(57) **CLAIM**

The ornamental design for a horn-shaped decanter, as shown and described.

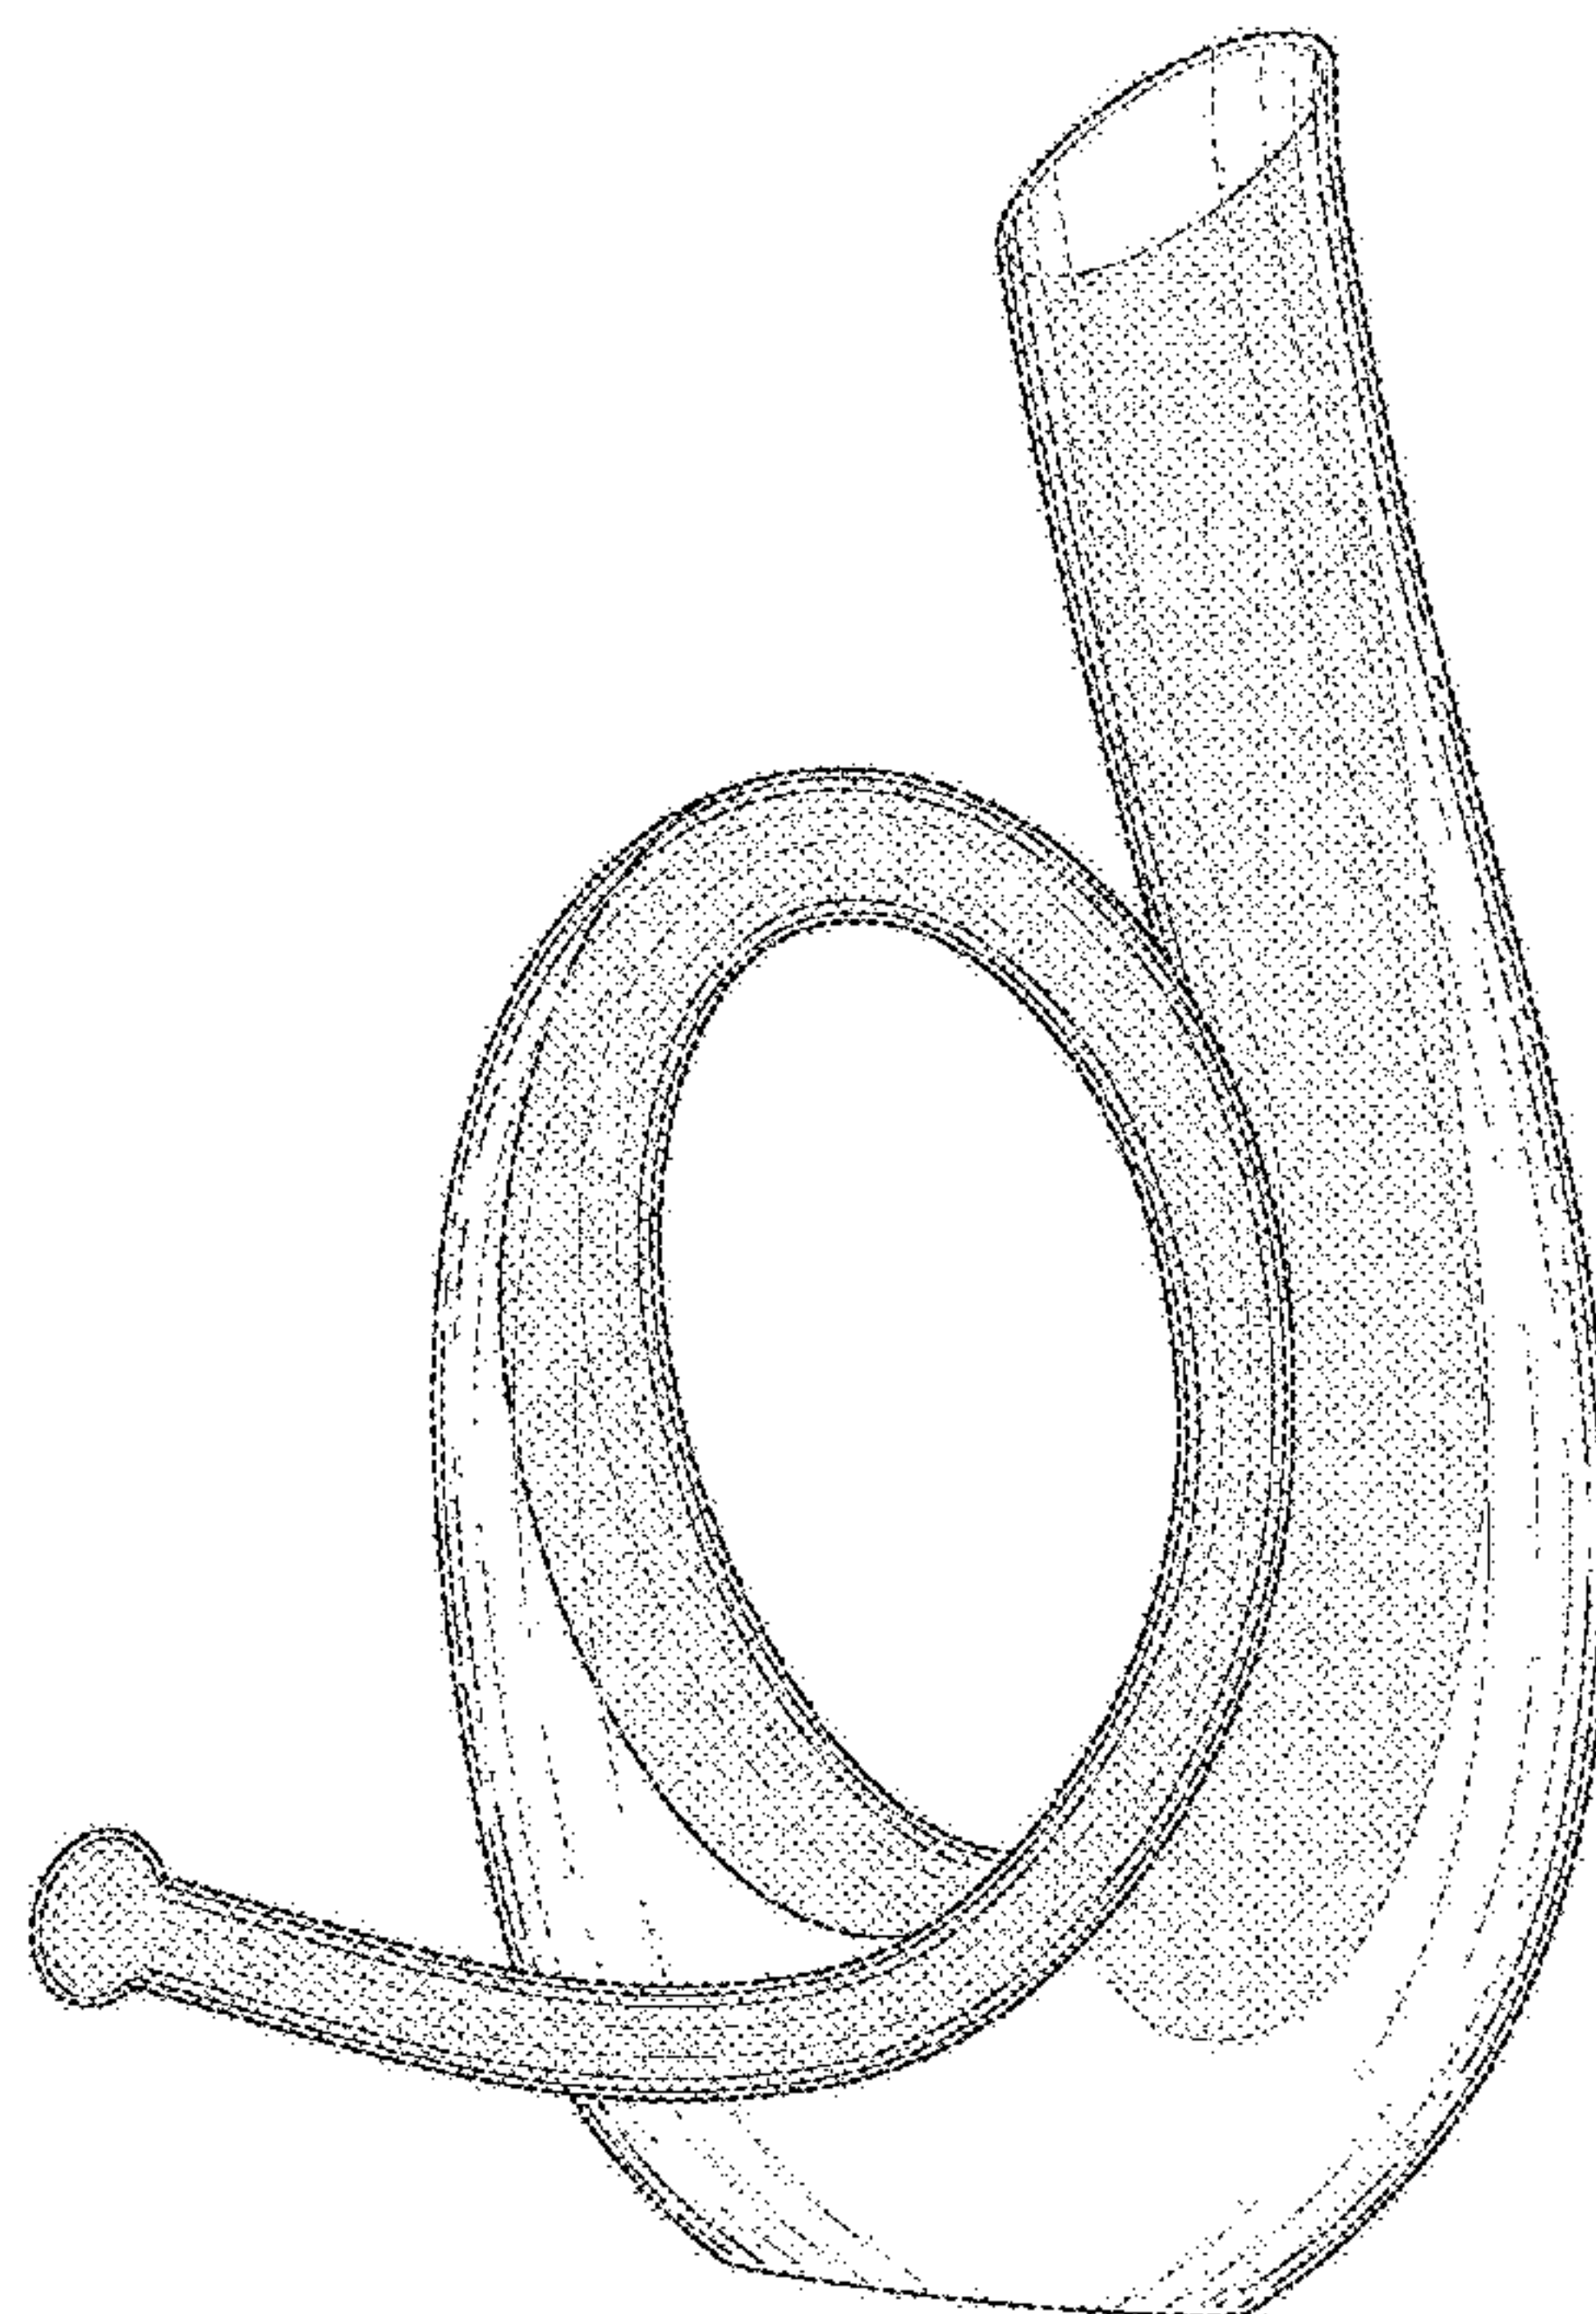

DESCRIPTION

FIG. 1 is a perspective view of a horn-shaped decanter showing my new design;
FIG. 2 is a left side view thereof;
FIG. 3 is a rear view thereof;
FIG. 4 is a right side view thereof;
FIG. 5 is a front view thereof;
FIG. 6 is a top plan view thereof; and,
FIG. 7 is a bottom plan view thereof.

The instant invention is a decanter made of clear glass and shaped to resemble an Austrian post horn. In fact, when empty the decanter can in fact be blown into and sounds like such a post horn.

There is a stripe extending from the small-diameter end that resembles a mouthpiece to the opposite larger-diameter end that forms a spout from which a liquid, typically wine, can be poured from the decanter. The base of the decanter shown in FIG. 7 is planar and smooth.
