FIG. 1 is an isometric view of one embodiment of a compact intermittent catheter in a collapsed state providing a discreet package.

FIG. 2 a front side view of the compact intermittent catheter illustrated in FIG. 1, where a back side view is not illustrated as it is a mirror image of the front side view.

FIG. 3 a left side view of the compact intermittent catheter illustrated in FIG. 1.

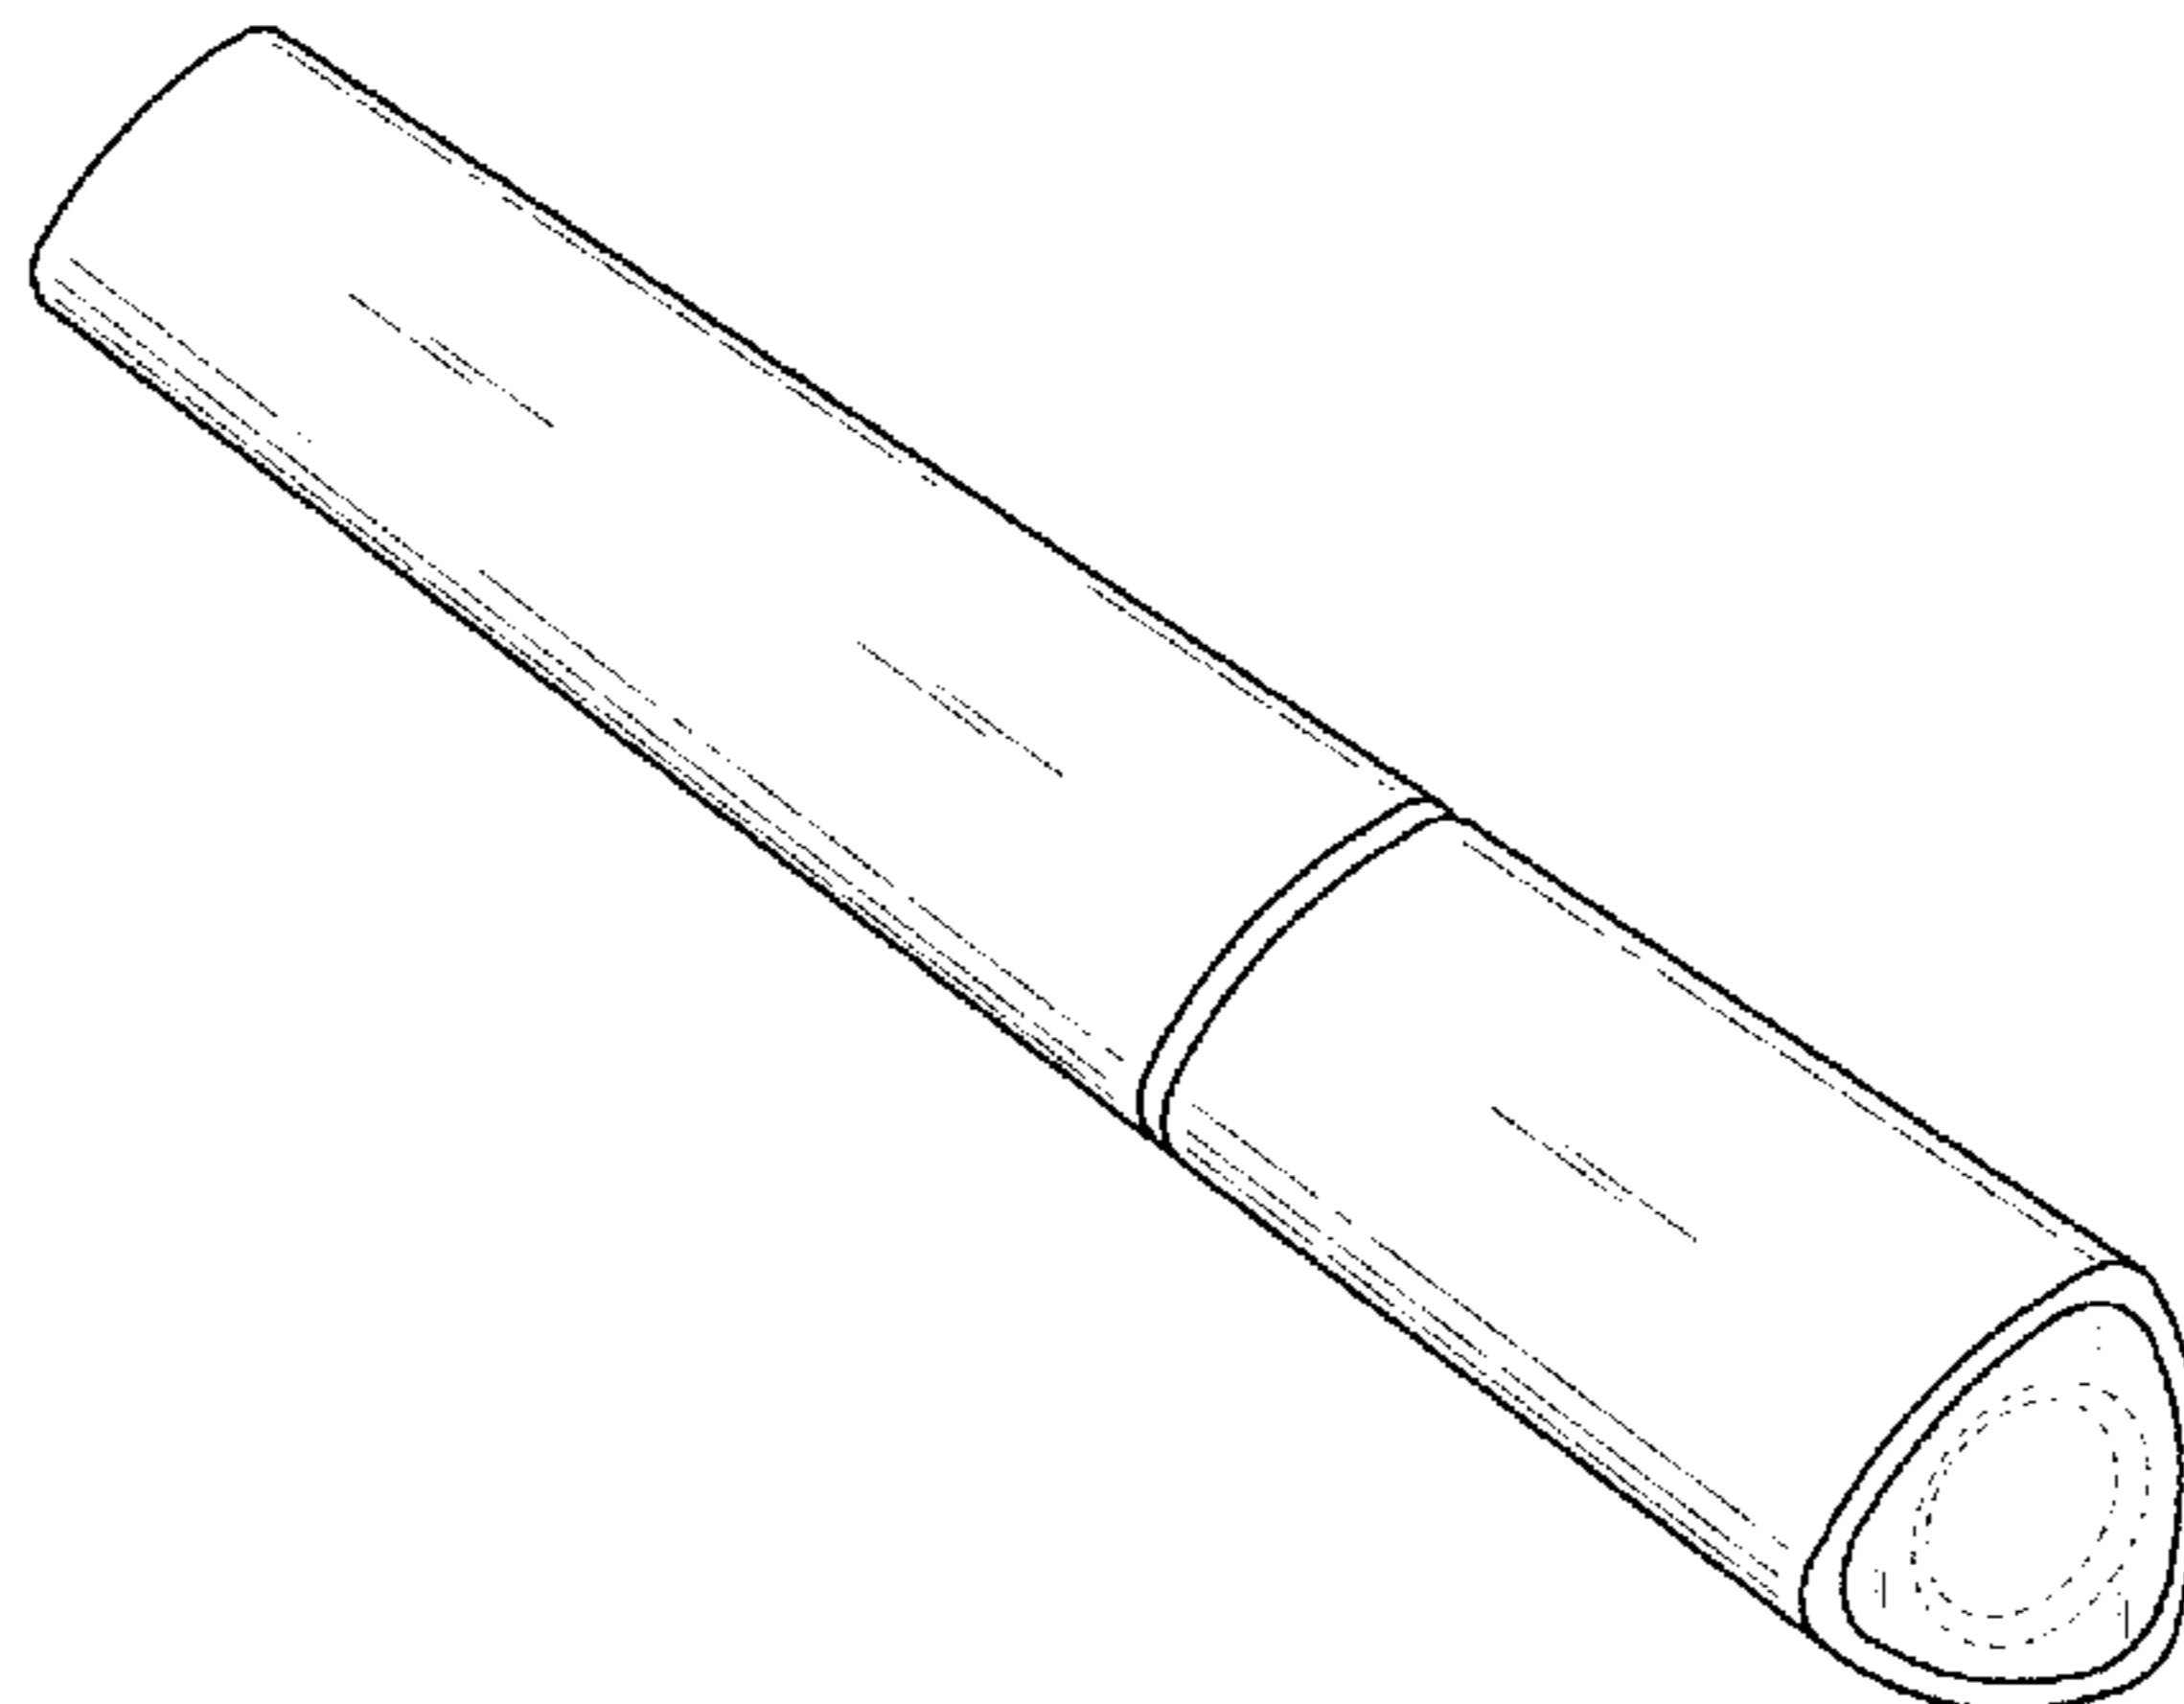

FIG. 4 is a right side view of the compact intermittent catheter illustrated in FIG. 1 illustrating the compact intermittent catheter in a closed state.

FIG. 5 is an isometric view of the compact intermittent catheter illustrated in FIG. 1 with the package in an extended state; and,

FIG. 6 is a front side view of the compact intermittent catheter illustrated in FIG. 5.

See application file for complete search history.
