US00D762279S

(12) United States Design Patent
Flournoy et al.

(10) **Patent No.:** **US D762,279 S**

(45) **Date of Patent:** ** **Jul. 26, 2016**

(54) **MEDIA FOR SUPPORTING GROWTH BIOLOGY WITHIN A WASTEWATER TREATMENT SYSTEM**

(71) Applicant: **Entex Technologies, Inc.**, Chapel Hill, NC (US)

(72) Inventors: **Wayne J. Flournoy**, Chapel Hill, NC (US); **Richard L. Pehrson**, Limerick, PA (US)

(73) Assignee: **Entex Technologies, Inc.**, Chapel Hill, NC (US)

(**) Term: **14 Years**

(21) Appl. No.: **29/509,979**

(22) Filed: **Nov. 24, 2014**

Related U.S. Application Data

(60) Division of application No. 29/438,760, filed on Dec. 3, 2012, now Pat. No. Des. 718,412, which is a continuation-in-part of application No. 29/363,301, filed on Aug. 6, 2010, now Pat. No. Des. 672,009, which is a continuation-in-part of application No. 29/346,510, filed on Nov. 2, 2009, now Pat. No. Des. 618,760, which is a continuation-in-part of application No. 29/321,003, filed on Jul. 9, 2008, now abandoned, which is a continuation of application No. 11/552,779, filed on Oct. 25, 2006, now abandoned.

(57) **CLAIM**

The ornamental design for an media for supporting growth biology within a wastewater treating system, as shown and described.

DESCRIPTION

FIG. **1** is a diagram illustrating a cross-sectional view of an elliptical media for supporting growth biology within a biological reactor, wherein the plane of the cross-sectional view is substantially perpendicular to the longitudinal axis of the media;

FIG. **2** is a diagram illustrating the left side view of the media of FIG. **1**, the right side view of the media being a mirror image; and,

FIG. **3** is a diagram illustrating an isometric view of the media of FIG. **1**.

The broken lines shown in FIGS. **2** and **3** are included for the purpose of illustrating those portions of the surface of the claimed media design where surface features form no part of the claimed media design and represent only the environment of the claimed media design. None of the broken lines forms a part of the claimed media.
