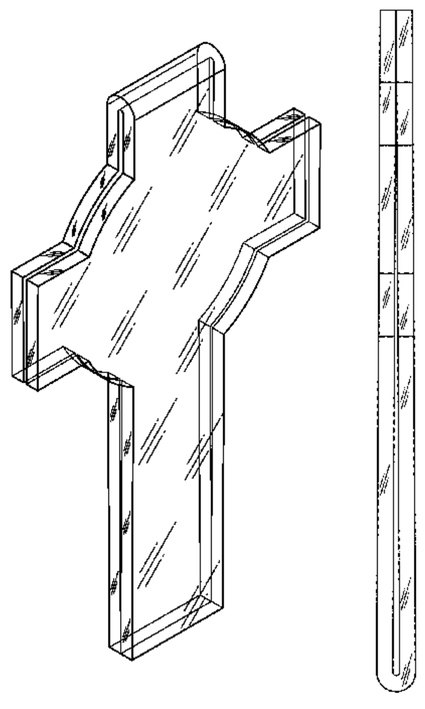
(57) **CLAIM**

The ornamental design for a cross-shaped display frame for insertion of display material, as shown and described.

DESCRIPTION

FIG. **1** is a front perspective view of a cross-shaped display frame for insertion of display material in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **2** is a front thereof, with the rear view being a minor image thereof;
FIG. **3** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **4** is a top view thereof;
FIG. **5** is a bottom view thereof;
FIG. **6** is a front perspective view of another embodiment of a cross-shaped display frame for insertion of display material in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **7** is a front thereof, with the rear view being a mirror image thereof;
FIG. **8** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **9** is a top view thereof;
FIG. **10** is a bottom view thereof;
FIG. **11** is a front perspective view of another embodiment of a cross-shaped display frame for insertion of display material



in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **12** is a front thereof, with the rear view being a mirror image thereof;
FIG. **13** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **14** is a top view thereof;
FIG. **15** is a bottom view thereof;
FIG. **16** is a front perspective view of another embodiment of a cross-shaped display frame for insertion of display material in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **17** is a front thereof, with the rear view being a mirror image thereof;
FIG. **18** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **19** is a top view thereof;
FIG. **20** is a bottom view thereof;
FIG. **21** is a front perspective view of another embodiment of a cross-shaped display frame for insertion of display material in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **22** is a front thereof, with the rear view being a mirror image thereof;
FIG. **23** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **24** is a top view thereof;
FIG. **25** is a bottom view thereof;
FIG. **26** is a front perspective view of another embodiment of a cross-shaped display frame in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **27** is a front thereof, with the rear view being a mirror image thereof;
FIG. **28** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **29** is a top view thereof;
FIG. **30** is a bottom view thereof;
FIG. **31** is a front perspective view of another embodiment of a cross-shaped display frame in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **32** is a front thereof, with the rear view being a mirror image thereof;
FIG. **33** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **34** is a top view thereof;
FIG. **35** is a bottom view thereof;
FIG. **36** is a front perspective view of another embodiment of a cross-shaped display frame in accordance with the present invention, with the rear perspective view being a mirror image thereof;
FIG. **37** is a front thereof, with the rear view being a mirror image thereof;
FIG. **38** is a left side view thereof, with the right side view being a mirror image thereof;
FIG. **39** is a top view thereof; and,
FIG. **40** is a bottom view thereof.
The dot-dash broken lines shown in FIGS. **6-20** and **28-42** represent the bounds of the claimed design and form no part thereof.
