(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with animated graphical user interface showing the new design in a first step. FIG. 2 is a front view of a display screen with animated graphical user interface showing the new design in a second step.

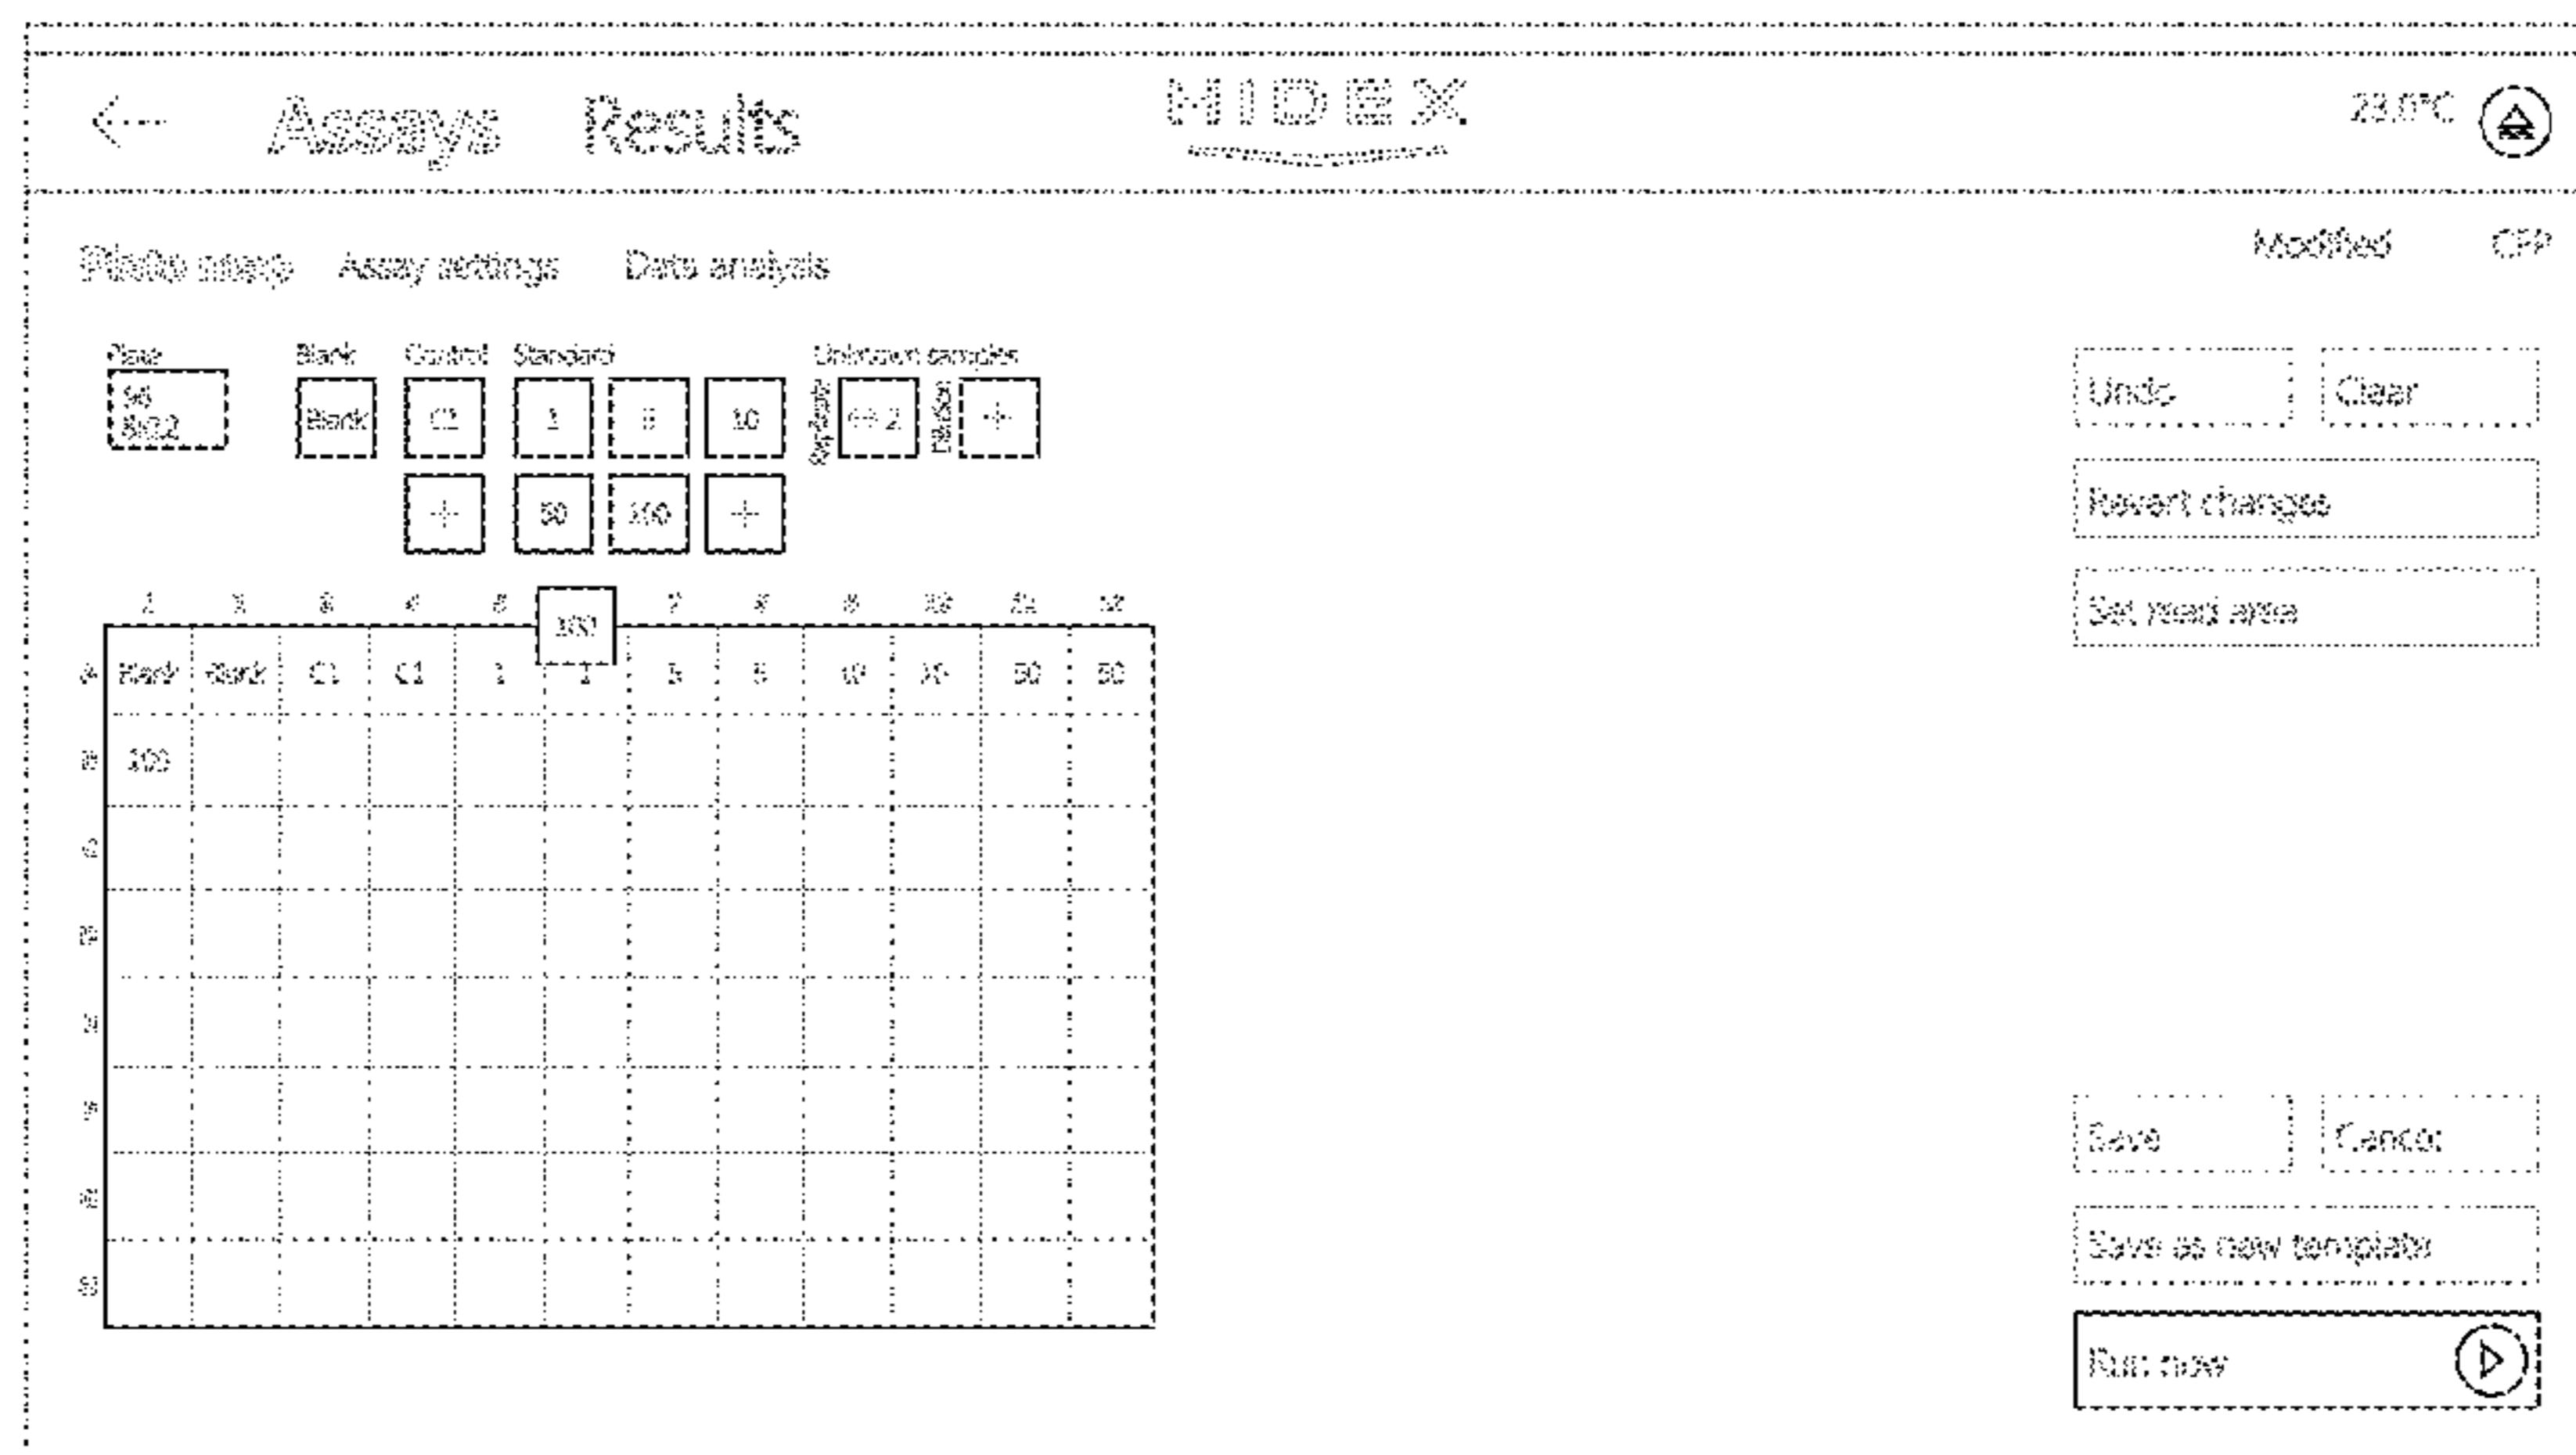

FIG. 3 is a front view of a display screen with animated graphical user interface showing the new design in a third step.

FIG. 4 is a front view of a display screen with animated graphical user interface showing the new design in a fourth step; and,

FIG. 5 is a front view of a display screen with animated graphical user interface showing the new design in a fifth step.

The article in which the design is embodied is a graphical user interface for a laboratory instrument such as a microplate reader. The design consists of the ornamental features of screen displays, etc., with an animated graphical user interface, as shown in solid lines. The broken lines showing text, graphical elements, and the display screen are for environmental purposes only and form no part of the claimed design. The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

1 Claim, 5 Drawing Sheets
