(57) **CLAIM**

The ornamental design for a bliss container, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a first embodiment of a bliss container in a first configuration;

FIG. 2 is a top perspective view of a first embodiment of a bliss container in a second configuration;
FIG. 3 is a top perspective view of a second embodiment of the bliss container in a first configuration;
FIG. 4 is a top perspective view of a second embodiment of the bliss container in a second configuration;
FIG. 5 is a top perspective view of a third embodiment of the bliss container in a first configuration;
FIG. 6 is a top perspective view of a third embodiment of the bliss container in a second configuration;
FIG. 7 is a bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 8 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 9 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 10 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 11 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 12 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 13 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 14 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 15 is an alternate bottom plan view of the first, second and third embodiments of the bliss container;
FIG. 16 is a bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 17 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 18 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 19 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;

FIG. 20 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 21 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 22 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 23 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 24 is an alternate bottom perspective view of the first, second and third embodiments of the bliss container;
FIG. 25 is a front plan view of the first configuration of the first, second and third embodiments of the bliss container;
FIG. 26 is a front plan view of the second configuration of the first, second and third embodiments of the bliss container;
FIG. 27 is a rear plan view of the first, second and third embodiments of the bliss container;
FIG. 28 is a right side plan view of the first, second and third embodiments of the bliss container; the left side plan view being identical to the right side plan view;
FIG. 29 is a top plan view of the outer blank to construct the first embodiment of the bliss container;
FIG. 30 is a top plan view of the inner blank to construct the first embodiment of the bliss container;
FIG. 31 is a top plan view of the outer blank to construct the second embodiment of the bliss container;
FIG. 32 is a top plan view of the inner blank to construct the second embodiment of the bliss container;
FIG. 33 is a top plan view of the outer blank to construct the third embodiment of the bliss container; and,
FIG. 34 is a top plan view of the inner blank to construct the third embodiment of the bliss container.
The broken lines are for the purpose of illustrating the environment of the article only and form no part of the claimed design.
