(57) **CLAIM**

The ornamental design for an exercise wrap garment, as shown and described.

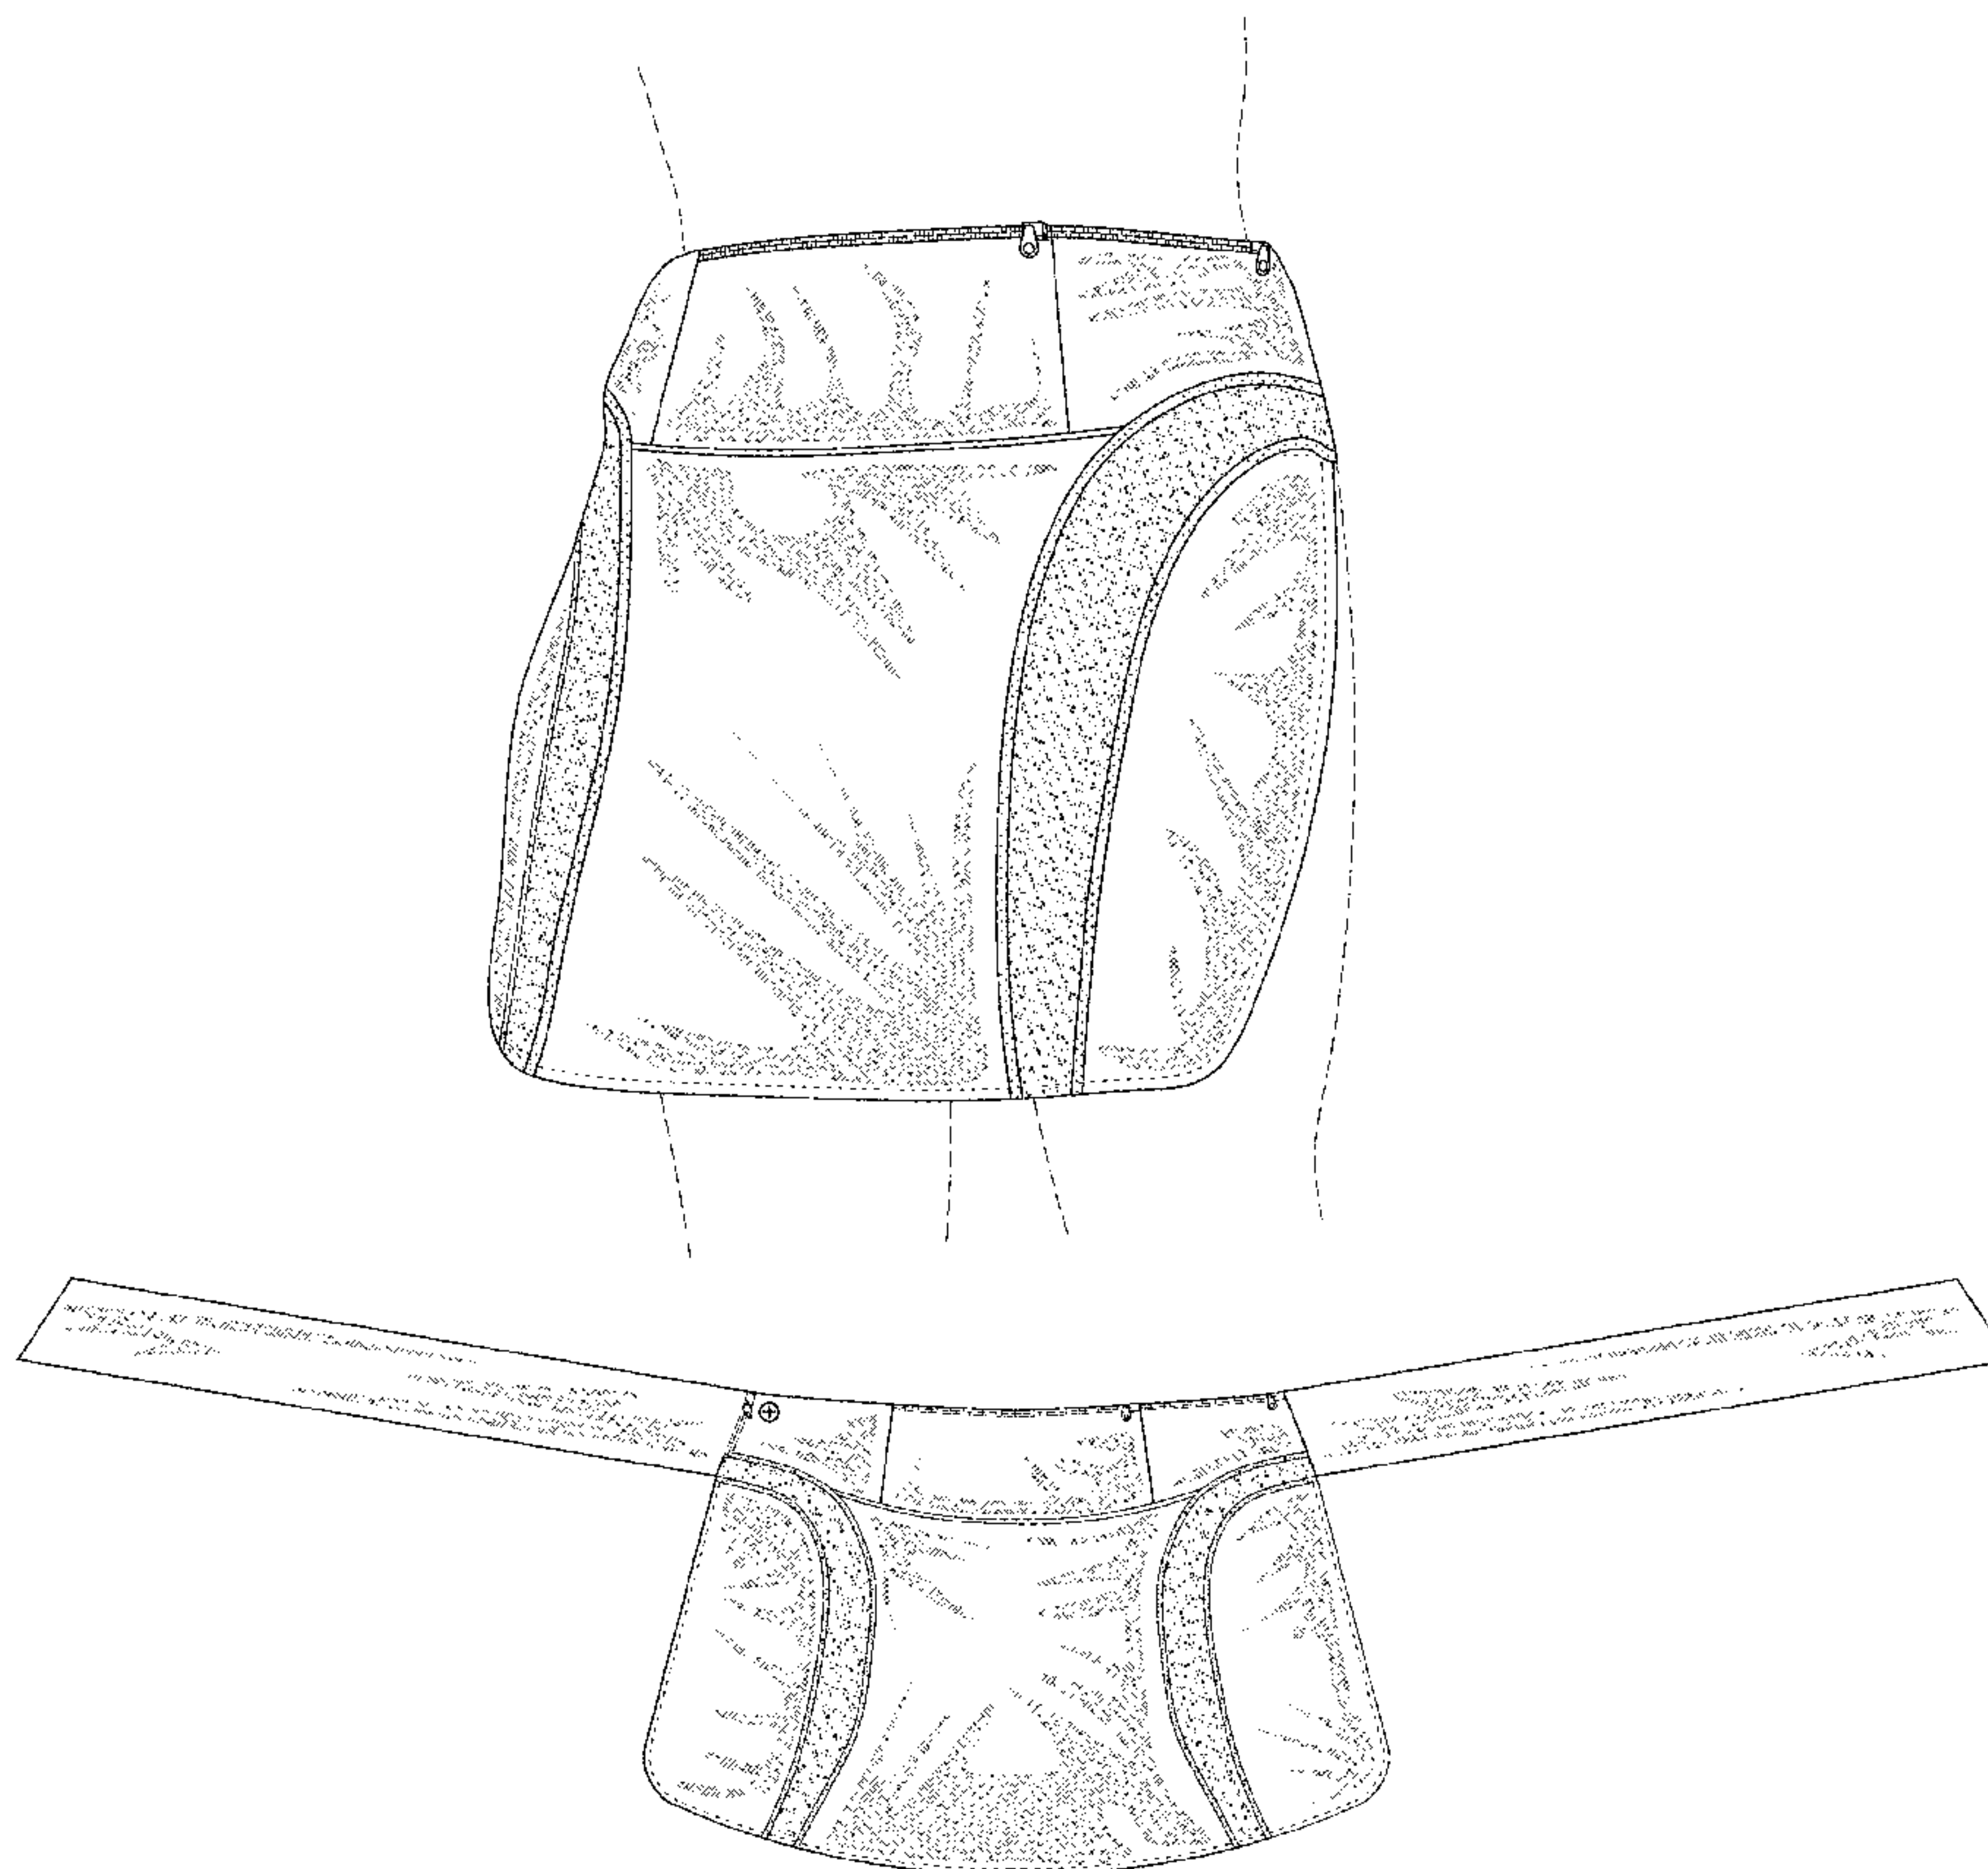

DESCRIPTION

FIG. 1 is an enlarged front perspective view of an exercise wrap garment showing our new design; the exercise wrap garment being flat and having no substantial thickness; FIG. 2 is a front elevational view thereof, showing the tie straps extended out; and, FIG. 3 is a rear elevational view thereof.

In FIGS. 1-3, the surface treatment, consisting of small broken hatched lines, is understood to extend uniformly across the surfaces to which it is applied.

In FIG. 1, the broken lines illustrating portions of the human form, show the exercise wrap garment as worn, and form no part of the claimed design. In FIGS. 1-3, the broken lines on the surface of the exercise wrap garment represent stitching.
