(57) **CLAIM**

The ornamental design for a portion of a target, as shown in the accompanying drawings and described above.

DESCRIPTION

FIG. 1 is a front perspective view of a portion of a target in accordance with a first embodiment of the present invention;

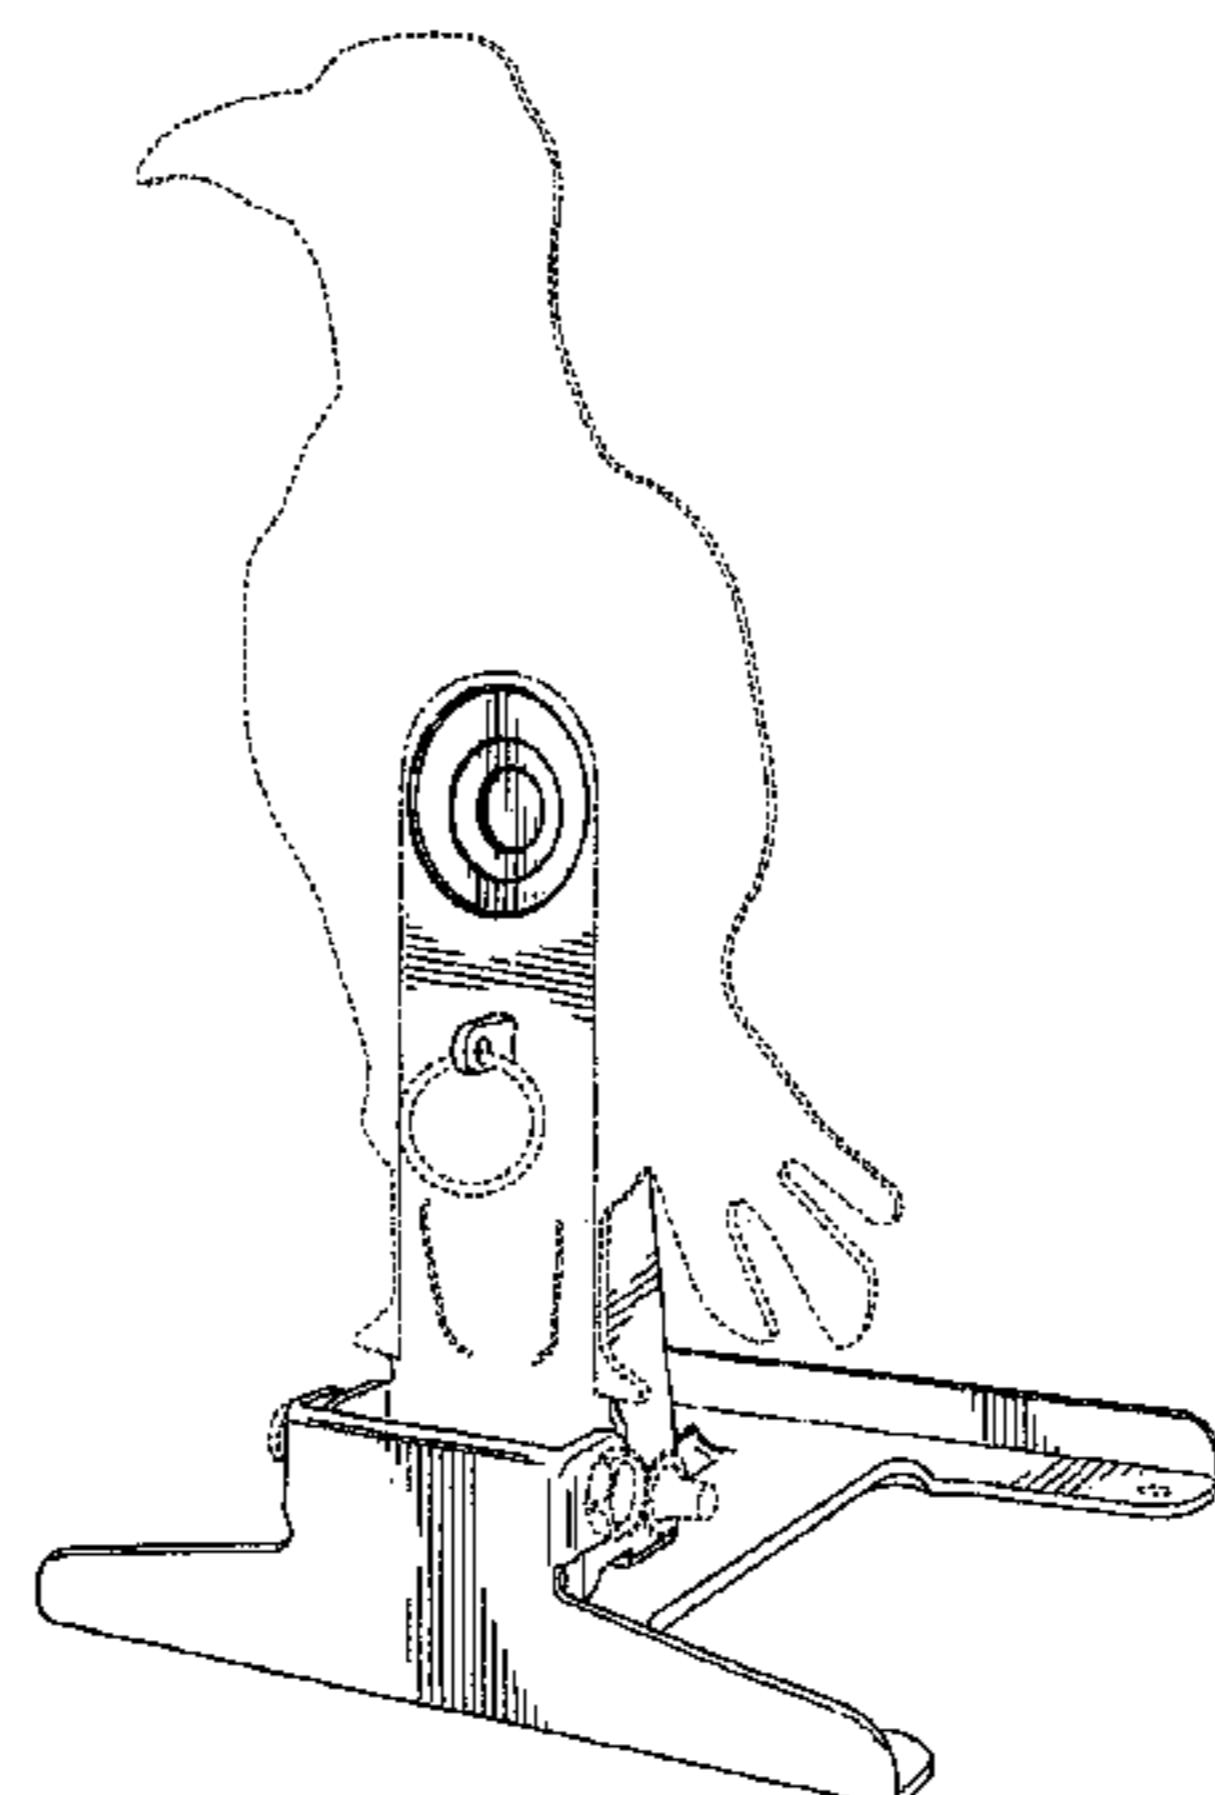

FIG. 2 is a rear perspective view of the portion of the target of FIG. 1;
FIG. 3 is a front elevation view of the portion of the target of FIG. 1;
FIG. 4 is a rear elevation view of the portion of the target of FIG. 1;
FIG. 5 is a right elevation view of the portion of the target of FIG. 1;
FIG. 6 is a left elevation view of the portion of the target of FIG. 1;
FIG. 7 is a top plan view of the portion of the target of FIG. 1;
FIG. 8 is a bottom plan view of the portion of the target of FIG. 1;
FIG. 9 is a front perspective view of a portion of a target in a first configuration, in accordance with a second embodiment of the present invention;
FIG. 10 is a rear perspective view of the portion of the target of FIG. 9 in the first configuration;
FIG. 11 is a front elevation view of the portion of the target of FIG. 9 in the first configuration;
FIG. 12 is a rear elevation view of the portion of the target of FIG. 9 in the first configuration;
FIG. 13 is a right elevation view of the portion of the target of FIG. 9 in the first configuration;
FIG. 14 is a left elevation view of the portion of the target of FIG. 9 in the first configuration;
FIG. 15 is a top plan view of the portion of the target of FIG. 9 in the first configuration;
FIG. 16 is a bottom plan view of the portion of the target of FIG. 9 in the first configuration;
FIG. 17 is a front perspective view of the portion of the target of FIG. 9 in a second configuration, in accordance with the second embodiment of the present invention;
