(57) **CLAIM**

The ornamental design for a display interface or housing thereof, as shown and described.

DESCRIPTION

FIG. **1** is a right, front, top perspective view of a display interface or housing thereof according to our new design;
FIG. **2** is a front elevational view thereof;
FIG. **3** is a right side elevational view thereof;
FIG. **4** is a left side elevational view thereof;
FIG. **5** is a top plan view thereof; and,
FIG. **6** is a bottom plan view thereof.

The broken line representations in the figures illustrate unclaimed environment of the display interface. The break lines in the figures represent indeterminate dimensioning of the claimed design having surfaces therebetween that can be configured continuously or discontinuously with respect to one or more adjacent surfaces. Thus, the broken lines and the break lines form no part of the claimed design.

The nature of this design pertains to a display interface, or housing for a display interface, such as a touch screen control for a work vehicle.
