(57) **CLAIM**

The ornamental design for a device holder, as shown and described.

DESCRIPTION

FIG. 1 is an exploded bottom, left, and front perspective view of a device holder showing my new design;
FIG. 2 is a bottom, left, and front perspective view thereof;
FIG. 3 is a front elevational view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 4 is a rear elevational view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 5 is a left side elevational view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 6 is a right side elevational view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 7 is a bottom plan view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 8 is a top plan view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 9 is a bottom, left, and front perspective view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 10 is a bottom, right, and rear perspective view of the base component of the device holder, the mating component being omitted for clarity of illustration;

FIG. 11 is a front elevational view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 12 is a rear elevational view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 13 is a left side elevational view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 14 is a right side elevational view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 15 is a bottom plan view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 16 is a top plan view of the mating component of the device holder, the base component being omitted for clarity of illustration;

FIG. 17 is a bottom, left, and front perspective view of the mating component of the device holder, the base component being omitted for clarity of illustration; and,

FIG. 18 is a bottom, right, and rear perspective view of the mating component of the device holder, the base component being omitted for clarity of illustration.
