FIG. 1 is a front view of the display screen with a graphical user interface of a receipt reader application in accordance to a first embodiment showing our new design; and, FIG. 2 is a front view thereof in accordance with a second embodiment.

The broken lines shown in the drawings illustrate portions of the display screen with a graphical user interface of a receipt reader application that forms no part of the claimed design.

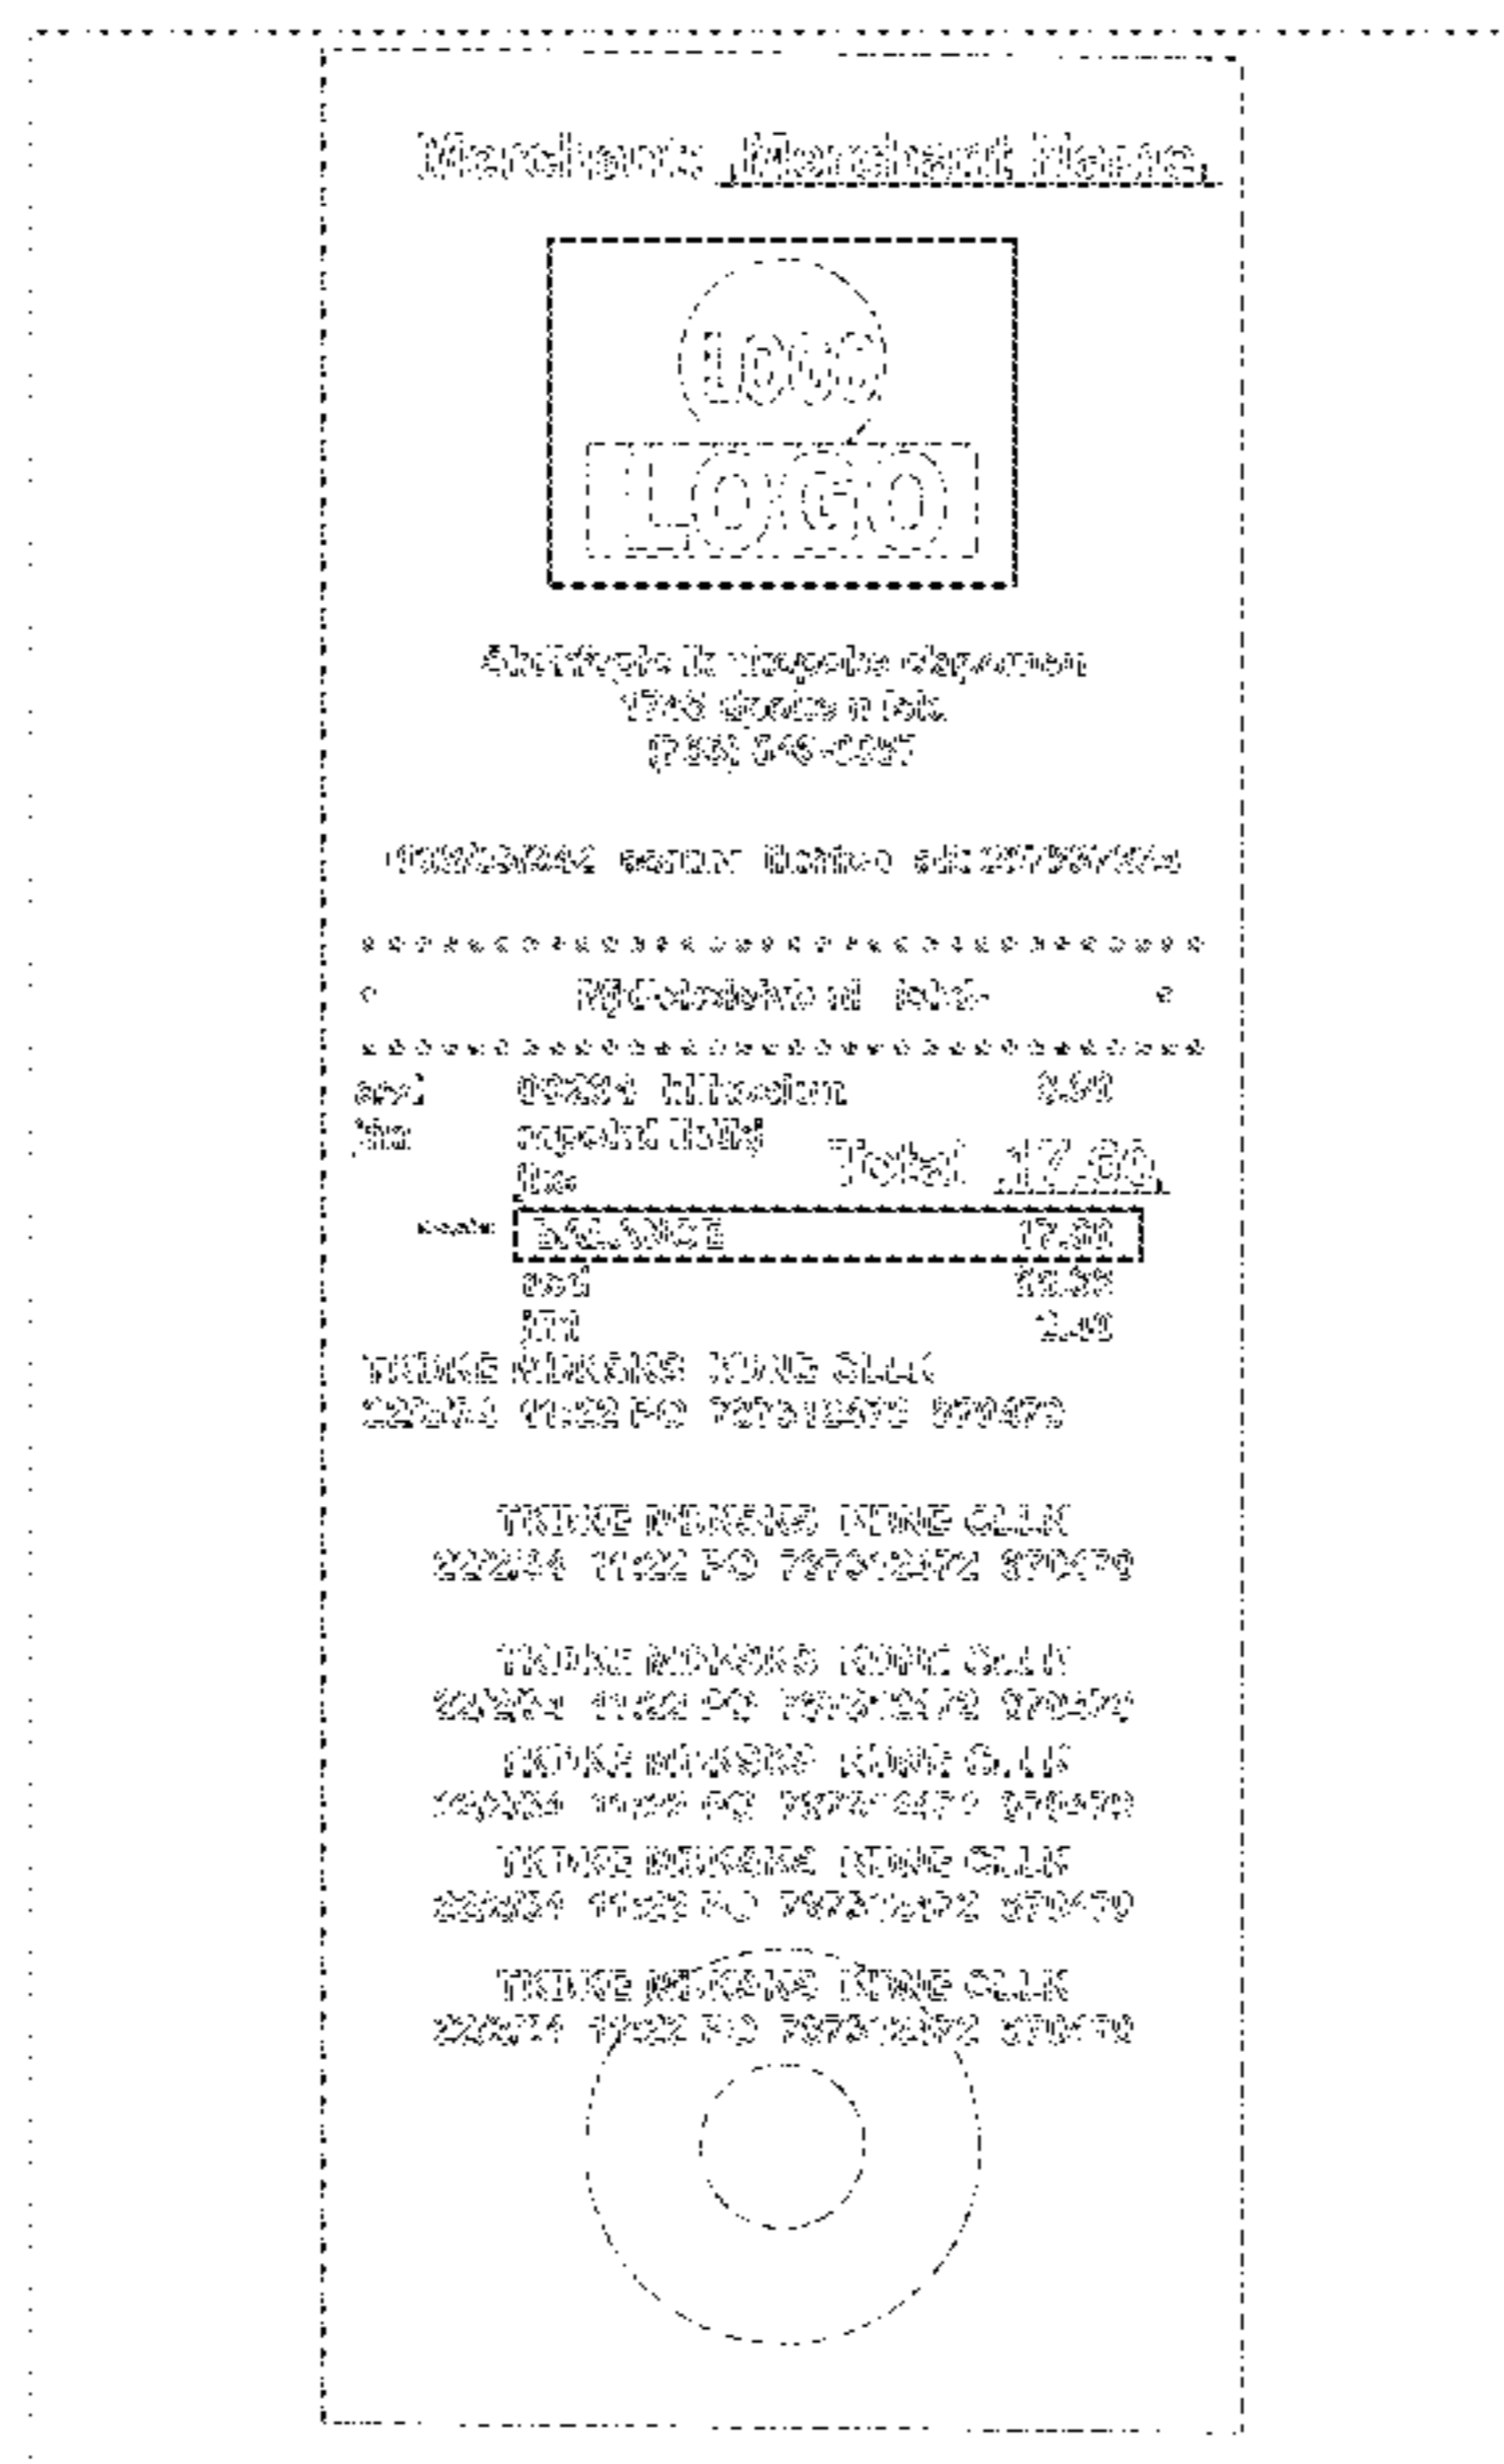

Moreover, the broken line perimeter in the figures represents both the boundaries of the display screen and the graphical user interface. This outer edge of the portion of the display screen is understood to be congruent with the outer edge of the graphical user interface.
