(57) **CLAIM**

The ornamental design for a digital camera with animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of the digital camera with animated graphical user interface showing our new design; FIG. 2 is a front view thereof showing a first image in a sequence for a display screen with a transitional user interface; FIG. 3 is a top plan view of FIG. 1; FIG. 4 is a bottom plan view of FIG. 1; FIG. 5 is a left side view of FIG. 1; FIG. 6 is a front view of FIG. 1 showing a second image in a sequence for a display screen with a transitional user interface; FIG. 7 is a front view of FIG. 1 showing a third image in a sequence for a display screen with a transitional user interface; and, FIG. 8 is a front view of FIG. 1 showing a fourth image in a sequence for a display screen with a transitional user interface. The features shown in broken lines in the drawings depict portions of the digital camera with animated graphical user interface that form no part of the claimed design. The dashed-dotted lines denote the boundary of the claim and form no part of the claimed design. The appearance of the digital camera display screen graphical user interface image transitions sequentially between the images shown in FIGS. 1-2 and 6-8. The subject matter in this patent includes a process or period in which an image changes into a subsequent state of. This process or period forms no part of the claimed design.
