(57) **CLAIM**

The ornamental design for an electronic display with animated graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first embodiment of an electronic display with animated graphical user interface; FIGS. 2 through 21 are front views of subsequent stages in the sequence of the first embodiment of an electronic display with animated graphical user interface; FIG. 22 is a front view of a second embodiment of an electronic display with animated graphical user interface; and, FIGS. 23 through 39 are front views of subsequent stages in the sequence of the second embodiment of an electronic display with animated graphical user interface.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design. The broken lines shown in the drawings represent portions of the electronic display with animated graphical user interface that form no part of the claimed design. The dot-dashed broken line(s) define the bounds of the claimed design and form no part thereof. It is to be understood that the claimed design extends to but does not include the defined boundary. For instance, dot-dashed lines are used in the figures to, inter alia, define a boundary of or within the display that incorporates my animated graphical user interface, it being understood that the claimed design extends to but does not include the boundary of or within the display.
