(57) **CLAIM**

The ornamental design for a container with cover, as shown in the drawings and described above.

DESCRIPTION

FIG. 1 is a front perspective view of the container with cover of the present invention in a closed position;

FIG. 2 is a front view of the container with cover of the present invention in the closed position;
FIG. 3 is a rear view of the container with cover of the present invention in the closed position;
FIG. 4 is a bottom view of the container with cover of the present invention in the closed position;
FIG. 5 is a top view of the container with cover of the present invention in the closed position;
FIG. 6 is a left view of the container with cover of the present invention in the closed position;
FIG. 7 is a right view of the container with cover of the present invention in the closed position;
FIG. 8 is a front perspective view of the container with cover of the present invention in a first intermediate position;
FIG. 9 is a front view of the container with cover of the present invention in the first intermediate position;
FIG. 10 is a rear view of the container with cover of the present invention in the first intermediate position;
FIG. 11 is a bottom view of the container with cover of the present invention in the first intermediate position;
FIG. 12 is a top view of the container with cover of the present invention in the first intermediate position;
FIG. 13 is a left view of the container with cover of the present invention in the first intermediate position;
FIG. 14 is a right view of the container with cover of the present invention in the first intermediate position;
FIG. 15 is a front perspective view of the container with cover of the present invention in a second intermediate position;
FIG. 16 is a front view of the container with cover of the present invention in the second intermediate position;
FIG. 17 is a rear view of the container with cover of the present invention in the second intermediate position;
FIG. 18 is a bottom view of the container with cover of the present invention in the second intermediate position;
FIG. 19 is a top view of the container with cover of the present invention in the second intermediate position;

FIG. 20 is a left view of the container with cover of the present invention in the second intermediate position;
FIG. 21 is a right view of the container with cover of the present invention in the second intermediate position;
FIG. 22 is a front left perspective view of the container with cover of the present invention in a third intermediate position;
FIG. 23 is a front right perspective view of the container with cover of the present invention in the third intermediate position;
FIG. 24 is a front view of the container with cover of the present invention in the third intermediate position;
FIG. 25 is a rear view of the container with cover of the present invention in the third intermediate position;
FIG. 26 is a bottom view of the container with cover of the present invention in the third intermediate position;
FIG. 27 is a top view of the container with cover of the present invention in the third intermediate position;
FIG. 28 is a left view of the container with cover of the present invention in the third intermediate position;
FIG. 29 is a right view of the container with cover of the present invention in the third intermediate position;
FIG. 30 is a front perspective view of the container with cover of the present invention in an open position;
FIG. 31 is a front view of the container with cover of the present invention in the open position;
FIG. 32 is a rear view of the container with cover of the present invention in the open position;
FIG. 33 is a bottom view of the container with cover of the present invention in the open position;
FIG. 34 is a top view of the container with cover of the present invention in the open position;
FIG. 35 is a left view of the container with cover of the present invention in the open position; and,
FIG. 36 is a right view of the container with cover of the present invention in the open position.
