(57) **CLAIM**

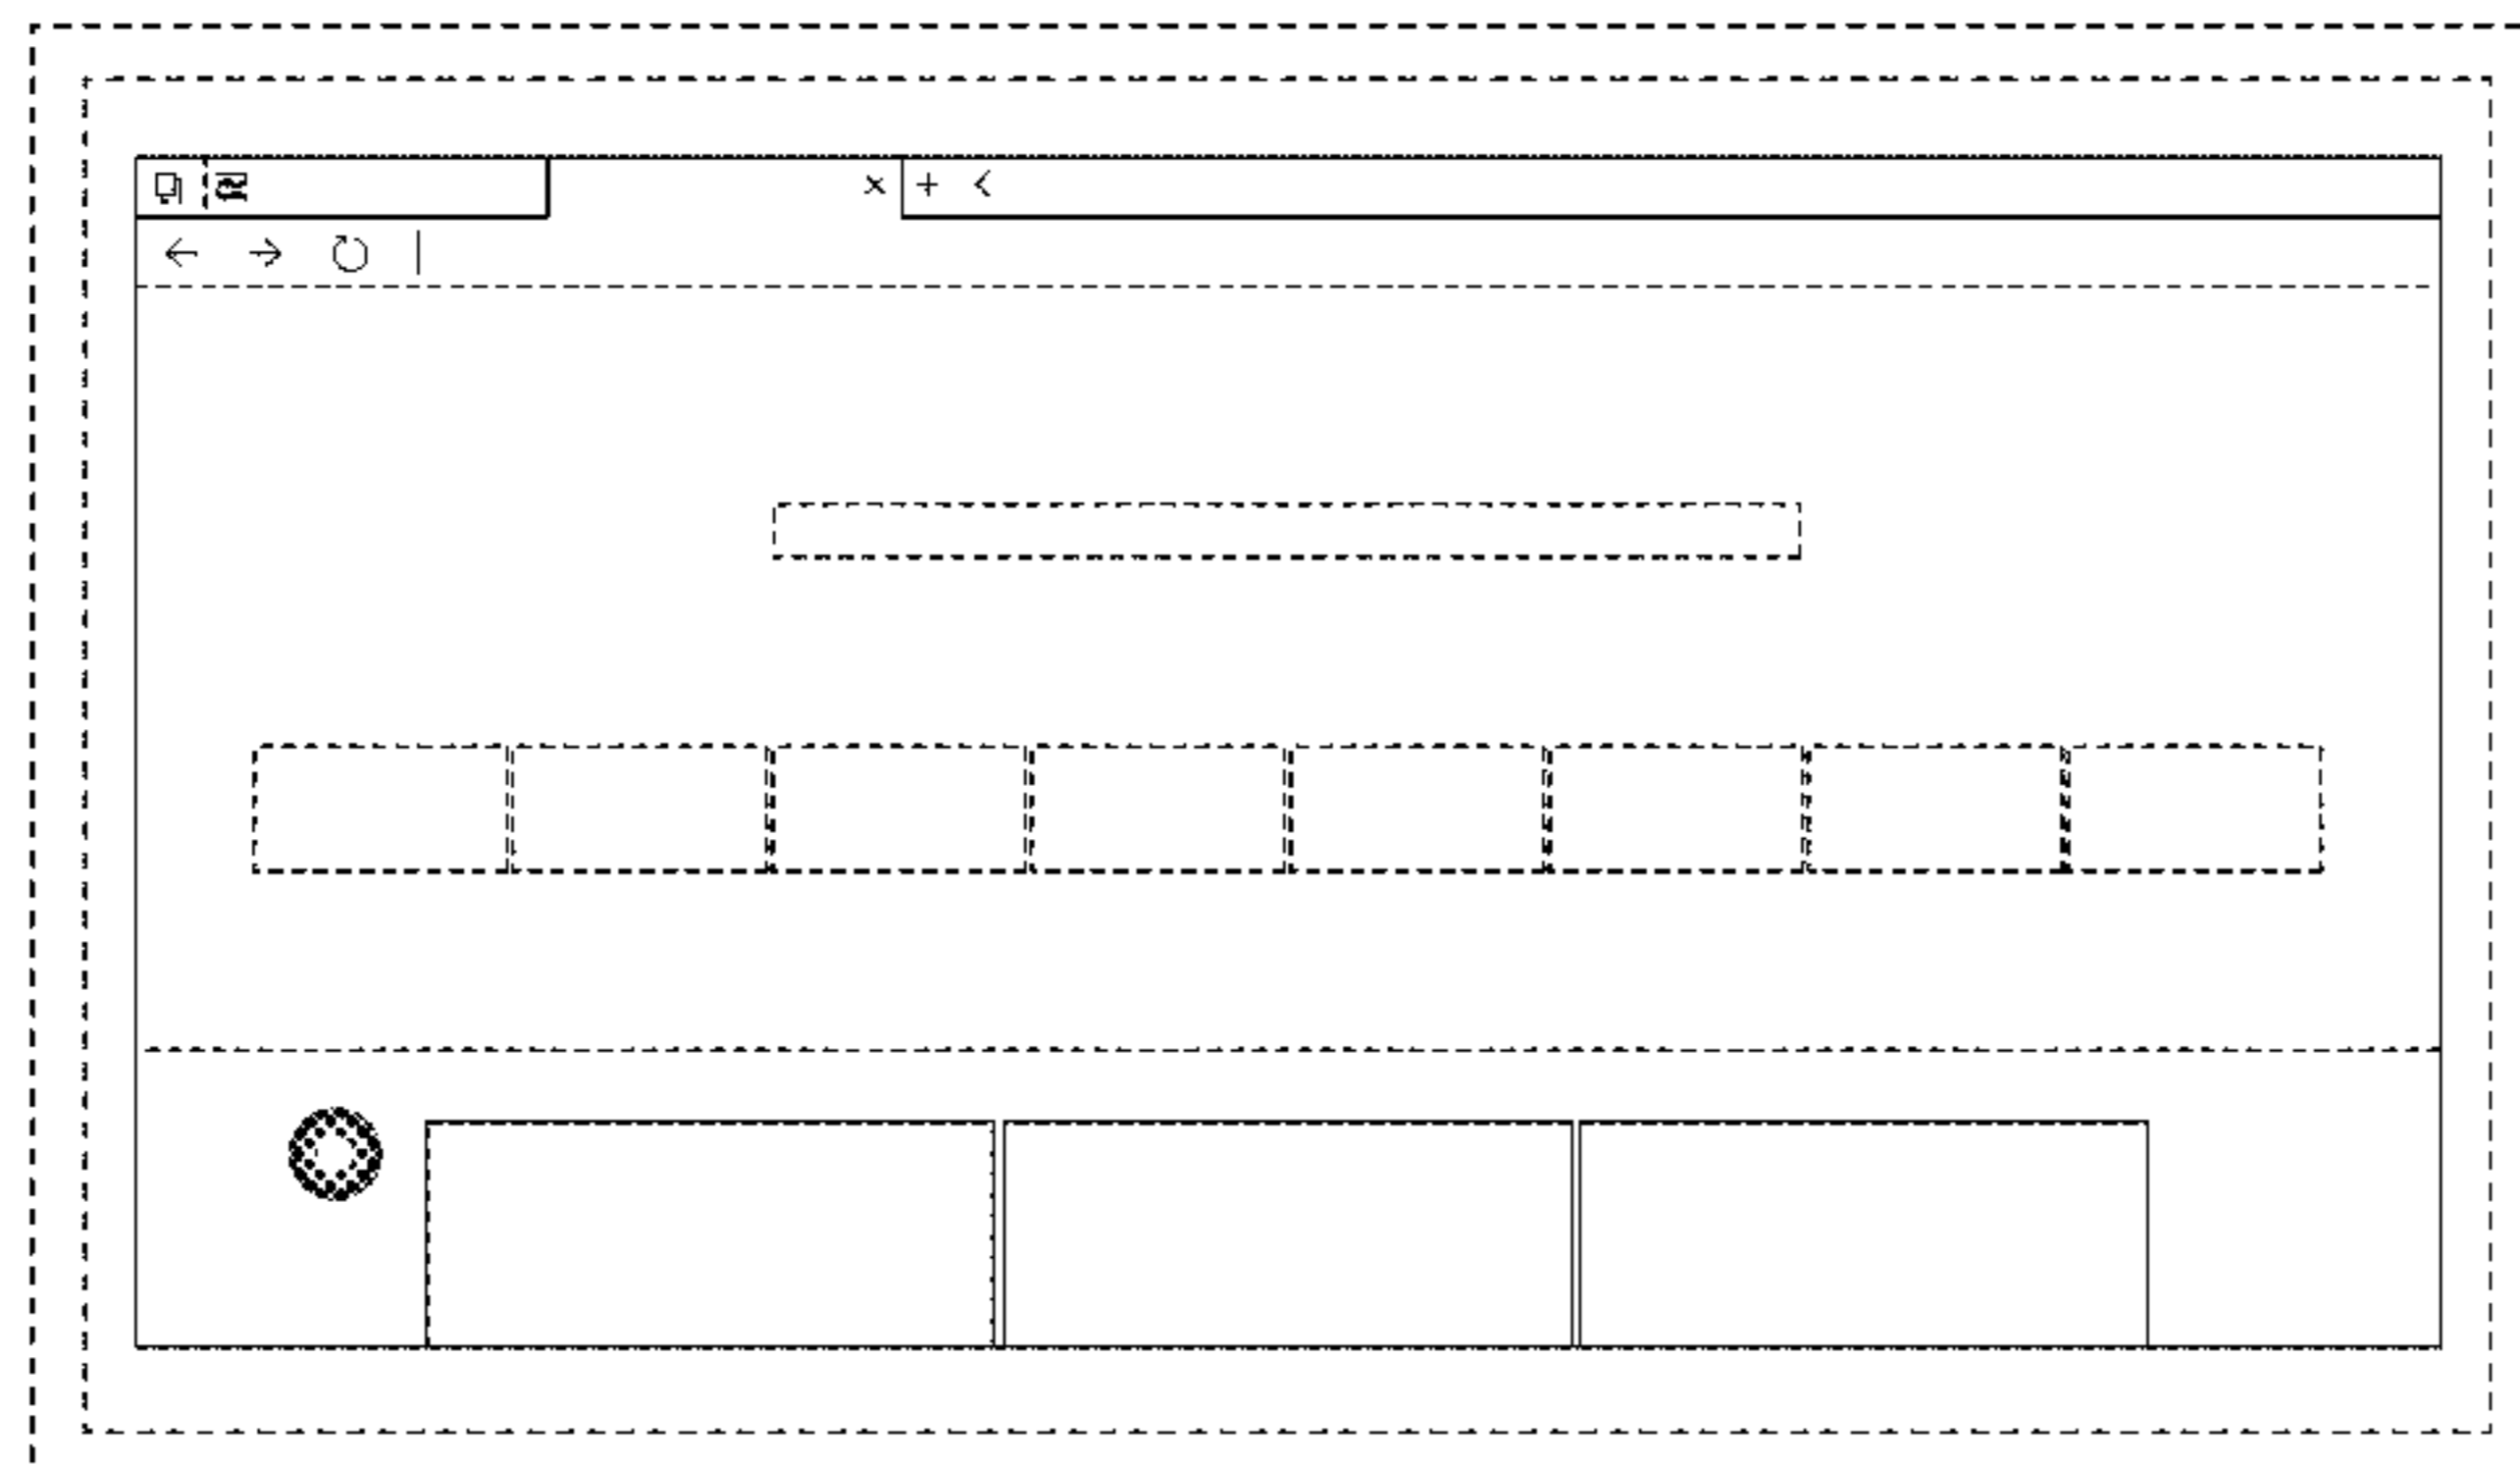

The ornamental design for a display screen with animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is the first image in a sequence for a display screen with animated graphical user interface showing our new design; FIG. 2 is the second image thereof; FIG. 3 is the third image thereof; FIG. 4 is the fourth image thereof; FIG. 5 is the fifth image thereof; FIG. 6 is the sixth image thereof; FIG. 7 is the seventh image thereof; FIG. 8 is the eighth image thereof; FIG. 9 is the ninth image thereof; FIG. 10 is the tenth image thereof; FIG. 11 is the eleventh image thereof; and, FIG. 12 is the twelfth image thereof.

The difference in shading indicates a contrast of appearance and does not depict any particular color texture, or material. The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-12. The process or period in which one image transitions to another forms no part of the claimed design. The outermost broken lines illustrate the display screen, and the remaining broken lines illustrate portions of the animated graphical user interface. None of the broken lines form part of the claimed design.
