(57) **CLAIM**

The ornamental design for a gem set hollow sphere, as shown and described.

**DESCRIPTION**

FIG. 1 is a top-right front perspective view of a gem set hollow sphere showing the new design (the chain, the stone, and the edge of the opening, shown in phantom, do not form part of the present design);

FIG. 2 is a front elevational view thereof;

FIG. 3 is a left side view thereof;

FIG. 4 is a rear elevational view thereof; and,

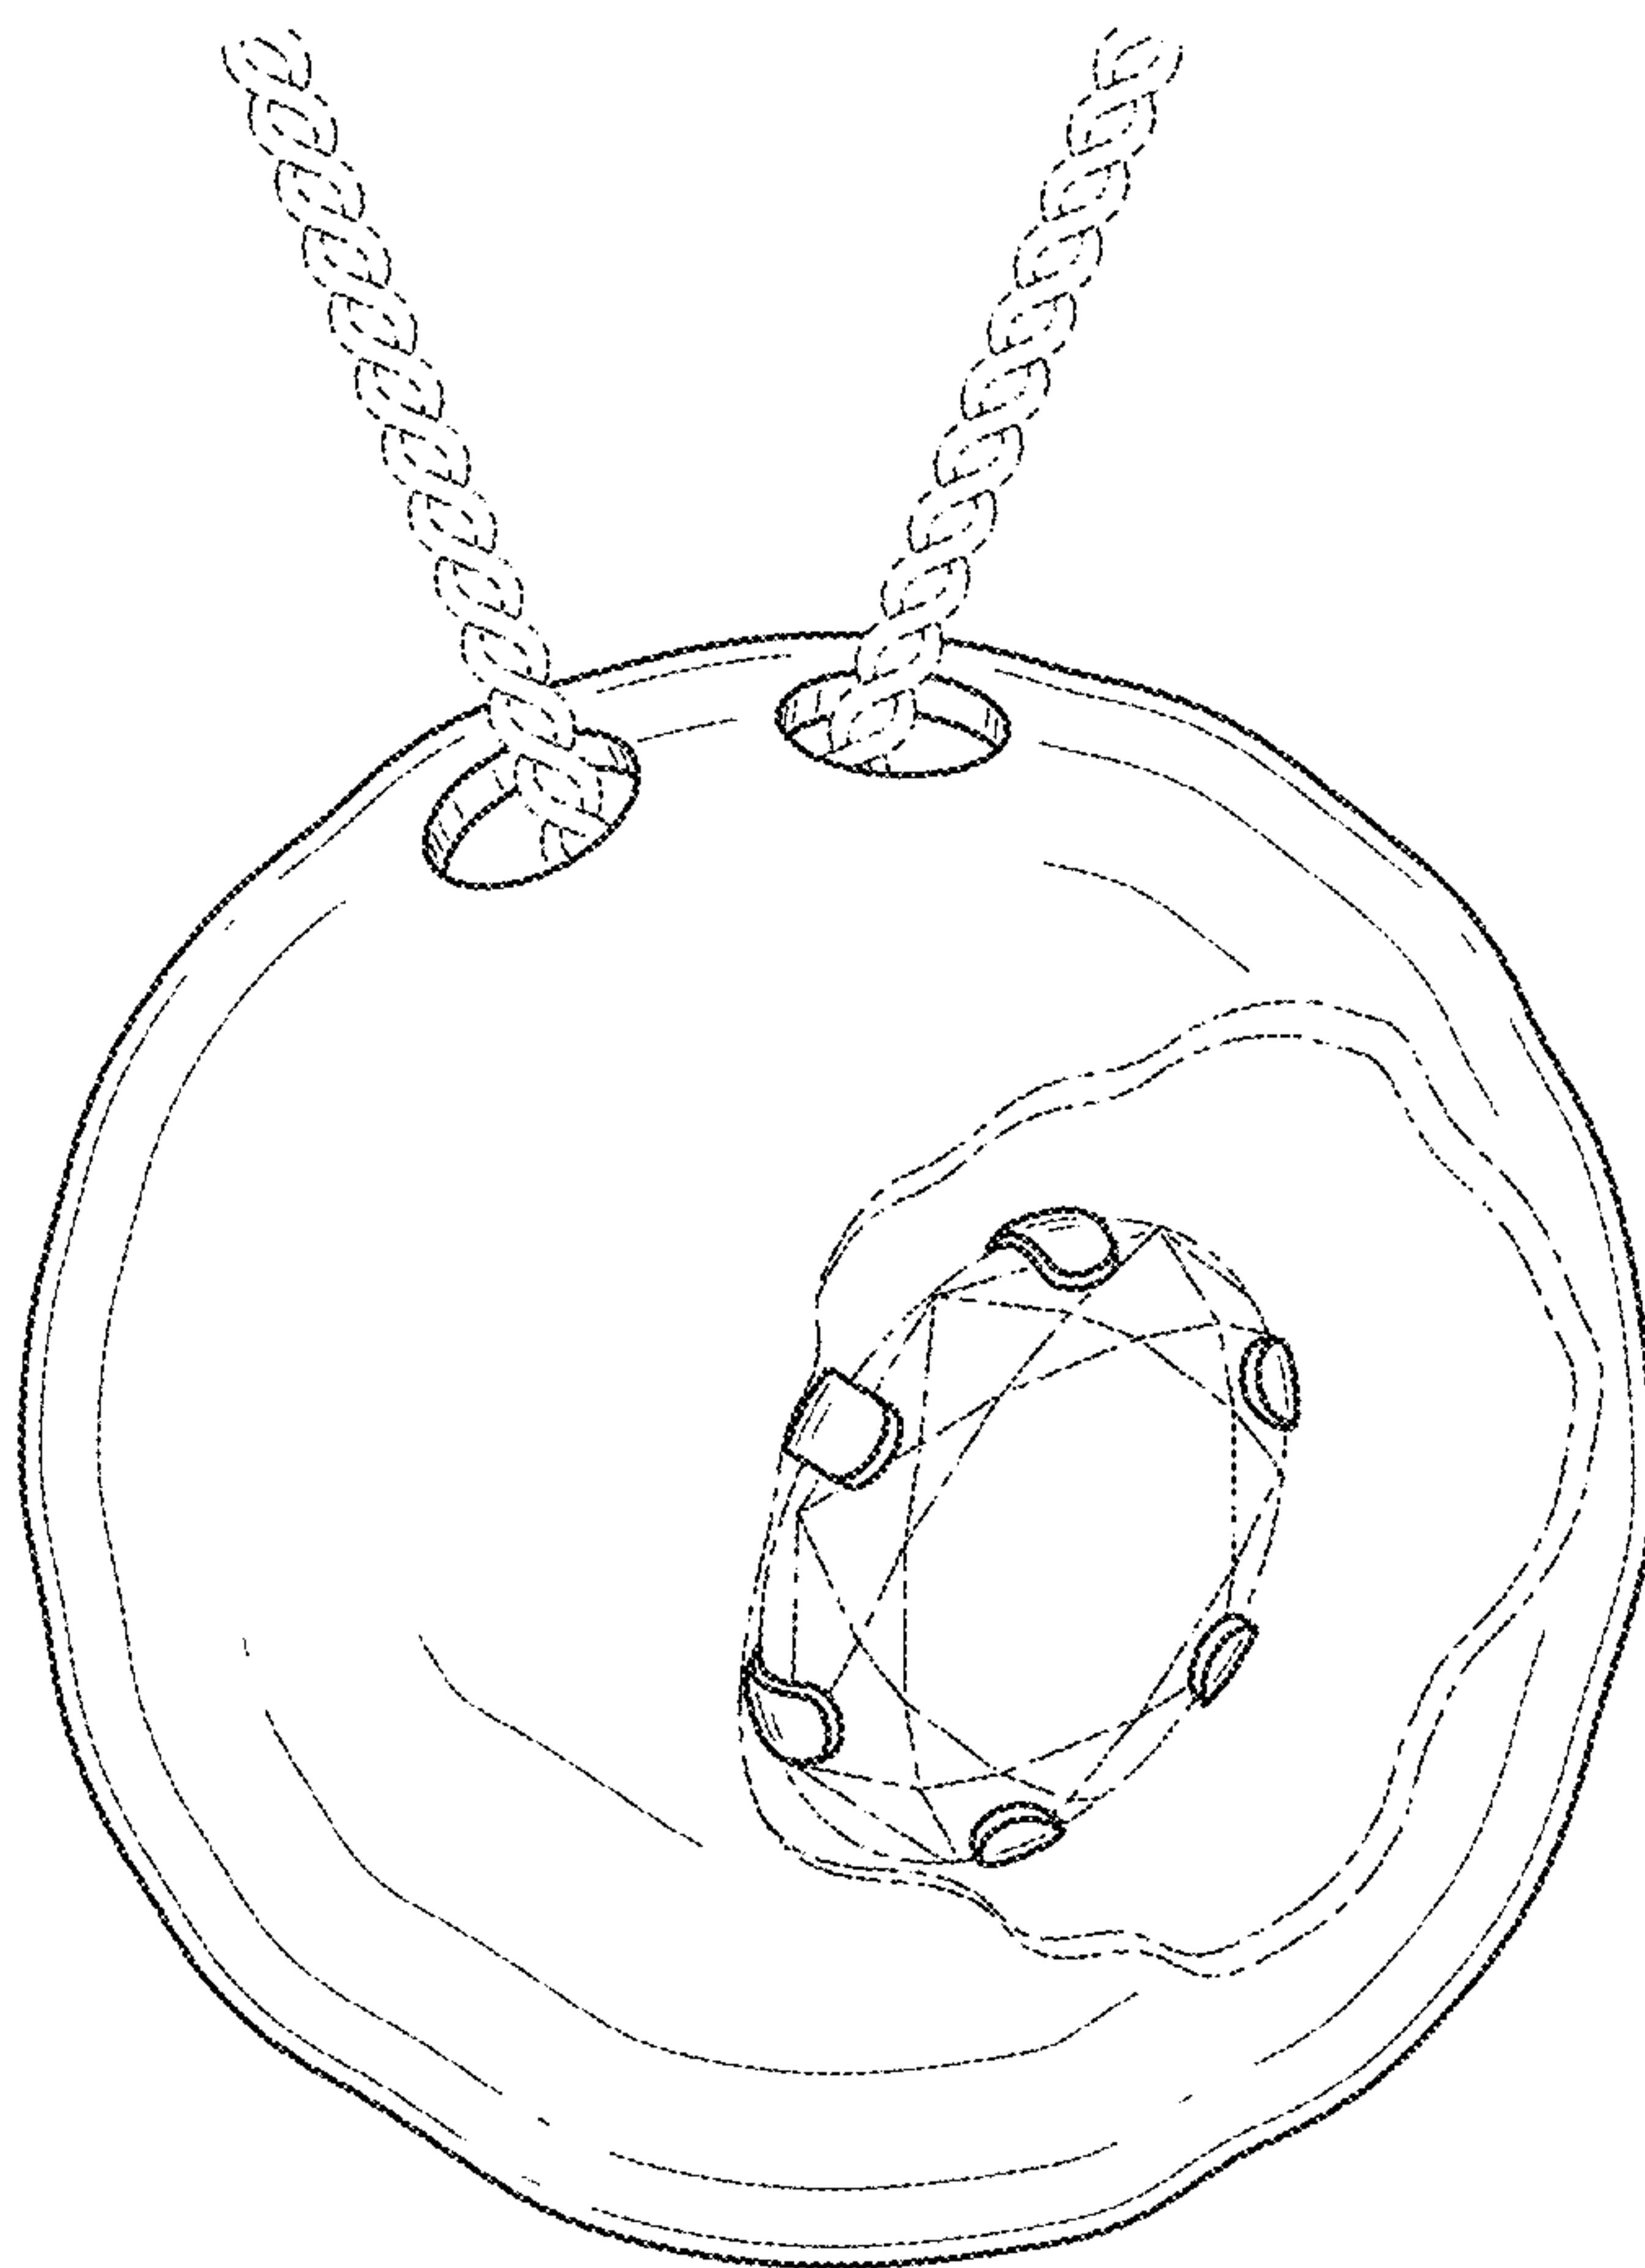

FIG. 5 is a right side view thereof.

The claimed gem set hollow sphere is used as a component in jewelry, and can be used as a part of a necklace, earring, bracelet, or ring. The sphere can be produced with any precious or semi-precious metals. The front face of the sphere has a cut out opening which allows for interior gem settings and additional interior embellishments of oxidation, patina, or enamel. The interior and exterior can be set with a variety of precious, semi-precious or synthetic gem stones, pearls or beads.
