(57) **CLAIM**

The ornamental design for split display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a left front top perspective view of a split display screen with graphical user interface of the present invention; FIG. 2 is a front elevational view of the split display screen with graphical user interface of FIG. 1; FIG. 3 is a front elevational view of the split display screen with graphical user interface of FIG. 1, shown in use with, for example, a cellphone; FIG. 4 is a right front top perspective view of a second embodiment of the split display screen with graphical user interface of the present invention; FIG. 5 is a front elevational view of the split display screen with graphical user interface of FIG. 4; FIG. 6 is a front elevational view of the split display screen with graphical user interface of FIG. 4, shown in use with, for example, a cellphone; FIG. 7 is a left front top perspective view of a third embodiment of the split display screen with graphical user interface of the present invention; FIG. 8 is a front elevational view of the split display screen with graphical user interface of FIG. 7; FIG. 9 is a front elevational view of the split display screen with graphical user interface of FIG. 7, shown in use with, for example, a cellphone; FIG. 10 is a right front top perspective view of a fourth embodiment of the split display screen with graphical user interface of the present invention; FIG. 11 is a front elevational view of the split display screen with graphical user interface of FIG. 10; and, FIG. 12 is a front elevational view of the split display screen with graphical user interface of FIG. 10, shown in use with, for example, a cellphone.

The broken lines throughout the figures, including those shown on the display screen and cell phone, are all directed to environment and form no part of the claimed design.

1 Claim, 8 Drawing Sheets
