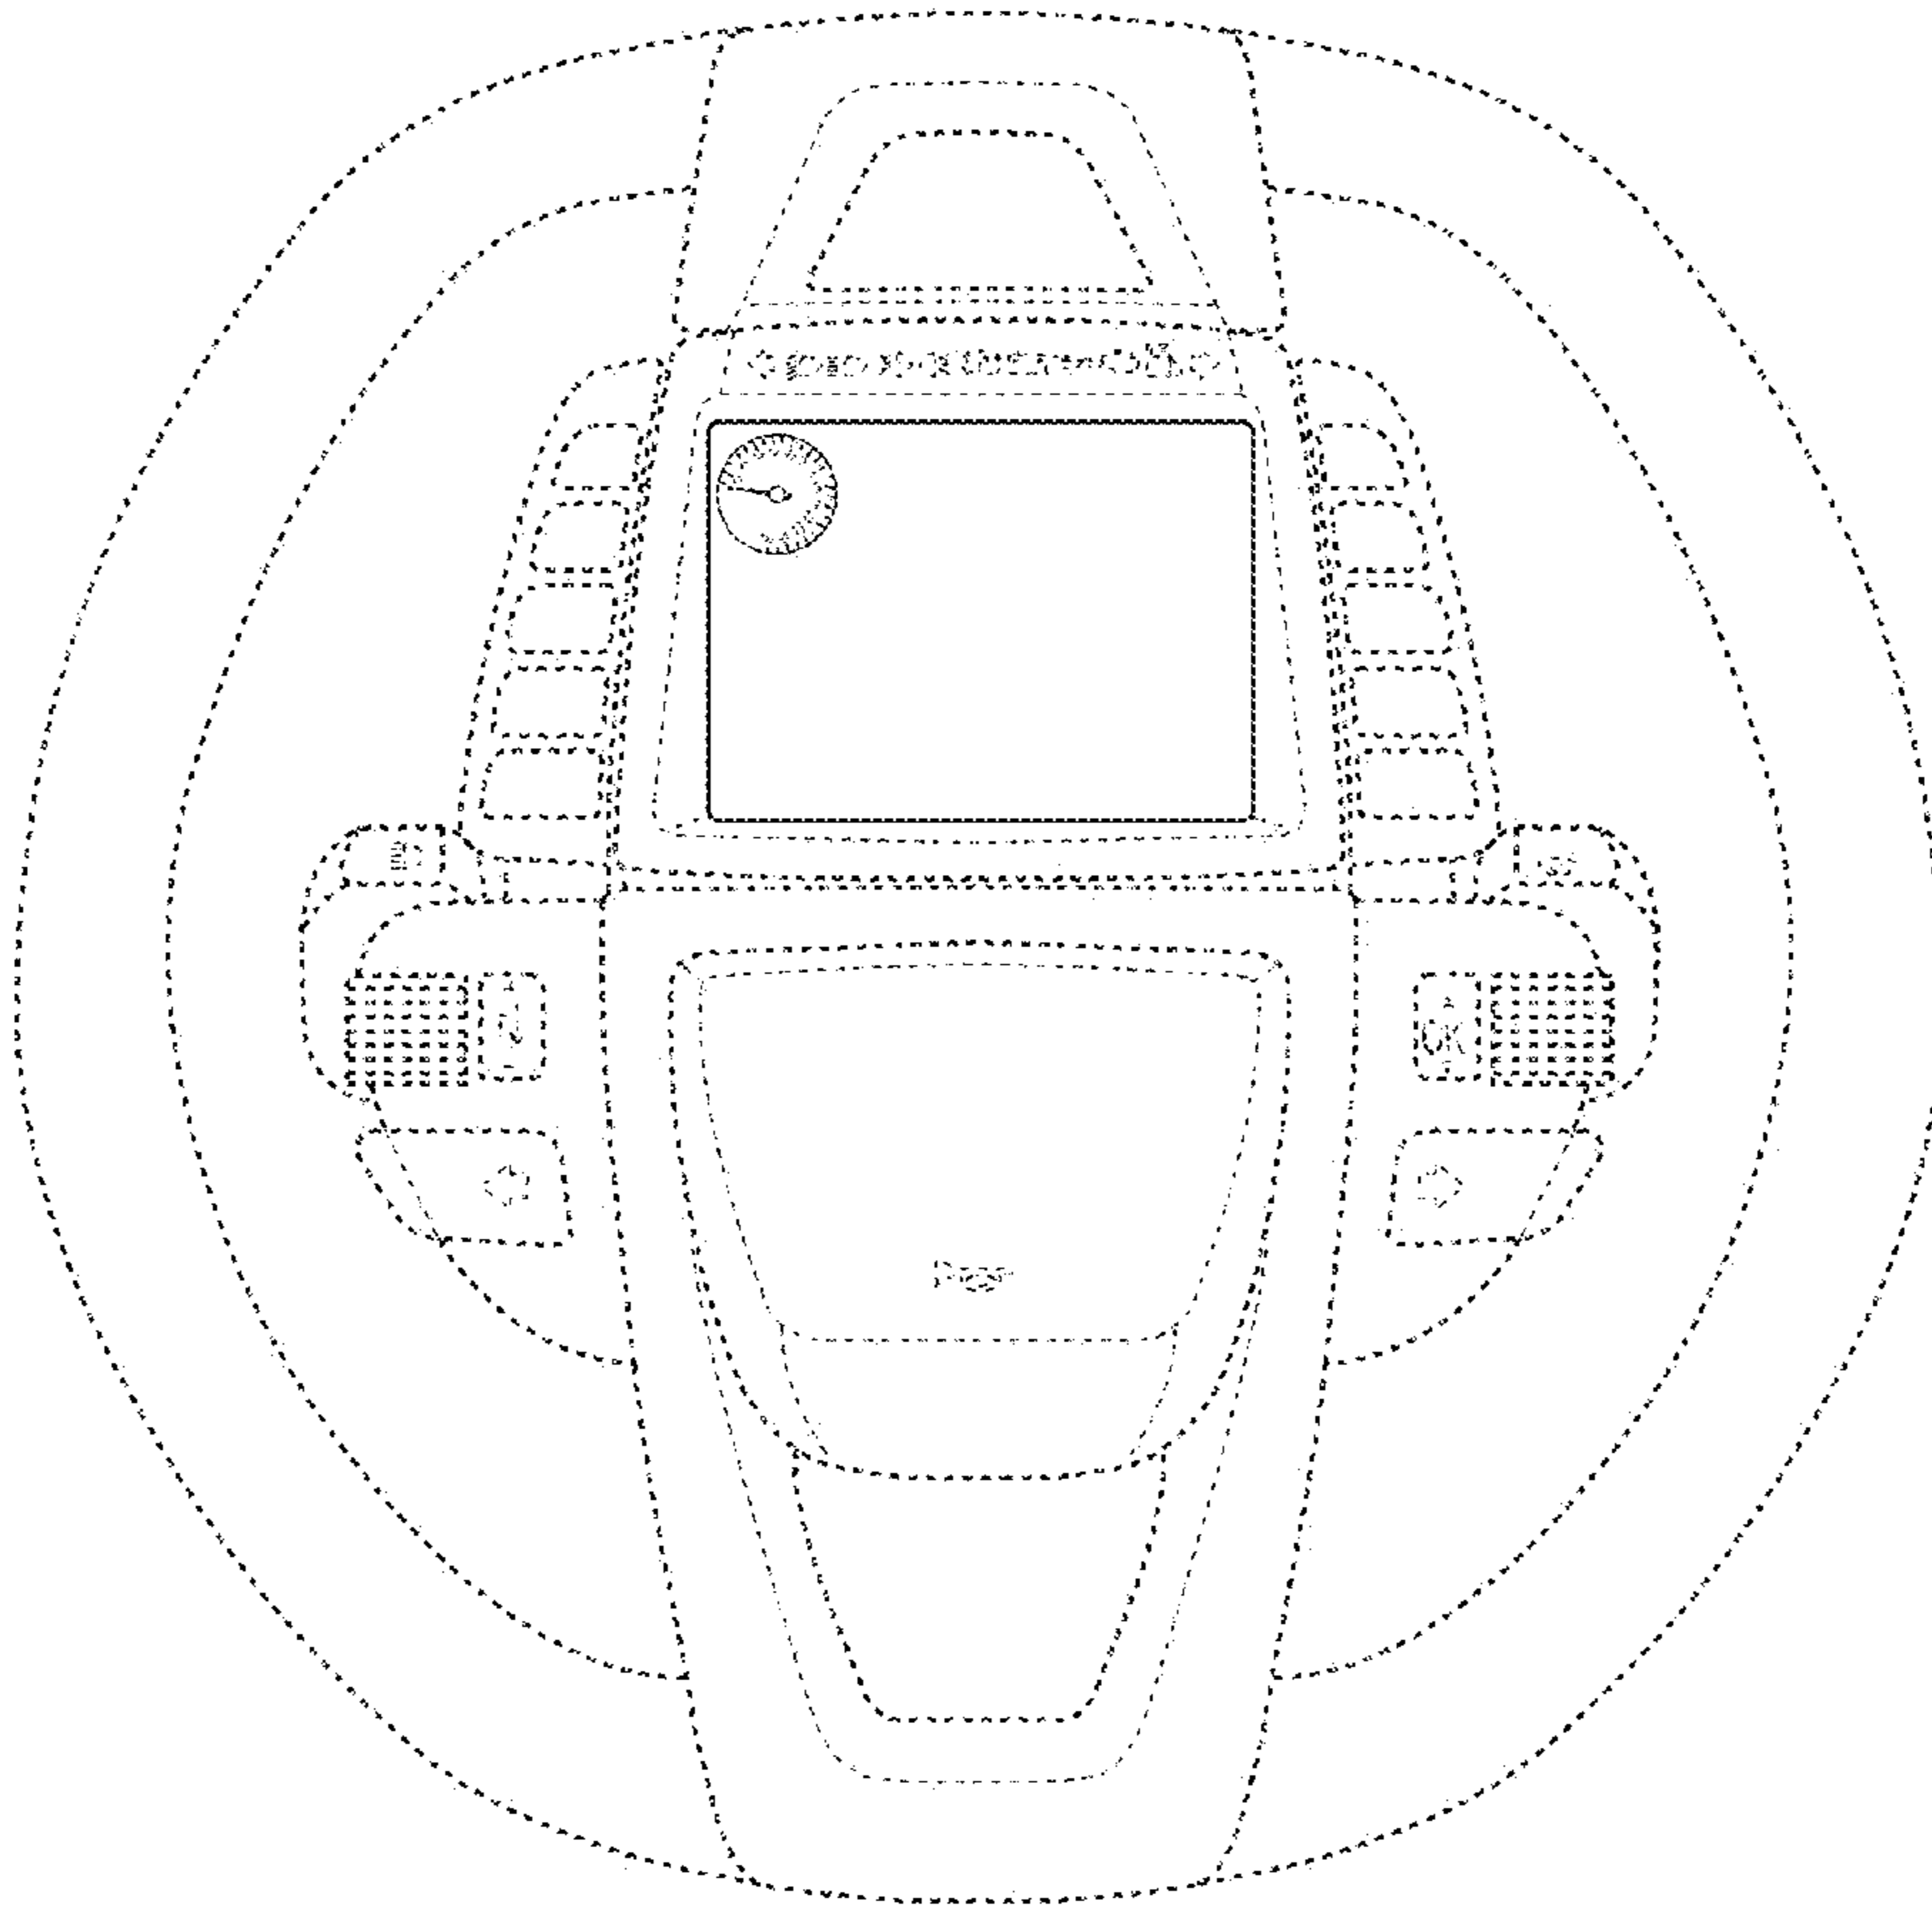

The broken line showing the vehicle steering wheel is for the  
purpose of illustrating environmental structure and forms no  
part of the claimed design. The appearance of the animated  
images sequentially transitions between the images of FIGS.  
1 and 2. The process or period in which one image transitions  
to another forms no part of the claimed design.
