(57) **CLAIM**

The ornamental design for a portable clinical cervical traction device, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a first embodiment of the portable clinical cervical traction device of our new design.

FIG. 2 is a top view of the first embodiment of the portable clinical cervical traction device of our new design.

FIG. 3 is a right side view of the first embodiment of the portable clinical cervical traction device of our new design (the left side view is a mirror image).

FIG. 4 is a rear view of the first embodiment of the portable clinical cervical traction device of our new design.

FIG. 5 is a front view of the first embodiment of the portable clinical cervical traction device of our new design.

FIG. 6 is a bottom view of the first embodiment of the portable clinical cervical traction device of our new design.

FIG. 7 is a top perspective view of a second embodiment of the portable clinical cervical traction device of our new design.

FIG. 8 is a top view of the second embodiment of the portable clinical cervical traction device of our new design.

FIG. 9 is a right side view of the second embodiment of the portable clinical cervical traction device of our new design (the left side view is a mirror image).

FIG. 10 is a rear view of the second embodiment of the portable clinical cervical traction device of our new design.

FIG. 11 is a front view of the second embodiment of the portable clinical cervical traction device of our new design.

FIG. 12 is a bottom view of the second embodiment of the portable clinical cervical traction device of our new design.

FIG. 13 is a top perspective view of a third embodiment of the portable clinical cervical traction device of our new design.

FIG. 14 is a top view of the third embodiment of the portable clinical cervical traction device of our new design.

FIG. 15 is a right side view of the third embodiment of the portable clinical cervical traction device of our new design (the left side view is a mirror image).

FIG. 16 is a rear view of the third embodiment of the portable clinical cervical traction device of our new design.

FIG. 17 is a front view of the third embodiment of the portable clinical cervical traction device of our new design; and,

FIG. 18 is a bottom view of the third embodiment of the portable clinical cervical traction device of our new design. Structure that is not part of the claimed design, but which is considered necessary to show the environment in which the design is associated, is represented in FIGS. 6, 12 and 18 by broken lines.

1 Claim, 18 Drawing Sheets
