(57) **CLAIM**

The ornamental design for a portion of a display having graphical user interface with transitional icon, as shown and described.

DESCRIPTION

FIG. 1 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a first embodiment and illustrating a first image thereof.

FIG. 2 is a face view of a portion of a display having graphical user interface with transitional icon, according to the first embodiment and illustrating a second image thereof.

FIG. 3 is a face view of a portion of a display having graphical user interface with transitional icon, according to the first embodiment and illustrating a third image thereof.

FIG. 4 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a second embodiment and illustrating a first image thereof.

FIG. 5 is a face view of a portion of a display having graphical user interface with transitional icon, according to the second embodiment and illustrating a second image thereof.

FIG. 6 is a face view of a portion of a display having graphical user interface with transitional icon, according to the second embodiment and illustrating a third image thereof.

FIG. 7 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a third embodiment and illustrating a first image thereof.

FIG. 8 is a face view of a portion of a display having graphical user interface with transitional icon, according to the third embodiment and illustrating a second image thereof.

FIG. 9 is a face view of a portion of a display having graphical user interface with transitional icon, according to the third embodiment and illustrating a third image thereof.

FIG. 10 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a fourth embodiment and illustrating a first image thereof.

FIG. 11 is a face view of a portion of a display having graphical user interface with transitional icon, according to the fourth embodiment and illustrating a second image thereof.

FIG. 12 is a face view of a portion of a display having graphical user interface with transitional icon, according to the fourth embodiment and illustrating a third image thereof.

FIG. 13 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a fifth embodiment and illustrating a first image thereof.

FIG. 14 is a face view of a portion of a display having graphical user interface with transitional icon, according to the fifth embodiment and illustrating a second image thereof.

FIG. 15 is a face view of a portion of a display having graphical user interface with transitional icon, according to the fifth embodiment and illustrating a third image thereof.

FIG. 16 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a sixth embodiment and illustrating a first image thereof.

FIG. 17 is a face view of a portion of a display having graphical user interface with transitional icon, according to the sixth embodiment and illustrating a second image thereof.

FIG. 18 is a face view of a portion of a display having graphical user interface with transitional icon, according to the sixth embodiment and illustrating a third image thereof.

FIG. 19 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to a seventh embodiment and illustrating a first image thereof.

FIG. 20 is a face view of a portion of a display having graphical user interface with transitional icon, according to the seventh embodiment and illustrating a second image thereof.

FIG. 21 is a face view of a portion of a display having graphical user interface with transitional icon, according to the seventh embodiment and illustrating a third image thereof.

FIG. 22 is a face view of a portion of a display having graphical user interface with transitional icon, showing our new design, according to an eighth embodiment and illustrating a first image thereof.

FIG. 23 is a face view of a portion of a display having graphical user interface with transitional icon, according to the eighth embodiment and illustrating a second image thereof; and,

FIG. 24 is a face view of a portion of a display having graphical user interface with transitional icon, according to the eighth embodiment and illustrating a third image thereof.

The appearance of the transitional icon sequentially transitions among the images shown in FIGS. 1-3, among the images shown in FIGS. 4-6, among the images shown in FIGS. 7-9, among the images shown in FIGS. 10-12, among the images shown in FIGS. 13-15, among the images shown in FIGS. 16-18, among the images shown in FIGS. 19-21, are among the images shown in FIGS. 22-24. The process or period in which any image transitions to another image forms no part of the claimed design.

The broken line showing of a mobile device illustrates the environment of the article and forms no part of the claimed design. The remaining broken lines, showing a portion of a display screen and portions of the graphical user interface, form no part of the claimed design.
