(57) **CLAIM**

We claim the ornamental design for a monitor-mountable computing device, as shown and described.

DESCRIPTION

FIG. 1 is an upper front right perspective view of a monitor-mountable computing device of the present invention;

FIG. 2 is a front elevational view of the monitor-mountable computing device of FIG. 1;

FIG. 3 is a right side elevational view of the monitor-mountable computing device of FIG. 1, the left side of which is a mirror image thereof;

FIG. 4 is a rear elevational view of the monitor-mountable computing device of FIG. 1;

FIG. 5 is a top plan view of the monitor-mountable computing device of FIG. 1; and,

FIG. 6 is a bottom plan view of the monitor-mountable computing device of FIG. 1.

The dashed line of FIG. 3 is for the purpose of illustrating environmental structure comprising a monitor on which the monitor-mountable computing device of the present invention may be mounted, and forms no part of the claimed design.

The chain dashed lines of FIGS. 1, 3, 4, 5, and 6 are for the purpose of illustrating environmental structure comprising cables which may be attached to the monitor-mountable computing device of the present invention, and form no part of the claimed design.

The dashed lines of FIGS. 1, 4, 5, and 6 and areas within their boundaries form no part of the claimed design and define surfaces where the design may include indicia or design features that also form no part of the claimed design.

The monitor-mountable computing device of the present invention includes a housing for a processor that is intended in use to be mounted on the top of a computer monitor.

1 Claim, 3 Drawing Sheets
