(73) Assignee: **EndoChoice, Inc.**, Alpharetta, GA (US)

(57) **CLAIM**

We claim the ornamental design for a white balance enclosure cap for a medical device, as shown and described.

(**) Term: **14 Years**

DESCRIPTION

(21) Appl. No.: **29/465,989**

FIG. 1 is a front perspective view of white balance enclosure cap for a medical device showing our new design;

(22) Filed: **Sep. 3, 2013**

FIG. 2 is a first side perspective view thereof;

(51) **LOC (10) Cl.** **24-02**

FIG. 3 is a second side perspective view thereof, with the front structure exploded away in order to show portions of the design that would not otherwise be apparent;

(52) **U.S. Cl.**

USPC **D24/138**

FIG. 4 is a rear perspective view thereof, with the front structure exploded away in order to show portions of the design that would not otherwise be apparent;

(58) **Field of Classification Search**

USPC D24/137, 138, 133; D10/86

CPC H04N 9/73; H04N 9/735; A61B 1/00057;

A61B 1/045

See application file for complete search history.

FIG. 5 is a first side perspective view thereof, shown with the front and bottom structures exploded away in order to show portions of the design that would not otherwise be apparent;

FIG. 6 is a bottom plan view thereof, shown with the front and bottom structures removed; and,

FIG. 7 is a front elevation view thereof.

The broken lines shown in the views are included for the purpose of illustrating portions of the device that form no part of the claimed design.

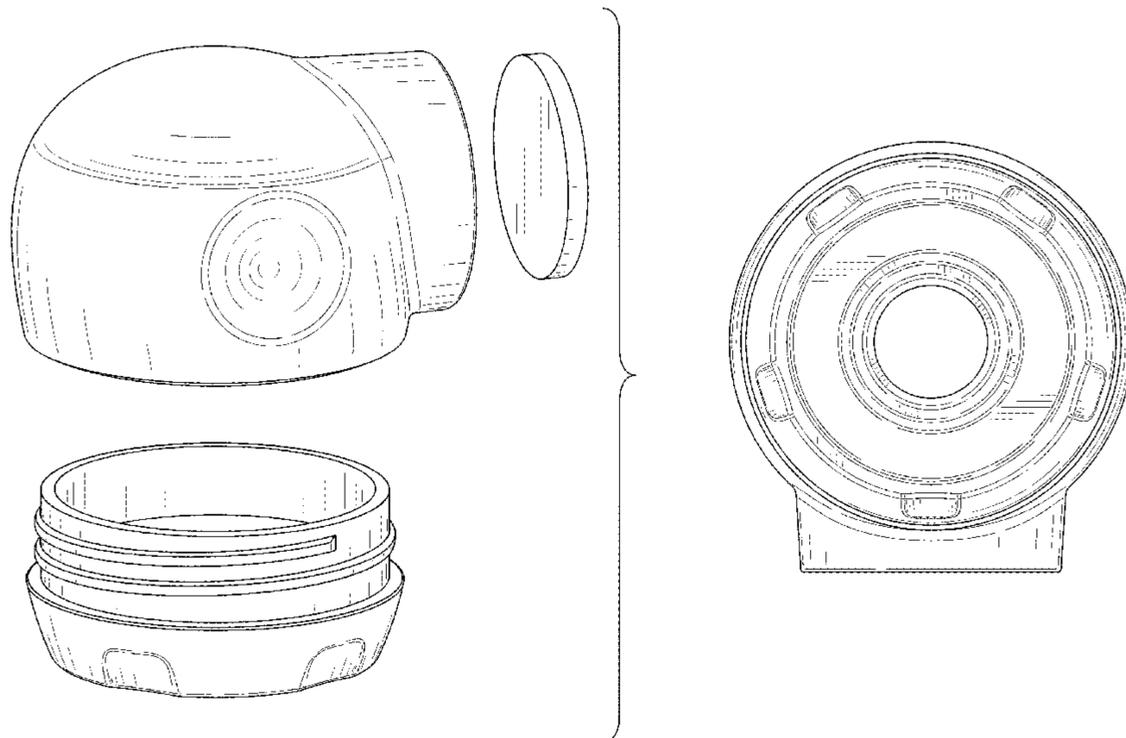

The article in which the design is embodied is intended to be used as a white balance enclosure cap for use with a medical device, such as an endoscope, for consistently and uniformly applying white balance adjustment to a picture image or video generated by endoscope.
