(57) **CLAIM**

The ornamental design for a display panel or screen with a graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of a first image of a first embodiment of a display panel or screen with a graphical user interface showing our new design; and  
FIG. 2 is a front elevational view of a second image thereof.  
FIG. 3 is a front elevational view of a first image of a second embodiment of a display panel or screen with a graphical user interface showing our new design; and  
FIG. 4 is a front elevational view of a second image thereof.  
FIG. 5 is a front elevational view of a first image of a third embodiment of a display panel or screen with a graphical user interface showing our new design; and,  
FIG. 6 is a front elevational view of a second image thereof.  
The appearance of the transitional image transitions sequentially between the images shown in FIGS. 1 and 2, FIGS. 3 and 4 and FIGS. 5 and 6 respectively. The broken line showing of a display panel or screen, and other elements forms no part of the claimed design. Dot-dash broken lines define the boundaries of, but not included in, the claimed design.
