(57) **CLAIM**

The ornamental design for the pair of device-receiving corners for an electronic device case, as shown and described.

DESCRIPTION

FIG. 1 is a first front view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 2 is a first front view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 3 is a rear view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 4 is a rear view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 5 is a front perspective view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 6 is a front perspective view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 7 is a rear perspective view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 8 is a rear perspective view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 9 is a second front view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 10 is a first lateral edge view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 11 is an inner edge view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 12 is a second lateral edge view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 13 is an outer edge view of the right side of the pair of device-receiving corners for an electronic device case shown separated from the left side;

FIG. 14 is a second front view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 15 is a first lateral edge view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 16 is an inner edge view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 17 is a second lateral edge view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 18 is an outer edge view of the left side of the pair of device-receiving corners for an electronic device case shown separated from the right side;

FIG. 19 is a perspective of the pair of device-receiving corners for an electronic device case in a first condition of use; and, FIG. 20 is a perspective of the pair of device-receiving corners for an electronic device case in a second condition of use.

The broken lines in the drawings depict environmental subject matter/or parts of the device-receiving corner construction for electronic device case and form no part of the claimed design.
