(57) **CLAIM**

The ornamental design for a display panel or portion thereof with a graphical user interface component, as shown and described.

DESCRIPTION

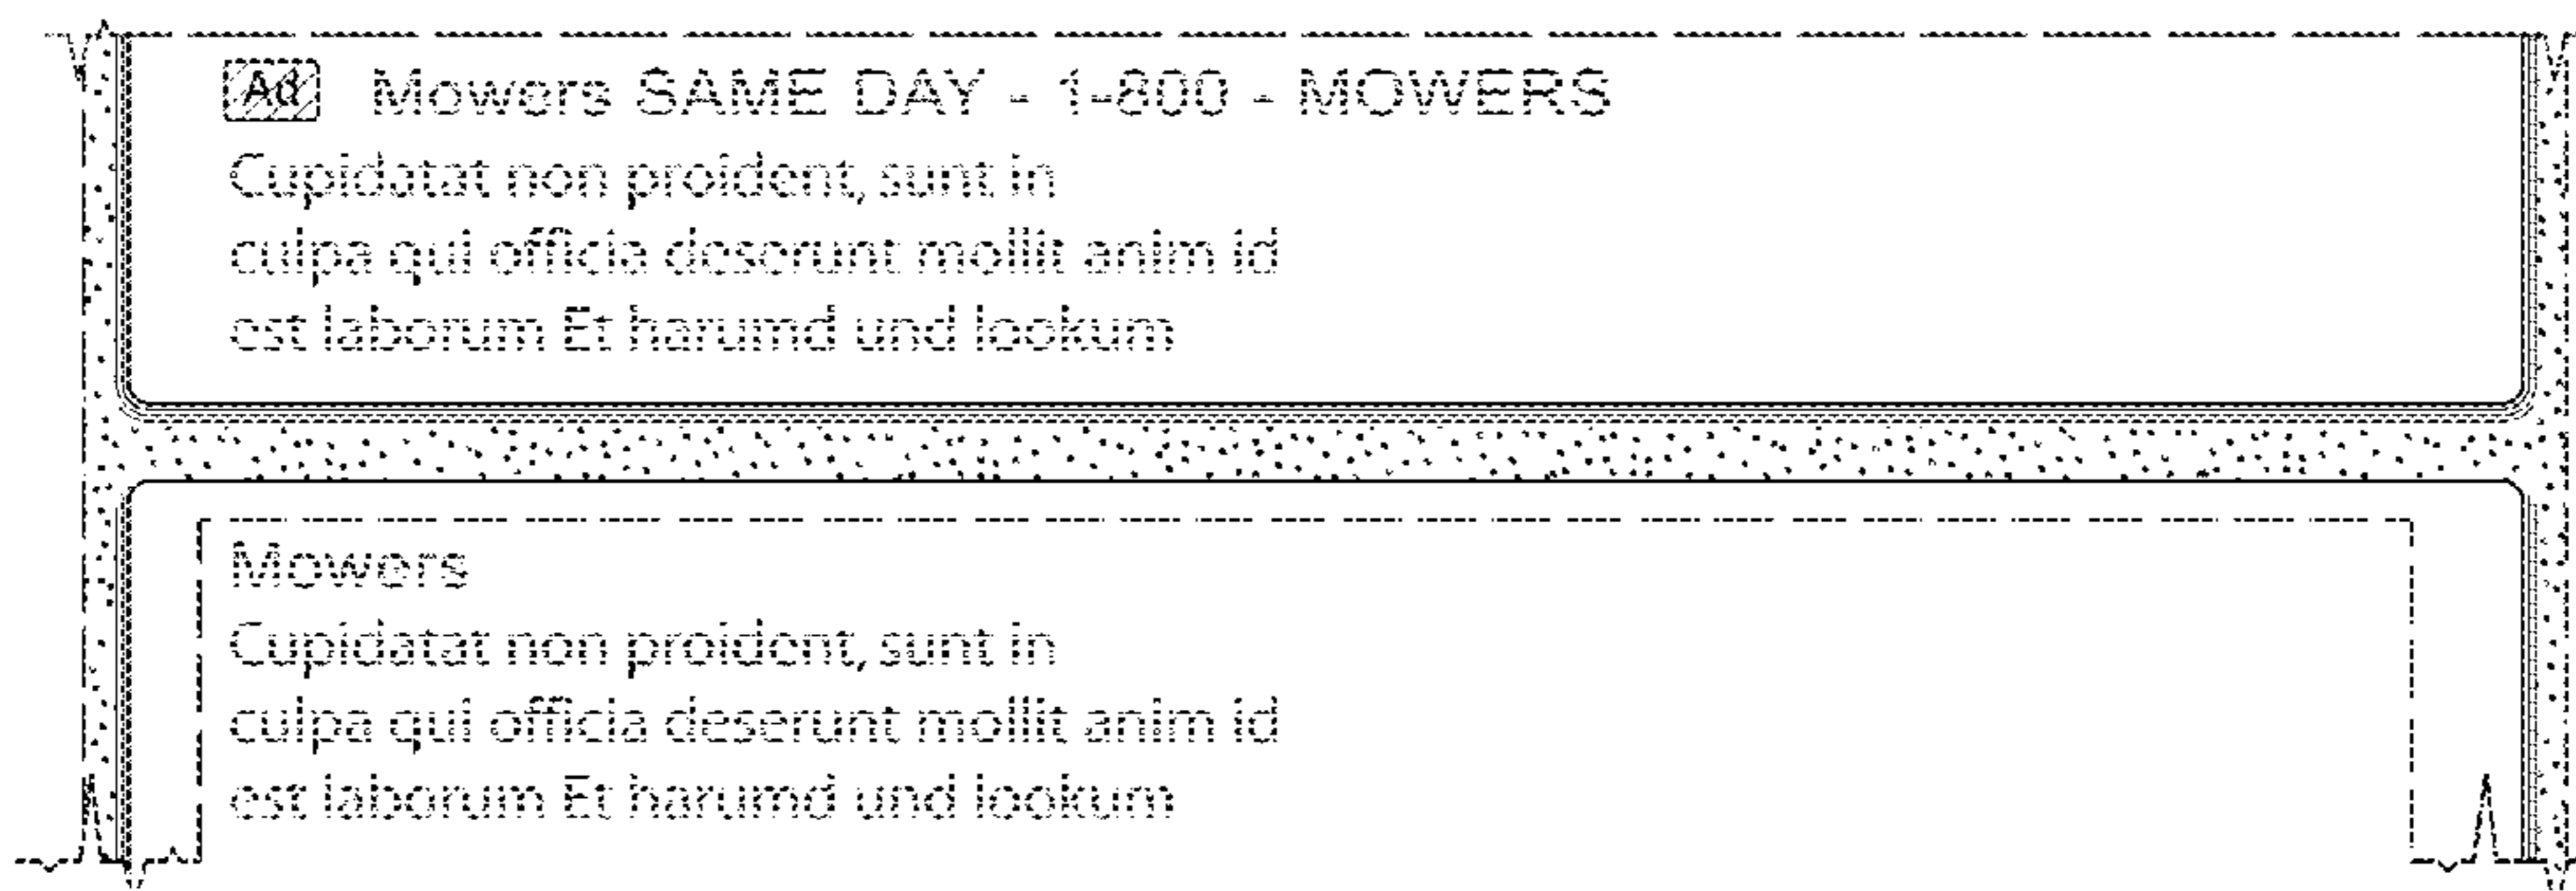

FIG. 1 is a front view of a display panel or portion thereof with a graphical user interface component showing features of a first embodiment of our new design; and,

FIG. 2 is a front view of a display panel or portion thereof with a graphical user interface component showing features of a second embodiment of our new design in a different environment.

The stippling and diagonal lines that are part of the claimed design portray contrasting appearance. Any diagonal lines that appear at the same angle yet at different locations of the claimed design portray the same appearance. The broken away lines at the end of the user interface component indicate break lines and the appearance of any portion of the article beyond the break lines forms no part of the claimed design.

The dash-dash-dash broken lines illustrate environmental structure, namely, text, images and a portion of a display panel of a communications terminal surrounding the illustrated user interface component, and form no part of the claimed design.
