(57) **CLAIM**

The ornamental design for a display panel with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a first image of a display panel with animated graphical user interface showing our new design;

FIG. 2 is a front elevational view of a second image thereof; FIG. 3 is a front elevational view of a third image thereof; FIG. 4 is a front elevational view of a fourth image thereof; FIG. 5 is a front elevational view of a fifth image thereof; FIG. 6 is a front elevational view of a sixth image thereof; and, FIG. 7 is a front elevational view of a seventh image thereof. The appearance of the transitional images sequentially transition between the images shown in FIGS. 1-7. The process or period in which one image transitions to another image forms no part of the claimed design.

The broken lines showing a display panel, portions of the graphical user interface, text, and numbers are included for the purpose of illustrating environmental structure and form no part of the claimed design. Dot-dash broken lines define the boundaries of, but are not included in, the claimed design; meaning the space inside the dot-dash lines forms no part of the claimed design.
