(57) **CLAIM**

The ornamental design for a device for tracking status of time-sensitive articles, as shown and described.

**DESCRIPTION**

FIG. 1 is a right front perspective view of a device for tracking status of time-sensitive articles, showing our new design in a first embodiment, in a closed and wrapped configuration;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a right side elevational view thereof;

FIG. 4 is a left side elevational view thereof;

FIG. 5 is a top plan view thereof;

FIG. 6 is a bottom plan view thereof;

FIG. 7 is a left rear perspective view thereof;

FIG. 8 is a back elevational view thereof;

FIG. 9 is a left rear perspective view of back and front pieces of the device in an open and wrapped configuration in accordance with an embodiment;

FIG. 10 is a perspective view of the device in an open and wrapped configuration, showing a left rear perspective view of the front piece and a right front perspective view of the back piece in accordance with an embodiment; and,

FIG. 11 is a perspective view of the device in an open and unwrapped configuration, showing a left rear perspective view of the front piece and a right front perspective view of the back piece in the unwrapped configuration in accordance with an embodiment.

The broken line showing of *\*structural features\** is included for the purpose of illustrating non-claimed subject matter and forms no part of the claimed design.
