(57) **CLAIM**

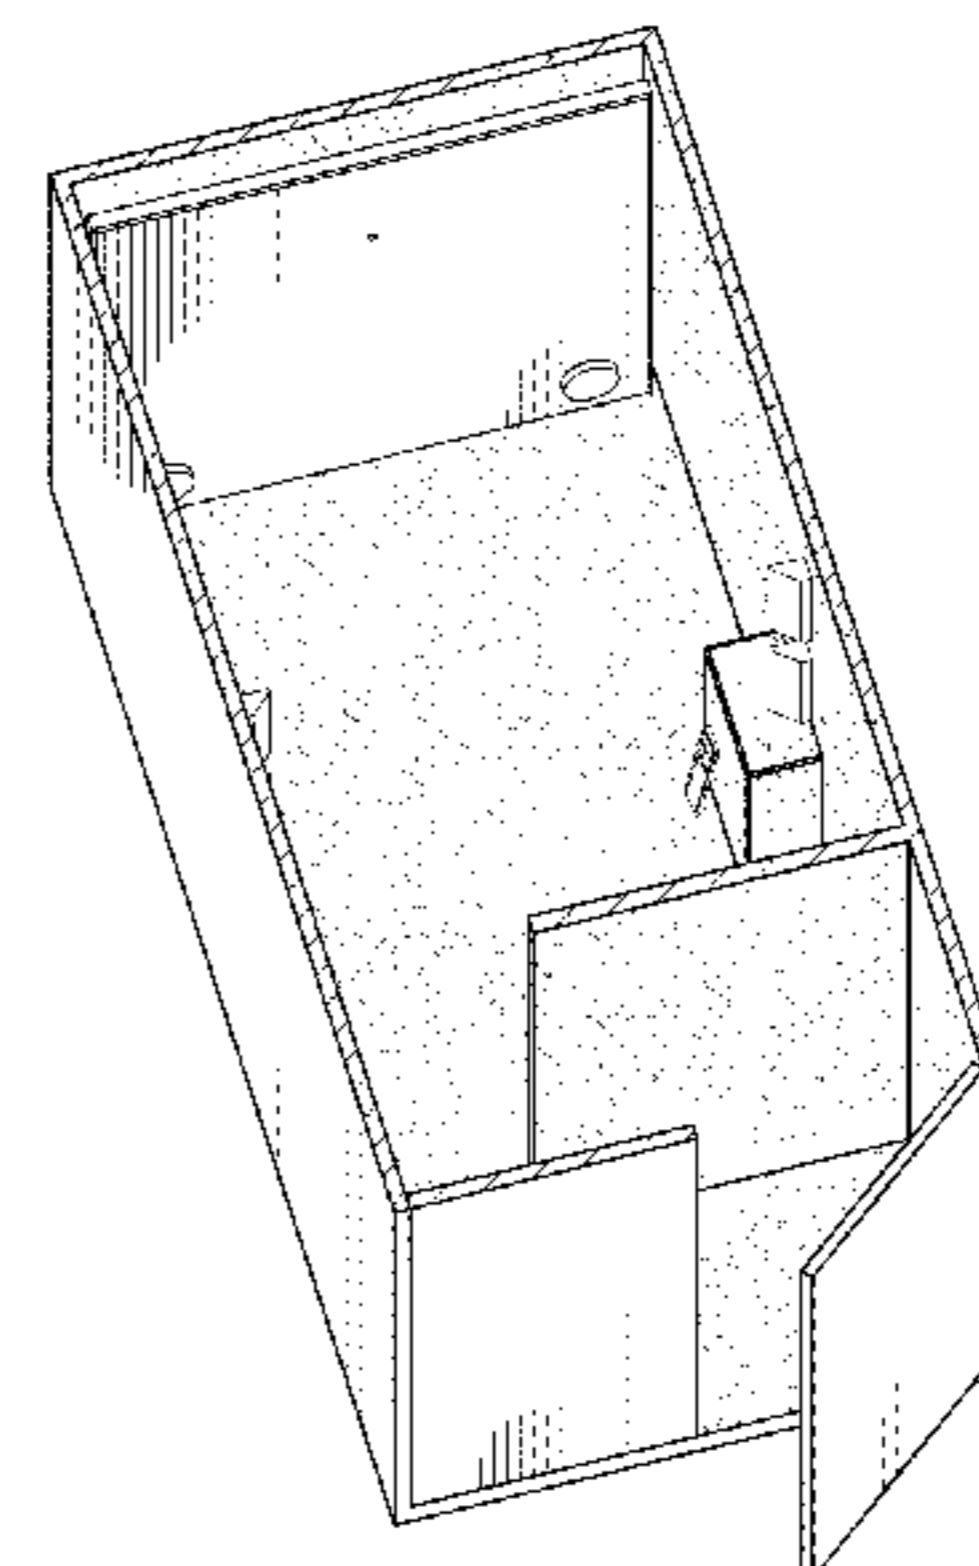

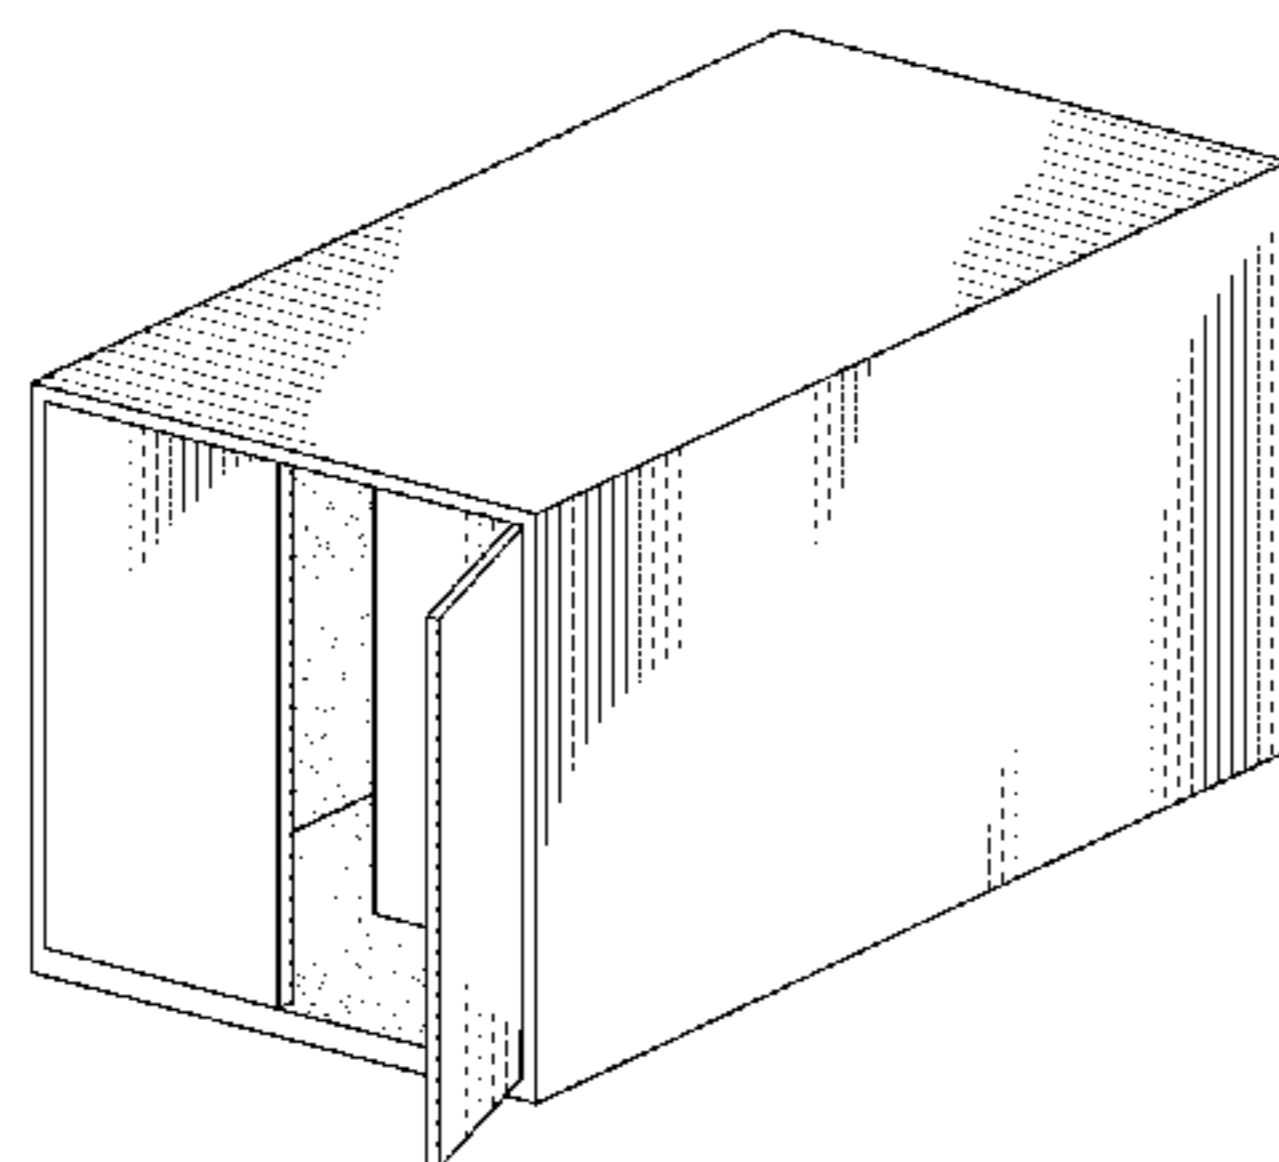

The ornamental design for a communication portal, as shown and described.

DESCRIPTION

FIG. 1 is a front and side perspective view of a communication portal in accordance with the present design;
 FIG. 2 is a rear and side perspective view of the communication portal;
 FIG. 3 is a top perspective view of the interior of the communication portal, illustrating the interior without the roof, and showing one wall of the interior;
 FIG. 4 is another top perspective view of the interior of the communication portal, illustrating the interior without the roof, and showing an opposite wall facing the one shown in FIG. 3;
 FIG. 5 is a perspective view of the communication portal, illustrating the rear, with a person entering the communication portal through a doorway;
 FIG. 6 is a top perspective view of the communication portal, illustrating the front and rear interior spaces, the doorway in the rear and the video screen in the front;
 FIG. 7 is a top plan view of the communication portal;
 FIG. 8 is a section view of the communication portal, illustrating a first person facing the video screen and in communication with a second person; and,
 FIG. 9 is a section view, without a side wall of the communication portal, and illustrating a rotated screen to expose the space within which a camera and other electronic equipment are located.

The illustrations in the drawings that are shown in broken lines are environment structure that is not part of the design.
