(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

DESCRIPTION

The patent application contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first image of a display screen or portion thereof with graphical user interface according to our design; and,

FIG. 2 is a front view of a second image of a display screen or portion thereof with graphical user interface thereof.

In the above-described embodiment, the appearance of the images transitions sequentially in any order between the images shown therein. The process or period in which an image transitions to another forms no part of the claimed design.

The dot-dash broken lines shown in the drawings illustrate the display screen and the evenly spaced broken lines illustrate portions of the graphical user interface. All broken lines form no part of the claimed design.
