FIG. 1 is a front view of a portion of a display panel, showing a first image of our animated computer icon.

FIG. 2 is a front view of the portion of the display panel, showing a second image of our animated computer icon.

FIG. 3 is a front view of the portion of the display panel, showing a third image of our animated computer icon.

FIG. 4 is a front view of the portion of the display panel, showing a fourth image of our animated computer icon.

FIG. 5 is a front view of the portion of the display panel, showing a fifth image of our animated computer icon.

FIG. 6 is a front view of the portion of the display panel, showing a sixth image of our animated computer icon; and,

FIG. 7 is a front view of the portion of the display panel, showing a seventh image of our animated computer icon.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-7. The subject matter in this patent application includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The broken line completing the border of each figure illustrates the display panel portion and forms no part of the claimed design. The broken lines within each figure, such as those representing respective icons within each circle and those representing associated text, illustrate graphical environmental features that form no part of the claimed design.
