CLAIM

The ornamental design for a video communication set, substantially as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a video communication set showing our new design wherein the set includes a camera and a main processing unit (hereinafter “MPU”);

FIG. 2 is a perspective view of a camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 3 is a front view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 4 is a back view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 5 is a left side view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 6 is a right side view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 7 is a top view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 8 is a bottom view of the camera assembly of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 9 is a perspective view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 10 is a top view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 11 is a bottom view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 12 is a right side view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 13 is a left side view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 14 is a front view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure;

FIG. 15 is a back view of the MPU of the video communication set of FIG. 1, shown separated from the set for clarity of disclosure; and,

FIG. 16 is a view of the camera assembly and the MPU of the video communication set of FIG. 1 showing an additional environment of being mounted on a top of an electronic display device.

The broken lines in the drawings consisting of uniform dashes depict an unclaimed connecting cord and are for environmental purposes only and form no part of the claimed design. The unclaimed environmental connecting cord in FIG. 1 is shown with a symbolic break in its length. The appearance of any portion of the article in between the broken lines, including the broken lines themselves, forms no part of the claimed design. The broken lines consisting of a long dash and two short dashes seen on the surfaces of the camera and the MPU depict portions of the camera and the MPU that form no part of the claim. The remaining broken lines seen in FIG. 16 consisting of a long dash and two short dashes showing the monitor and table depict environmental subject matter only and form no part of the claim.
