(57) **CLAIM**

The ornamental design for a display panel portion with a changeable graphical user interface Component, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a first embodiment of our new design;  
FIG. 2 is a front view of a second image in the sequence of the first embodiment;  
FIG. 3 is a front view of a third image in the sequence of the first embodiment;  
FIG. 4 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a second embodiment of our new design;  
FIG. 5 is a front view of a second image thereof in the sequence of the second embodiment;  
FIG. 6 is a front view of a third image thereof in the sequence of the second embodiment;

FIG. 7 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a third embodiment of our new design;

FIG. 8 is a front view of a second image thereof in the sequence of the third embodiment;

FIG. 9 is a front view of a third image thereof in the sequence of the third embodiment;

FIG. 10 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a fourth embodiment of our new design;

FIG. 11 is a front view of a second image thereof in the sequence of the fourth embodiment;

FIG. 12 is a front view of a third image thereof in the sequence of the fourth embodiment;

FIG. 13 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a fifth embodiment of our new design;

FIG. 14 is a front view of a second image thereof in the sequence of the fifth embodiment;

FIG. 15 is a front view of a third image thereof in the sequence of the fifth embodiment;

FIG. 16 is a front view of a display panel portion with a changeable graphical user interface component showing a first image in a sequence according to a sixth embodiment of our new design;

FIG. 17 is a front view of a second image thereof in the sequence of the sixth embodiment; and,

FIG. 18 is a front view of a third image thereof in the sequence of the sixth embodiment.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The dash-dash broken lines illustrate environmental structure, namely, text, borders, and a portion of a display panel of a communications terminal surrounding the illustrated changeable graphical user interface component, and form no part of the claimed design.

The curved broken-away lines indicate break lines and the appearance of any portion of the article between the break lines forms no part of the claimed design.

The diagonal lines that are part of the claimed design are meant to portray contrasting appearance. Any diagonal lines that appear at the same angle yet at different locations of the claimed design are meant to portray the same appearance.
