(57) **CLAIM**

The ornamental design for a split wrench, as shown and
described.

DESCRIPTION

FIG. 1 is a front perspective view of a first embodiment of a
split wrench in its closed position showing my new design;
FIG. 2 is a front view of the first embodiment of the split
wrench in its closed position;

FIG. 3 is a right side view of the first embodiment of the split
wrench in its closed position;

FIG. 4 is a top view of the first embodiment of the split wrench
in its closed position;

FIG. 5 is a bottom view of the first embodiment of the split
wrench in its closed position;

FIG. 6 is a front perspective view of the first embodiment of
the split wrench in its open position;

FIG. 7 is a front view of the first embodiment of the split
wrench in its open position;

FIG. 8 is a top view of the first embodiment of the split wrench
in its open position;

FIG. 9 is a bottom view of the first embodiment of the split
wrench in its open position;

FIG. 10 is a right side view of the first embodiment of the split
wrench in its open position; and

FIG. 11 is a front perspective view of the first embodiment of
the split wrench in its closed position as used to grip a bolt;

FIG. 12 is a front perspective view of a second embodiment of
a split wrench in its closed position showing my new design;

FIG. 13 is a front view of the second embodiment of the split
wrench in its closed position;

FIG. 14 is a right side view of the second embodiment of the
split wrench in its closed position;

FIG. 15 is a top view of the second embodiment of the split
wrench in its closed position;

FIG. 16 is a bottom view of the second embodiment of the
split wrench in its closed position;

FIG. 17 is a front perspective view of the second embodiment
of the split wrench in its open position;

FIG. 18 is a front view of the second embodiment of the split
wrench in its open position;

FIG. 19 is a top view of the second embodiment of the split
wrench in its open position;

FIG. 20 is a bottom view of the second embodiment of the
split wrench in its open position;

FIG. 21 is a right side view of the second embodiment of the
split wrench in its open position; and,

FIG. 22 is a front perspective view of the second embodiment
of the split wrench in its closed position as used to grip a bolt.

Right side views not shown are mirror images of left side
views. Any broken lines illustrative of environmental struc-
ture in the drawings are not part of the design sought to be
patented.
