(57) **CLAIM**

The ornamental design for an electronic device, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of an electronic device; FIG. 2 is another perspective view of the electronic device of FIG. 1; FIG. 3 is a top plan view of the electronic device of FIG. 1; FIG. 4 is a bottom plan view of the electronic device of FIG. 1; FIG. 5 is a left-side elevation view of the electronic device of FIG. 1; FIG. 6 is a right-side elevation view of the electronic device of FIG. 1; FIG. 7 is a back elevation view of the electronic device of FIG. 1; and, FIG. 8 is a front elevation view of the electronic device of FIG. 1.

In the drawings, the oblique lines on the top and bottom surfaces represent a glass-like surface finish, the stippling around the edges represents a matte or satin surface finish, and the shading lines on the bezel between the front surface and the stippling around the edges represent a gloss or polished surface finish.

The broken lines shown in the figures that represent openings through a surface, including the outermost broken lines that are immediately adjacent to the claimed surfaces around the sides and front and rear (in FIGS. 5-8), as well as the centered (from side to side) capsule-shaped openings (that represent the speaker and home-button on the top) and the smallest circular feature (that represents a microphone opening on the bottom), represent boundaries of the claim. The broken lines that occur beneath a continuous surface on the front and rear, including the display and other broken line features, and the broken lines shown within broken line boundaries, represent environment. The broken lines, and the features shown in broken lines, form no part of the claimed design.
