(57) **CLAIM**

The ornamental design for a ring, as shown and described is hereby claimed by Applicant Michael Joseph Young.

DESCRIPTION

The sole FIGURE is a perspective view of a ring showing my new design.

The ring is a fashion jewelry ring that can be worn on either the right or left hand. It can have an outside diameter of varying measurements, depending on the model that is produced. It can be made of different materials as selected by the producer of the ring. The unique design of the ring is the "cutout" or "nesting radius" next to the circular finger hole that allows the ring to be worn on the little finger and thereby "nest" into the third finger with great comfort.