FIG. 18 is a rear perspective view of the portion of the target of FIG. 9 in the second configuration;

FIG. 19 is a front elevation view of the portion of the target of FIG. 9 in the second configuration;
FIG. 20 is a rear elevation view of the portion of the target of FIG. 9 in the second configuration;
FIG. 21 is a right elevation view of the portion of the target of FIG. 9 in the second configuration;
FIG. 22 is a left elevation view of the portion of the target of FIG. 9 in the second configuration;
FIG. 23 is a top plan view of the portion of the target of FIG. 9 in the second configuration;
FIG. 24 is a bottom plan view of the portion of the target of FIG. 9 in the second configuration;
FIG. 25 is a front perspective view of the portion of the target of FIG. 9 in a third configuration, in accordance with the second embodiment of the present invention;
FIG. 26 is a rear perspective view of the portion of the target of FIG. 9 in the third configuration;
FIG. 27 is a front elevation view of the portion of the target of FIG. 9 in the third configuration;
FIG. 28 is a rear elevation view of the portion of the target of FIG. 9 in the third configuration;
FIG. 29 is a right elevation view of the portion of the target of FIG. 9 in the third configuration;
FIG. 30 is a left elevation view of the portion of the target of FIG. 9 in the third configuration;
FIG. 31 is a top plan view of the portion of the target of FIG. 9 in the third configuration; and,
FIG. 32 is a bottom plan view of the portion of the target of FIG. 9 in the third configuration.
The broken lines shown herein are for illustrative purposes and form no part of the claimed design. In FIGS. 1-4, 9-12, 17-20 and 25-28, the broken lines in the form of an alternating series of relatively short dashes and relatively long dashes represent bounds of the claimed design.
