(57) **CLAIM**

The ornamental design for a winged identification band, substantially as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of the winged identification band embodying my new design;
 FIG. 2 is a bottom plan view of the band;
 FIG. 3 is a right elevational view of the band, the left elevational view of the band being a mirror image;
 FIG. 4 is a rear elevational view of the band;
 FIG. 5 is front elevational view of the band;
 FIG. 6 is a top, front, and left perspective view of a wristband with wings; and,
 FIG. 7 is a top plan view of the band as it would lie on a carrier strip for printing thereon.
 The broken lines represent boundaries and layer cuts, which form no part of the claimed design. The broken lines showing a carrier strip in FIG. 7 form no part of the claimed design. The nature of this product is as identification band with adhesive wings in which the wings offer improved security and comfort and is connectable to a tether.
