(57) **CLAIM**

We claim the ornamental design for a light fixture, as shown
and described.

DESCRIPTION

FIG. 1 is a bottom, rear, left perspective view of an embodi-
ment of the claimed design;

FIG. 2 is a bottom plan view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a left elevation view thereof;

FIG. 5 is a right elevation view thereof;

FIG. 6 is a front elevation view thereof; and,

FIG. 7 is a rear elevation view thereof.

The ornamental design which is claimed is shown in solid
lines in the drawings. The broken lines in the drawings form
no part of the claimed design. Broken lines formed by equal
length dashes show unclaimed subject matter. Broken lines
formed by unequal length dashes (i.e., dash-dot) define
bounds of the claimed design. Broken away symbols having
a jagged element show that no particular length of the portion
is claimed.

While the accompanying drawings illustrate one or more
exemplary embodiments, it should be understood that accord-
ing to other exemplary embodiments that should be consid-
ered to be within the possession of the inventors of the present
application at the time this application is being filed, it is
contemplated that any illustrated solid lines (or portions
thereof) may be converted to broken lines and that any illus-
trated broken lines (or portions thereof) may be converted to
solid lines so as to claim or disclaim portions, components, or
sub-components of the designs shown, and that any illus-
trated solid lines (or portions thereof) and broken lines (or any
portions thereof) from a single depicted embodiment may be
combined with those of another depicted embodiment. It is
further contemplated that shading may be added or removed
to claim or disclaim the corresponding surfaces.

1 Claim, 5 Drawing Sheets
