(57) **CLAIM**

The ornamental design for a display screen or a portion thereof with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an image of a display screen or a portion thereof with graphical user interface according to a first embodiment, shown in a first configuration; FIG. 2 is a front view thereof in a second configuration; FIG. 3 is a front view thereof in a third configuration; FIG. 4 is a front view thereof in a fourth configuration; FIG. 5 is a front view of an image of a display screen or a portion thereof with graphical user interface according to a second embodiment, shown in a first configuration; FIG. 6 is a front view thereof in a second configuration; FIG. 7 is a front view thereof in a third configuration; and, FIG. 8 is a front view thereof in a fourth configuration.

In the above-described embodiments, the appearance of the image transitions sequentially in any order between the images shown in various configurations of such embodiments. The process or period in which an image transitions to another forms no part of the claimed design.

The broken line showings of portions of a display screen, text, and other features in the figures are environmental only and form no part of the claimed design.

The areas including stipple-fill can represent areas having a color that is different from a color or an adjacent portion of the image.
