(57) **CLAIM**
The ornamental design for a display panel portion with animated computer icon, substantially as shown and described.

DESCRIPTION

FIG. 1 is a front view of the first image in a sequence for a display panel portion with animated computer icon.
FIG. 2 is a front view of the second image in a sequence for a display panel portion with animated computer icon.
FIG. 3 is a front view of the third image in a sequence for a display panel portion with animated computer icon.
FIG. 4 is a front view of the fourth image in a sequence for a display panel portion with animated computer icon.
FIG. 5 is a front view of the fifth image in a sequence for a display panel portion with animated computer icon; and,
FIG. 6 is a front view of the sixth image in a sequence for a display panel portion with animated computer icon.
The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
The solid line portion bordering each figure is an outer edge of the graphical user interface where the edge of the graphical user interface meets the edge of the display panel portion. The large broken lines bordering each figure illustrate the display panel portion and forms no part of the claimed design. All sizes of broken lines within the graphical user interface illustrate portions of the graphical user interface and form no part of the claimed design.
